The new

Introducing a whole new category of handheld instruments: the new 860 Series Graphical™ MultiMeters (GMM) from Fluke. GMM™ test tools pair the world's most advanced multimeter capabilities with graphical display power. You choose *what* information you want to see, and *how* you want to see it. All by turning the simple, multimeter-style rotary knob and pressing the Display Mode button. It'll feel so familiar, yet what you'll see is brand new.

Turn the knob to the function you want, press Display Mode to select waveform display, and you'll see noise, waveform distortion, and intermittent failures — or capture glitches — *automatically*.

Graphical™

Use In-Circuit Component Test to look at component signatures in-circuit, without risking damage to sensitive components. Or let the GMM test tool monitor a test set up, plotting meter readings for up to 30 hours with the TrendGraph™ Display Mode.

With the 860 Series, you'll be using the most accurate handheld meter ever made — 0.025% basic dc accuracy and a 32,000-count (more than 4-2/3 digit) display. All functions offer true IEC 1010-1 Class III 1000V protection. Plus the most comprehensive set of multimeter functions (including capacitance and dB) in a handheld meter. The Dual Display (primary and secondary numeric readings) along with the Analog NeedleGraph™ display, lets you see frequency, pulse width, or duty cycle.

MultiMeters

And you don't have to buy special test leads; one simple set of meter leads supports every function of the fully integrated 860 Series.

Allied Customer Information

Limited Warranty

We hereby certify that these goods were produced in compliance with all applicable requirements of Section 6, 7, and 12 of the Fair Labor Stds. Act as amended and of regulations and orders of the U.S. Dept. of Labor issued under Section 14 thereof. Allied is only acting as a distributor of products manufactured by other companies. Thus, Allied expressly limits its guarantees and warranties for products sold hereunder to those extended and allowed by the manufacturing company to be passed through to Allied's customers. There are no express or implied warranties which extend beyond the description of the face hereof. Allied disclaims and excludes from any sale of products

Welcome All New Customers, Open An Account Today

Allied extends open account privileges to all qualified enterprises that meet our requirements. Allied's terms are net 30 days. Please contact your local representative for detail or fill out the enclosed credit application and mail to the address indicated.

Minimum Order

Minimum order is \$25.00 Mail in orders and credit card orders minimum \$50.00. C.O.D. order minimum is \$50.00 (orders for stock only no back orders).

Sales Tax

Allied Electronics, Inc. is required by law to collect all Federal, State, and Local taxes that apply to your shipment. **If you are exempt from tax, an original signed tax exemption certificate must be mailed to Allied. Without a valid signed tax certificate on file, all applicable taxes will be charged.**

Non-Catalog Items

Merchandise not listed in our catalog, if available from our regular suppliers, is subject to minimum order quantities and/or special handling charges. **Special order products are sold on a non-cancelable basis.**

Scheduled Deliveries/Future Ships

All orders for future scheduled deliveries must be confirmed in writing by Purchase Order with specific delivery information. Any changes in delivery schedules must be in writing and agreed upon by Allied and customer and confirmed. Reductions in quantity may result in a cancellation fee.

International Sales and Services (Export Orders)

Minimum export order is \$50.00. Write **Allied Electronics International Marketing Dept. at 7410 Pebble, Fort Worth, Texas 76118 U.S.A. (Telex 75-8314, Telephone 817/595-3500, FAX 817/595-6444)** for complete information including, price quotations, handling, documentation and shipping.

Terms for payment on export orders are cash or irrevocable letter of credit. Cash orders in U.S. dollars will be accepted for immediate processing. Please include an extra 20% (10% on orders over \$500.00) to cover handling, documentation and shipping charges. We promptly refund any excess of payment over actual charges. Credit terms are available to qualified customers—inquire when placing order.

In some cases, certain items from our suppliers may require a leadtime. To insure faster delivery to you, a divisible letter of credit for two (2) shipments is recommended to allow the majority of your order to be shipped immediately. **All letters of credit must be valid for a minimum of one hundred-fifty (150) days.**

herein any implied warranties of merchantability, or of fitness or suitability for any particular purpose or use. All goods sold by Allied are purchased by the buyer "AS IS." Since Allied cannot control the manner or use of its products after their sale, Allied will not be responsible for any direct, consequential or indirect damages to the purchaser or any third party or ultimate user of the products. Allied will, at its option, either replace the goods sold or refund the purchase price should a product defect be brought to its attention within a reasonable time after sale.

Pricing

Prices shown are subject to change without notice. Orders are billed at the prices in effect at the time of shipment.

Shipping

All shipments are F.O.B. shipping point.

AP0 and FPO Orders

AP0 and FPO shipments will be routed Parcel Post Insured, with maximum size 100 inches (length plus girth) and maximum weight 70 lbs. For faster delivery, specify Priority Mail. To estimate shipping charges contact your local Post Office.

Truck Shipments

Trucks are the most economical way to ship items weighing approximately 50 pounds or more. Shipments weighing between 50 to 99 pounds will be charged at the minimum 100 pound rate as specified by truck carriers. Consult your local agent for truck rates.

Air-Freight Shipments

We will ship your order Air-Freight at your expense if you prefer. Contact your local Air Freight Carrier for Air-Freight charges.

Damaged Shipment

Merchandise shipped is carefully packed in compliance with carrier requirements. Claims for loss or damage in transit must be made with the carrier by the customer. All shipments should be unpacked and inspected immediately upon receipt.

Concealed Loss or Damage. If damage is not discovered until shipment is unpacked, make a request for inspection by the carrier's agent and file claim with the carrier.

Visible Loss or Damage. Any external evidence of loss or damage must be noted on the freight bill or carrier's receipt and signed by the carrier's agent. Failure to do this will result in the carrier refusing to honor the claim. For your protection our billing includes insurance for damage or loss in transit.

Shortages

All claims for shortage or shipment errors must be made **WITHIN 10 DAYS** after receipt of shipment.

Returning Merchandise

If you must return all or part of your order, for a reason other than carrier damage, contact your local representative within 30 days of receipt of shipment. Your local representative will provide the Return Authorization Number (and if any restocking charge is required). Return Authorization Numbers are good for only 30 days. All returned merchandise is subject to inspection prior to any credit being processed, merchandise should be returned in original cartons if possible.

Duracell Long-Life Alkaline Batteries

Extra service and long life. Designed for high drain service applications — outperform, outlast standard operating zinc-carbon batteries by up to 100%. Alkaline cells cost less, too. Compare by dividing the initial costs by the many extra hours of service provided.

Heavy-Duty Plus® Zinc Carbon Batteries

The service capacity of a Heavy Duty battery is not a fixed number of ampere-hours because the battery functions at different efficiencies depending upon the conditions imposed upon it. The service varies with current drain, operating schedule, and cutoff voltage. It is also affected by the operating temperature and storage conditions of the battery prior to use.

Rechargeable NiCad Battery Packs

These replacement battery packs are made up of individual cells that are bonded together and insulated with PVC. They may be stored charged and uncharged. Other configurations are available. Order No. 69485K999 and specify battery type and configuration.

Pure Lead Tin Batteries From Hawker Energy

At high rates of discharge, Hawker Energy's pure-lead tin technology overpowers conventional lead-calcium cells in every category of comparison. Hawker Energy's batteries are smaller, lighter and have a longer service life. They also offer faster recharge, a high discharge rate and are extremely reliable. That superiority means more value for every energy dollar.

You can get pure-lead tin technology only in Cyclon® and Genesis® batteries from Hawker Energy Products. This exceptional technology has been awarded both the *EDN Innovation of the Year* and *The 1993 Missouri Governor's New Product* honors. The advantages of pure-lead tin will enhance your new product design, reduce shipping costs and require less maintenance and far fewer replacements.

These batteries are going to make a powerful difference in your designs.

2 Lithium Batteries

The Keeper II Series - Power On Demand

Power characteristics allow Keeper II batteries to be permanently mounted as long-lasting primary cells for improved total system reliability. No recharge circuits or components needed. Direct mount P.C. Board; no holder required. Features glass to metal seals, hermetic welds, and unique electro-chemistry for a design life of up to ten years. Highest available voltage characteristics; remains flat for the entire battery life. Other features include higher density than comparable batteries, non-pressurized design for nonvented

applications, limited short circuits by internal design, prismatic design for optimum circuit board space utilization, and stainless steel construction for corrosive resistance, hermetic seal, and structural integrity. Short circuits with no adverse effects. Wave solderable within storage temperature limits. Dip solder processable — polarity keyed and pin-outs are 0.1" spacing. Nominal drain rates from -73° to +125°C. UL recognized. Meets Federal shipping regulations.

General Purpose Carbon-Zinc Batteries

Long-life carbon-zinc batteries are most popular for portable power. Available in most standard sizes. For use in industrial, electronic, transistor, and many other applications. Specially sealed to provide protection in handling and against corrosive leakage. Sturdy construction. Long dependable service, even over a wide range of temperatures, plus peak performance at all times.

Rechargeable Nickel-Cadmium Batteries and Chargers

Batteries can be stored charged or uncharged. Capacity of Nickel-Cadmium batteries is expressed in average ampere hours, and stays relatively fixed over a wide range of discharge currents. Rechargeable batteries actually cost less to use per ampere hour than throwaway batteries. End of cycle life is considered to be the point where the battery no longer provides 80% of rated capacity. One hour recharge system available. Call for information.

2 Aluminum Battery Holders

For alkaline, carbon, zinc, mercury, nickel and lithium cells. Brass eyelets are nickel plated. Brass lugs are tin plated. Frame and clip are 2024-ST 4 Aluminum. Moisture proof, resin impregnated, fibre insulating washers. Good electrical contact; low leakage current. Features snap-fit clips.

3 and 6 Volt Lithium Coin Cell Battery Holders

Single Cell Holder (3-Volt). Single and Dual Cell Holders designed for Lithium Coin Cells. An advanced, low profile, coin cell holder for 3 and 6 volts that accommodates 20 to 24mm (dia.) Lithium batteries with 1.6 to 5.0 mm (hts.). Mounts directly to printed circuit boards and features new air-flow design-support legs for easy, safe, flow soldering. Battery insertion is quick and easy. The nickel-plated spring steel contacts have clearly marked polarities. Made of UL approved, glass-filled Nylon, 94V-0.

Dual Cell Holder (6-Volt). Special feature: All holders have the same outside diameter and mounting configurations. This permits change of design to accommodate larger or smaller capacity batteries without altering the PC boards.

Steel Battery Holders

- Corrosion Resistant Nickel Plated
- Moisture Proof Resin Impregnated, Fibre Insulating Washers
- Stainless Steel Contacts
- Ideal For Nid Alkaline, Mercury, Carbon, Zinc and Lithium Cells

Available selection styles accommodate 1 to 4 batteries. Made of rugged, nickel plated steel. Batteries held under constant spring tension for low contact resistance. All contacts fully insulated.

Battery Holders and Clips

Battery Straps

For all standard "9 Volt" batteries (as listed in table below). Corrosion resistant; low electrical contact resistance. Male and female snap contacts are steel, nickel plated. Female contacts are heat treated to spring temper. Maintains constant spring tension. Wires have tinned copper conductors (22 gauge, 7/30 pre-bond with PVC insulation); wire leads firmly soldered to contacts. Rated to 80°C and 300V. Meets U.L. Style 1061.

"9 Volt" Snap-in Battery Holder

For use with standard "9 volt" batteries. Battery snaps in place to insure positive contact. For use where severe shock and vibration occur. Available with standard solder lugs or printed circuit lugs. Aluminum frame; brass hot tin solder and PC lugs; steel nickel plate contacts and clips; resin impregnated fibre insulation.

Universal 9 Volt Battery Holders

- Male-Female Snap-In Terminals Assure Positive Contact and Proper Polarity
- Excellent Spring Retention — Holds Battery In Place
- Withstands Severe Shock and Vibration
- Durable, Rugged Construction
- Operating Temperature Range: -40°C to +130°C
- Impervious to Most Industrial Solvents

With printed circuit terminals or combination quick-disconnect solder lug terminals. Holds any size, any shape, standard 9V battery. Eliminates need to specify an exact battery brand, size or shape. Ideal for power source or memory backup use in minicomputers, telecommunications, data processing, security systems, clocks, radios, toys and appliances. **Body:** Molded from high impact, 30% glass filled nylon. **Terminals:** Brass, tin plated. **Contacts:** Steel, nickel plated, highly corrosion resistant.

PC Battery Clips for "A", "AA", "AAA" and "N" Sizes

Mounts directly to PC Board, eliminating need for wiring. Advanced "Snap-In" design assures sturdy, firm positioning during wave soldering procedure. Clip retains battery securely to withstand shock and vibration. Low profile, space saving and economical. Reliable spring tension assures low contact resistance. **Securely Holds:** Duracell, Eveready, Panasonic, Ray-O-Vac, Sony, Varta, Seiko and other major battery manufacturers.

"A", "AA", "AAA", "AAAA" and "N" Battery Snap-On Clips

- Ideal for Molded Cases
- Self-Anchoring
- Snag Free Battery Insertion
- Low Cost

Clips over panels .060-.070 thick, and is anchored by sharp barbs, eliminating the need for special grooves, slots or holes. Spring tension of contact leg provides excellent contact and takes up any variation of battery length. External solder "ear" will hold wire for easy soldering.

Nickel-Cadmium Batteries

Wide Variety of Cells

- ▶ Standard
- ▶ Rapid Charge "R"
- ▶ High Temperature "H" Memory Backup
- ▶ High Capacity "E"

Features

- ▶ Rechargeable Sealed Nickel-Cadmium Alkaline Cell
- ▶ Long Shelf Life
- ▶ High-Rate Charging
- ▶ Reliable, Self-Sealing Vent

Applications

- ▶ For Cyclic Use
- ▶ For Trickle or Float Charge Use

The most notable characteristic of these batteries is their ability to be repeatedly used for extremely long periods of time (very often more than five years). The perfect portable power source for this age of energy conservation, Ni-Cd batteries retain most of their initial performance throughout their service life and are used in an increasing number of ways and fields, including

factory, office and home automation systems, information network systems, and others. To satisfy these battery requirements, Panasonic places first priority on high product quality to assure high product reliability. Attention to detail is demanded in this severe quality control system that extends from raw and basic materials procurement to parts and even packaging.

* Compact Type.

Lithium Batteries

- ▶ High voltage (3 V)
- ▶ High energy density
- ▶ Long shelf life
- ▶ Stable operation

- ▶ .5% capacity deterioration per year
- ▶ Excellent durability
- ▶ Flat discharge voltage and stable internal impedance

- ▶ High rate discharge
- ▶ Wide operating temperatures
- ▶ Strong leakage resistance
- ▶ Excellent safety

Versatile, long-life Panasonic lithium batteries for leakproof high-energy sources. Designed for a wide range of electronic applications, from cameras and radios to computer memory backup. Safe and chemically and thermally stable. No corrosive liquid or poisonous gas discharge. Two types available: BR (polycarbon monofluoride) provides flat discharge voltage and stable internal impedance. CR (manganese dioxide) gives high discharge rate and high discharge voltage. Panasonic cells are recognized under UL File No. MH12210.

Sealed Lead-Acid Batteries

- High Quality
- Excellent Lead Acid Rechargeable Battery System
- Excellent Deep Discharge Recovery
- Long Service Life — Float or Cyclic
- Starved Electrolyte Leakproof Design
- Maintenance-Free Operation
- 100% Factory Tested
- UL Component Recognition
- No Corrosive Gas Generation
- Use for Portable Equipment
- Charge, Discharge, or Store in any Position
- Use for Power Failure Backup, Emergencies
- No Memory Effect
- Approved as "Dry Cell" for Air Shipment By Dept. of Transportation and IATA
- Popular Video and Cellular Phone Batteries

The LCR-Battery is a new type of sealed lead-acid rechargeable battery system developed by Matsushita Battery Industrial Co., Ltd. The lead-calcium rechargeable (LCR) battery, will stand up to tough operating conditions such as overcharge and deep discharge. In field service, troubles due to abnormal, improper operation or misuse are reduced to a minimum. The LCR battery has stable and reliable capacity. It can be easily maintained to permit proper operation of the equipment that it powers. The battery withstands overcharge, overdischarge, vibration and shock, more readily than competitive products, and is capable of extended storage. To assure this high quality and reliability, **LCR batteries are 100% tested on line for voltage, capacity, and seals, and all vents are 100% visually inspected during the final assembly process.** The LCR battery uses an absorbed

electrolyte system. All of the electrolyte is absorbed into the positive and negative plates, and the separator material. Coupled with the use of special sealing epoxies, tongue and groove case and cover construction, and long-sealing paths for posts and connectors, the LCR batteries have exceptional leak resistance, **and can be used in any position.** These batteries save installation space, while providing full and reliable power for the equipment, and many have been designed for rapid recharge, or for high power output. As a result, this power is used for applications ranging from VCRs to vacuums, electric tools, engine-start, UPS systems and computers. LCR batteries have exceptional deep discharge recovery and charge acceptance, even after deep or prolonged discharge.

Nickel Cell Assemblies

Features

- Sealed leak-proof construction
- Cell uniformity

Power-Sonic nickel-cadmium batteries are also available as cell assemblies and packs. Both cylindrical and button cells may be packaged in any configuration to meet electrical and dimensional requirements.

When specifying battery assemblies, the following information should be given:

- 1) Size and type of cell
- 2) Voltage or number of cells
- 3) Configuration of cells: e.g., 1x4, 2x5, stick, etc.
- 4) Packaging method: taped, shrink-tubing, or molded case
- 5) Termination: button top, solder tabs, or wire leads with or without connectors
- 6) Supply drawing of configurations.

When ordering a replacement battery pack specify voltage or number of cells, ampere-hour capacity or cell size, and dimensions of the pack.

- An operating temperature range
- An operating temperature range

- Sintered plate construction
- Low cell impedance

LINEAR CONFIGURATIONS

TUBULAR CONFIGURATIONS

SLA Battery Chargers

Features

Electronically regulated – current limited chargers for sealed lead-acid type batteries.

Wall mount plug-in design for 1.25 Amp and below, counter top design with input cord for 4 Amp output and above.

Operating temperature range: 32°F to 104°F (0°C to 40°C); suitable for 105-129 VAC, 60 Hz input; voltage regulation $\pm 1.5\%$ for line and load current up to nominal current rating.

LED indicators on "A"-type chargers – one to indicate "POWER ON," the other to indicate "CHARGING MODE" ("ON" to signal high-rate charging, "OFF" to signal float charging).

Hi-impact resistant thermo-plastic housing for 250-1250 series. Metal housing for 300, 800, 4000, 10A series.

Screw-type terminals for 250, 500, and 1250 series, I/O cord for 300, 800, 4000, 10A series.

Economical, Rechargeable Power Combined with the Handling Ease of Dry Batteries

2

Features

- ▶ Sealed/Maintenance-Free
- ▶ High Discharge Rate
- ▶ Economical
- ▶ Wide Operating Temperature Range
- ▶ Design Flexibility
- ▶ Easy Handling
- ▶ Long Shelf Life
- ▶ Rugged Construction
- ▶ Deep Discharge Recovery
- ▶ Compact
- ▶ Long Service Life

Terminal Type

FASTON tabs .187" x .032" mate with AMP, INC. "187" series receptacles or equivalent

Threaded terminal post with nut and bolt terminal both in 5 mm and 6 mm diameter

"250" FASTON, .250" x .032" mate with AMP, INC. "250" series receptacles or equivalent

Polarized positive, .250" x .032", negative, .187" x .032"

Heavy duty flag terminals

Terminated with AMP, INC. part number 1-480318-0 and female pin part number 60619-1

Regulated Power Supply

- Plugs Into 120 VAC House Current
- Powers Your Mobile CB Radio and Other Car Accessories That Use 12 VDC
- Tightly Regulated Voltage Output (Less Than 20 Millivolt Ripple)
- Safe to Use with Mobile CBs, Ham Radios, CD Players, Tape Players or Anything Powered with a Vehicle's DC Electrical System
- UL Listed
- Handy as Bench Power Supply for Electronic Experimenters or Technicians

- Push-to-Reset Circuit Breaker
- LED "On" Indicator
- Massive Heat Sink for Cool Operation
- Rated 2.5 Amps Continuous

U9VL Battery

This unique lithium 9-volt battery is more powerful than any other 9-volt battery in the world. The Ultralife U9VL lasts up to 4 times longer than alkaline 9-volt batteries, 10 times longer than carbon-zinc or NiCd 9-volt batteries. Because it's lithium, the U9VL has every advantage: the highest energy-density, most reliability, longest shelf life (up to 10 years), widest operating temperature range (-40°C to 50°C), and lightest weight. Plus, the U9VL has a patented safety mechanism built in that prevents overheating and leakage due to accidental short circuiting or charging.

Ultralife makes a commitment to total quality in its high-technology lithium energy products. Made in the USA at Ultralife's state-of-the-art automated plant, the U9VL is tested to meet the strictest quality and safety standards. Ultralife batteries even carry the component recognition mark of Underwriters Laboratories (UL) — the benchmark of quality.

Specifications. Width: .674". Height: 1.933". Length: 1.039". Weight: 1.35 oz. **mAh Rating:** 1200. **Primary Applications:** Smoke Detectors, Security Devices, Medical Instruments, Meters, Radios, and Toys.

The U9VL Lithium 9-Volt Battery is the Ultimate Power Source for Wireless Security System Installations

High-Energy Lithium Photo/Computer Batteries

— NEW —

The advanced Ultralife Lithium technology that created the world's longest-lasting 9-volt battery is now available in photographic batteries.

The new high-energy Ultralife Lithium Photo Batteries fit all cameras and flashes that use 3 V or 6 V lithium batteries. They also provide back-up power for many personal computers.

These batteries deliver exceptionally high energy over the widest temperature range. They also have a remarkably long shelf life, staying fresh in storage up to 10 years. And the Ultralife Lithium chemistry is environmentally friendly — 100% free of toxic metals. UL recognized.

 215-0035. UB2CR5.....EACH 6.92

U3VL Battery

The Ultralife U3VL lithium 3-volt battery is ideal for applications requiring a power source with long life, maximum reliability, and minimum maintenance. With state-of-the-art lithium technology, the U3VL packs an incredible 3,600 mAh capacity into a remarkably compact housing (the flat, rectangular U3VL is about the same size as a normal 9-volt battery).

Because it's lithium, the U3VL has not only a tremendous energy density, but also a long shelf life (up to 10 years), a superior operating temperature range (from -40°C all the way up to 50°C), and environmentally friendly components (no mercury or other heavy metals). Plus, lithium is much lighter than alkaline and other chemistries, so it is the best battery to use for weight-critical applications. And lithium has an exceptionally flat voltage profile, so you can count on steady performance.

Specifications. Width: .660". Height: 1.764". Length: 1.017". Weight: 1.23 oz. **mAh Rating:** 3600. **Primary Applications:** Microprocessors, Memory Back-Up, Security Devices and Meters.

The Ultimate Long Life™ Smoke Detector

Your customers can rest easy when they buy a new ULTRALIFE® S100 Smoke and Fire Detector. It offers a six year performance warranty. No other manufacturer comes close to matching it. While other smoke detector manufacturers package their products with the cheapest batteries they can find, only the ULTRALIFE system contains the genuine ULTRALIFE 9-volt Lithium Power Cell. It delivers up to 10 times longer life than ordinary batteries. And up to four times longer life than alkaline batteries.

The new ULTRALIFE Smoke and Fire Detector with the 9-volt ULTRALIFE Lithium Power Cell and six year warranty offers you and your customers the highest security and best value in its calls. Plus it offers all the advanced features your customers expect from a high quality smoke detector.

Specifications. **Detection:** Ionization. **Battery:** 9-volt Lithium Power Cell included. **Battery Life:** Six year limited warranty. **Low Battery Warning:** Up to 30 days. **Quiet Alarm:** Temporarily silences false alarms from fireplace, cigarette, and cooking smoke. **Alarm Level:** 85 dB at 10'. **Alarm Duration:** Continuous while smoke is present. **Missing Battery Indicator:** Cover won't close if battery is removed. **Indicator Light:** Solid state LED flashes every 45 seconds to show alarm is powered. **Test Button:** Tests sensitivity, circuitry, battery, and horn. **Temperature Range:** 40°F to 100°F. **Humidity Range:** 10% to 85% relative humidity.

V-EA Circuit Breakers, DIN Rail Mount

1 Pole

2 Pole

3 Pole

► UL Recognized

UL® Recognized as noted for group applications of motors and other loads in addition to general purpose applications. Altech/ABL SURSUM V-EA miniature DIN rail mount circuit breakers provide an opportunity for major cost and installation time savings and superior circuit protection.

The V-EA provides disconnect, overload protection, fast half-cycle short-circuit protection and current and energy let-through limiting. It is horsepower-rated for AC across-the-line motor starting and ampere-rated for general purpose applications.

Five trip characteristics are UL® Recognized. All trip characteristics are internationally defined and accepted. The "G" characteristic matches USA and Canadian thermal/magnetic trip norms. All rated currents (RC) have the same housing dimensions and terminal sizes. The V-EA can be loaded with full rated current (100% breaker). Recognized with Line/Load reversibility, i.e., power feed can be field or factory wired to the screw-cage clamp terminals at the "top", range 8 AWG to 3 AWG, or at the "bottom", range 18 AWG to 2 AWG. The V-EA/U is intended for OEM industrial applications, and the V-EA/UC is intended for industrial and commercial applications directly under the jurisdiction of USA and Canadian electrical codes.

World Class Approvals

UL® Recognized. UL1077, group and standard circuits, ampere rated at rated current for general purpose applications and horsepower rated for motor control applications, maximum 480Y/277 VAC (480 V phase-to-phase, 277 VAC to ground/neutral) trip characteristics B, C, D, G and Z.

* Locked Rotor Current Rating in lieu of Horsepower Rating. †UL and CSA Pending. Single Phase and "Two Phase" HP for 2 Pole V-EA are greater than or equal to Three Phase HP.

B Characteristic

"B" Thermal 1 hour trip zone 1.13 to 1.45 times V-EA rated current (RC); Magnetic 100 ms trip boundary 3 to 5 times RC. The "B" and "C" characteristics are for special applications requiring magnetic trips at lower overcurrent levels than the "G" or "D". Its thermal trip is delayed more than USA and Canadian norms, which allows less derating in higher temperature applications.

► Pending UL508 Listing

One Pole and One Pole Plus Neutral. Rated current 0.3 A through 4.0 A, interrupt capacity 35 kA at 277 VAC with any upstream branch-circuit protection.

One Pole and One Pole Plus Neutral. Rated currents 5.0 A through 50 A, interrupt capacity 10 kA with upstream branch circuit fuse sized 350 A or less.

Two Pole and Three Pole. Rated currents 0.3 A through 25 A, standard interrupt capacity 10 kA with upstream branch circuit fuse sized maximum four time V-EA rated current, group interrupt capacity 8.7 kA with upstream branch-circuit protection fuse sized 350 A or less.

Pending UL® Recognition. UL 1077, 2 pole and 3 pole rated currents 30 A through 50 A. Expected August 1995.

Pending UL® Listing. UL 508 for Series V-EA/UC, 1 pole, 2 pole and 3 pole, rated currents 0.3 A through 50 A. Expected September 1995.

Pending CSA Certification. CAN/CSA-C22.2 No. 14 for Series V-EA/UC, 1 pole, 2 pole and 3 pole, rated currents 0.3 A through 50 A. Expected October 1995.

International: For various trip characteristics and rated currents, CENELEC/VDE, Germanischer Lloyds, SEV, SEMKO, NEMKO, etc.

V-EA Circuit Breakers, DIN Rail Mount

"G" Characteristic

Magnetic 100 ms trip boundary is at 8 to 10 times rated current (RC) (i.e., hold for at least 100 ms at 8 times RC, trip in less than 100 ms at 10 times RC). At short-circuit currents, the V-EA typically trips in less than 1 ms and clears in less than 8 ms (half-cycle breaker).

Meets USA trip time-versus-current norms. The V-EA-G will thermally trip in about one hour at 125% of its RC, trip in less than one hour at 135% of RC, trip in less than 10 seconds at 600% of RC, hold

for at least one hour at 105% of RC, and carry 100% of RC continuously (all at cold-start from 20°C to 25°C). When at operating temperature the times will be 25% to 50% of those given for cold-starts.

IEC/CEE general industrial trip characteristic. Meets USA and Canadian thermal and magnetic trip norms. It is suitable for most general industrial applications within its ratings. Most CENELEC and Pacific Basin countries are signatories.

"Z" Characteristic

Thermal one hour trip zone 1.05 to 1.35 times rated current (RC); Magnetic 100 ms trip zone 2 to 3 times RC. Semiconductor Protection. The "Z" characteristic is intended for protection of loads that can withstand only very low I²t energy exposure (e.g. some electronic circuits). The

Magnetic trip is very fast. The Thermal trip is the same as the "G" and meets USA, Canadian norms. Trip Curve. Specialty defined characteristic, primarily for Semiconductor protection (test applications).

Accessories

V-EA Touch Protectors

The V-EA protects against electrical shock during manual actuation in accordance with VDE 0106/Part 100 and VDE 0470/Part 1, with "finger safe" terminal-screw heads and "back of hand" safe terminals. If additional "touch" protection is desired, separate touch protector covers can easily be snapped on to the V-EA top and/or bottom terminals.

Lock-Outs

Prevent inadvertent resetting of the V-EA or MA during maintenance. Easily snaps on.

"C" Characteristic

Thermal one hour trip zone 1.13 to 1.45 times V-EA rated current (RC); Magnetic 100 ms trip boundary 5 to 10 times RC. Trip Curve. Secondary CENELEC characteristic for residential and

similar applications. Used for higher-inrush circuits, such as motor loads. As with "B", specify "VDE stamp required" for European residential applications.

"D" Characteristic

Thermal one hour trip zone 1.13 to 1.45 times rated current (RC); Magnetic 100 ms trip boundary 10 to 16 times RC. CENELEC high-inrush industrial. The "D" characteristic meets USA and Canadian magnetic trip norms for high-inrush applications (transformers, high efficiency motors,

etc.) Thermal trips are the same as the "B". Trip Curve. CENELEC industrial curve, particularly for motor and similar applications. No VDE required (not for residential use).

MA Three Phase Adjustable Circuit Breakers — 35 mm DIN Rail Mount

Standard Circuit

Group Circuit

The Altech/ABL SURSUM MA holds through starting and inrush currents of three phase transformers, lighting, power supplies and motors (including the new high efficiency motors) yet provides tight overload protection, fast half-cycle short-circuit protection, and current/energy let-through protection.

The MA is UL 508 Listed and UL® certified to CAN/CSA-C22.2 No. 14 (C-UL) as a manual motor controller with group ratings, and functions as a 3-phase disconnect, overload protector and controller in one compact DIN rail mounted package. It is a thermal/magnetic circuit breaker in the

IEC style with thermal overload trip curves calibrated for USA norms. With the adjustment dial set at the full-load-amps (FLA) of the load, the MA/U cold-start trips in about one hour at an overload of 115% FLA and in less than 10 seconds at 600% FLA, and hot-start trips in less than two minutes at 150% FLA (i.e., Class 10 A overload device). The MA/U is therefore suitable overload protection for all motor applications covered under NFPA70 - National Electrical Code® 430-32 (a)(1), including those with service factors less than 1.15 or temperature rise over 40°C. With screw-cage clamp terminals which accept 18 AWG to 3 AWG wire factory or field, the MA is particularly well suited for group applications and single motor taps under NEC® 430-53 (c) and (d).

FI Earth Leakage Circuit Breakers — 35 mm DIN Rail Mount

Compact DIN rail mount Earth Leakage Circuit Breakers detect and interrupt ground faults. They are VDE approved for the European system of protecting people, animals, equipment and property from dangerous line-to-ground and shock hazard currents.

Trip-capable on decayed line voltage, marked approval of DIN/VDE, marked "Snowflake" temperature range, marked trip sensitivity to pulsed as well as sinusoidal fault currents, integral test circuit, insensitive to vibration, etc.

US applications include ground fault protection of equipment (GFPE) using the 10 mA and 30 mA fault current ratings, especially when high distributed capacitance or other leakage cause excessive nuisance trips at lower fault currents. Applications for the 300 mA rating are equipment protection and fire prevention by limiting the energy of a fault to less than the minimum ignition energy for many materials.

The FI is not intended to repeatedly make/break currents above rated line current. Breaking capacity is 1500 A for rated line currents through 40 A and 2000 A for 63 A line. Limit let-through to 30,000 A's for FI-2 and 80,000 A's for FI-4, or use gL fuses for 10 kA withstand capacity: 16 A line = 63 A fuse; 25 A and 40 A line = 80 A fuse; 63 A line = 100 A fuse.

A Series

VISI-Rocker Circuit Protection

Unique molded-in two-color rocker actuator indicates "tripped" mode when breaker is on or off (per illustrations) series trip, 6-32 threaded mtg. inserts, push on .250 tab terminals. Rated at 250 VAC/65 VDC. Series trip curve-34 (AC-DC tpe) trip point is 135%. Recognized by UL, Inc. and are CSA certified.

BA and CA Series Circuit Breakers

All "B" and "C" series magnetic circuit breakers are recognized by UL, Inc. and are CSA certified and VDE approved.

All products are of a series trip construction, with 6-32 threaded mounting inserts, dual "I-O/ON-OFF" markings on a black toggle actuator, and come with .250" tab (Q.C.) terminals on the "B" series, and 10-32 threaded stud terminals on the "C" series. All units are supplied with an all purpose medium, AC-DC delay curve #34, rated at 227 VAC/65 VDC with trip times as shown below

Percentage of rated current with trip time in seconds: 135%—1.8-100; 200%—.60-20; 400%—.15-3; 600%—.03-1.3; 800%—.004-60; 1000%—.004-1.

B Series

C Series

Model W33 Rocker Thermal Circuit Breaker

Switchable Rocker Actuated Thermal Circuit Breaker in convenient, snap-in mounting. Trip-free operation. Calibrated to continuously carry 100% of rated load. It may trip between 101% and 135% of rated load, but must trip at 135% within 1 hour at +25°C. **Dielectric Strength:** over 2,000 volts RMS. **Maximum Operating Voltages:** 50 VDC, 250 VAC to 400 Hz. **Interrupt Capacity:** 1,000 Amps at 50 VDC; 250 VAC, 60 Hz; 125/250 VAC, 400 Hz; 1,500 amps at 125/250 VAC, 60 Hz. **1/4" Quick-Connect/Solder Terminals.** **International Marking:** I/O. **Poles:** S type, Pole 1 — Switch only; Pole 2 — series trip overload sensing. T type, Poles 1 and 2 — Series Trip Overload Sensing. UL Recognized, CSA Certified. Designed to meet requirements of IEC and VDE.

*120 VAC (Neon with Resistor).

Mini-Mag Hydraulic-Magnetic Circuit Breakers

Rugged construction protects to 30 amps, to 277 volts, 60 Hz AC. Accurately calibrated to carry 100% of rated load and to trip at between 101% and 125% of load. Trip time at 200% of rated load is from 2.2 to 20 seconds. On heavy overloads, a spring-loaded iron piston moves instantly for immediate circuit interruption. Operation unaffected by ambient conditions. Terminals are .250" Quick Disconnect type. **Humidity Resistance:** per MIL-STD-202. **Dielectric Strength:** 1500 VAC 60 Hz. **Reset Time:** instantaneous. **Voltage Drop:** less than 1.5 V at 1 A or more. **Shock and Vibration:** tested per MIL-STD-202. **Operating Temperature:** -40°C to +85°C. **Insulation Resistance:** 100 megs at 500 VDC. Fungus resistant. **Interrupt Capacity:** 5-20A — 5,000 amps; 30A — 2,500 amps. **Shipping Weight:** 2.5 oz. per pole. UL recognized and CSA certified.

Model W23 Pushbutton Circuit Breakers

Single-pole with trip-free mechanism. Overload condition extends button, exposing white band for visible trip indication. Meets MIL-STD: 202, method 106—humidity; 202, method 101, test condition B—salt spray. **Endurance Cycling:** 6000+ at 100% rating, 10,000 mechanical cycles. **Max. Operating Voltages:** 50 VDC; 250 VAC (to 400 Hz). **Weight:** less than 2 oz. UL recognized, CSA certified.

Model W58X Push-To-Reset Type Thermal Circuit Breakers

Here's an economical way to get low current protection. Button extends to indicate overload. **Max. Operating Voltage:** 250 VAC and 50 VDC. Carries 100% of rated load with ultimate trip at 145%. **Tripping Time:** for 1 to 4 amps is 10-45 sec. at 200%; 5 amps and up is 6-30 sec. at 200%. **Dielectric Strength:** over 1500 volts RMS. **Voltage Drop:** less than 1 1/2 volts. **Interrupt Capacity:** 2000 A at 500 VDC, 1000 A at 250 VAC. UL recognized, CSA certified.

Type 140 Fuse Kit

- ▶ 125 and 250 Volt Small Dimension Fuse Assortment
- ▶ Fast Acting and Time Delay Fuses
- ▶ 1/4" x 1 1/4" Fuses
- ▶ In-Line Fuseholders
- ▶ Fuse Clips

Type 140 fuse kit contains the most commonly used fuses. Applications and cross-reference data that comes with the kit helps identify correct fuse replacements. Inventory strips for convenient reordering. 31 different products including: 140 fuses in a range of 1/2 to 30 A, plus 2 fuseholders, fuseclips and one fuse puller. Spaces allow customizing contents by user. Sturdy nylon box with sturdy hinge and positive closure make it ideal for factory or service truck use.

740-9140. Type 140 EACH 145.02

MDA Time-Delay 1/4" x 1 1/4" Fuses

Ceramic body. UL listed, CSA certified through 15 A. UL recognized 20 A.

SMT Subminiature Surface Mount Chip Fuses — NEW —

Bussmann SMT Chip Fuses utilize metal film and ultrasonic wire bond technologies for superior fusing action and enhanced reliability. The fuse element is bonded to a ceramic substrate and encapsulated with glass, providing excellent short circuit performance and environmental integrity. The end terminations are over-plated with nickel and tin-lead. Catalog Symbol: 3216FF. Voltage Rating: 32 VAC, 63 VDC. Interrupting Rating: 50 amp AC/DC. Physical Size: EIA SOCM-3216AC 3.2 × 1.6 × 0.90 mm (0.126 × 0.063 × 0.035"). Agency Approvals: UL Recognized (All Ratings) File E19180, Guide JDX2; CSA Certified (1.5-3 A) File 53787, Class 1422-01; CSA Component Acceptance (250-750 mA, 1 A) File 53787, Class 1422-30. Time Current Characteristics. Fast Acting Fuse: Will carry 100% of rated current for a minimum of 4 hours, and will open within 5 seconds at 250% of rated current.

The 32 Models of the Buss HTB fuseholder offer complete design flexibility. Their reduced size permits maximum space utilization. Their appearance is compatible with aesthetically designed equipment. Designed to UL, CSA and IEC (SEMCO and VDE) standards. The HTB-4 offers high profile while the HTB-2 offers a low profile mounting option. The HTB-6 mounts through rear of panel permitting wire connections to be made to holder before mounting in panel. The HTB-8 provides fast, easy and secure mounting without tools or hardware. Terminal options include in-line or right angle solder 3/16" quick-connect and in-line or right angle 1/4" quick-connect. The HTB will accept both 1/4" x 1/4" and 5 mm x 20 mm fuses simply by changing the carriers. 250 volts.

HFB-HHB In-Line Fuseholders

Both HFB and HHB feature easy assembly. Rated 30 amps, 32 volts. High visibility yellow bodies with raised letters. Accept #12-#18 wires.

HFB for harsh environments—water, salt spray, ultraviolet, ozone—40°C to 150°C temp. range.

HHB universal holder for normal environments. Accepts 1/4" x 7/8", 1/4" x 1" and 1/4" x 1 1/4" fuses.

PC-Tron® PC Board Fuses

The PC-Tron™ subminiature fuse offers high short circuit performance which until now could only be found in much larger glass tube fuses. Due to its unique construction the PC-Tron™ limits the I²t (energy let-thru) to very low levels. .2" lead spacing. Auto insertable. Standard wave soldering technique will not affect performance. Optional socket available. Long lead .75" or Short lead .10" length. Surface mount versions also available.

Interrupting Rating		10,000 amperes @ 125 VAC; ½ — 5 amps 50 amperes @ 250 VAC; ½ — 3 amps

Microtron® Fuses — PC Board

Specifications. Typical opening times: 5 sec. max. @ 250%. Body Material: High temperature plastic with a U.L. 94V0 rating. Lead Pull Force: 7 lb. minimum.

Agency Approvals: U.L.

Recognition and CSA Certification. Units Per Reel: 2500. Packaging: Per E.I.A. Standard RS-296-D. All materials are sulfur free to maintain component solderability. Interrupting Ratings: Up to 5A — 125 VAC - 50A, 125 VDC - 300A; 5.1 - 10A — 60VAC - 50A, 90 VDC - 300A. The Microtron Fuses are designed to safely interrupt 50 amps at 125 VAC. Maximum short circuit current of 300 amps at 125 VAC.

FRN-R and FRS-R Fusetron®
Dual-Element Time-Delay Class R Fuses

These fuses are ideal for use in rejection fuse clips or ordinary fuse clips. Fuses will fit existing fused equipment. Fusetron® fuse has a link element which handles only heavy overloads and short-circuits and a thermal cutout element for light overloads. Interrupting rating of 200,000 amperes rms symmetrical. UL listed, CSA certified.

Fuse Kits

Fuse Kit

Fuse caddy offers an assortment of the most popular industrial 3AG slow blow and regular fuses in an attractive plastic case. Kit contains 15 boxes of 5 fuses each in $\frac{1}{2}$, 1, $1\frac{1}{2}$, 2, 3, and 5 amp. *Slow blow only.

845-9403. Type 094037.....EACH 60.50

Complete Electronic Kit

The most complete circuit protection kit available. Ideal for schools, hospitals, plants, R&D labs, and maintenance departments. Two hundred eighty of our most popular fuses in a wide assortment of 3AG, 2AG, 5 × 20mm glass and 3AB ceramic fuses. Also includes 10 variations of fuse clips, fuse blocks, and panel mount and in-line fuseholders. Packaged in a rugged clear plastic box with cross reference information and inventory strips. Box dimensions $7\frac{3}{4} \times 5\frac{1}{2} \times 1\frac{1}{2}$ " deep.

845-9404. Type 094376.....EACH 342.95

Economy Kit

This kit uses the same case as above but includes 150 of our most popular 3AG and 5 × 20mm fuses and five variations of fuseholders, clips and blocks. This leaves space for the users to fill in with their most popular fuses and holders.

845-9405. Type 094377.....EACH 128.51

Slo Blo® Fuses

Type 3AG. For circuits with high inductive surge. $1\frac{1}{4} \times \frac{1}{4}$ ". Maximum 250V except (†) denotes 32V. **Approvals:** Listed by Underwriters Laboratories and certified by CSA thru 7 amps; Recognized under the components program of Underwriters Laboratories from

PC Mount Kit

This kit also uses the same case as Model 094376 except it contains only PC mountable fuses, fuseholders, fuseblocks, and fuse clips. The kit includes an assortment of 200 picofuses, microfuses, 3AG, 5 × 20mm, and 2AG pigtail fuses. Also included are 10 variations of PC mount fuseholders, fuse blocks, and fuse clips. Perfect kit for engineering departments and R&D labs.

845-9406. Type 094378.....EACH 328.64

Complete Automotive Fuse Kit

The most complete automotive fuse kit available! This kit includes 200 glass, blade and ceramic fuses for use in all American, European and Japanese vehicles. Also included are 10 variations of fuse blocks and in-line fuseholders. This kit is ideal for automotive maintenance departments. Packaged in a sturdy, clear plastic box, $11\frac{1}{8} \times 6\frac{3}{4} \times 1\frac{1}{2}$ " deep.

845-9407. Type 094379.....EACH 79.10

Appliance Service Kit

This kit includes 150 of our most popular fuses used in the appliance market. Also included is an additional assortment of 12 items consisting of appliance switches, indicator lights, fuseholders and fuseblocks. This kit is ideal for the appliance repair industry. Box dimensions are $7\frac{3}{4} \times 5\frac{1}{2} \times 1\frac{1}{2}$ " deep. Extra space is available for adding more items.

The 2AG fuse provides the same performance characteristics as the universal standard 3AG design in less than one-third the space.

These subminiature fuses offer top quality, reliability, and space-saving protection for your new designs. Available with pigtail leads for direct soldering or for use with #111501 mating PCB fuse clips. The 2AG Series is UL and CSA approved.

Flip-Top Shock-Safe Panel Mount Type

Shock-Safe design eliminates any possibility of electrical shock, per IEC Standards 257 and 65. Fuse carrier holds spare fuse for fast, easy fuse replacement and convenient servicing. Low profile design complements modern panels. **Approvals:** Recognized under the Components Program of Underwriters Laboratories and Certified by CSA. (286677 CSA pending). **Specifications.** **Electrical:** Rating — See table below; Insulation Resistance — 10,000 megohm minimum at 500 VDC; Contact Resistance — Less than 0.01 ohm. **Mounting:** Snap-in mounting. No hardware required. Panel thickness range — .032" through

.125". **Molded Parts:** Thermoplastic (UL 94V0) black standard (other colors available as special). **Fuse Carrier:** Springloaded. Unlocks with a press of the finger. Locks into place to prevent accidental circuit interruption. Permanently attached to fuseholder body to prevent loss. Extracts fuse from live terminals. Holds spare fuse. **Terminals:** Copper alloy, tin plate. Accepts quick-connect or solder. **Ambient Temperature:** -40°C to +85°C. **Vibration:** 10-55-10 Hz at .06" double amplitude (Method 201, MIL-STD-202). **Patents:** Patented.

3AB Slo-Blo® Type Fuses

QPL

Ceramic body construction permits higher interrupting ratings and voltage ratings. Ideal for applications where high current loads are expected. 250 Volts. 1/4" x 1 1/4".

Approvals: Listed by Underwriters Laboratories and Certified by CSA from 1/4 through 10 amperes. Recognized under the Components Program of Underwriters Laboratories from 12 through 30 amperes.

Electrical Characteristics: % of Ampere

Rating/Opening Time: 110% — 4 hrs. min., 135% — 1 hr. max., 200% — 5 sec. min.

Subminiature Microfuses

Very fast-acting. Ideal for printed circuits. Features low resistance and high reliability in ultrafast blowing characteristics. **Series 279000** has 1" leads for wiring into circuit. Short circuit interrupting capacity 125 volts, 10,000 amps AC. **Series 273000** has .170 leads for plugging into subminiature fuse holder. **Blowing specifications:** 100%—4 hours minimum; 200%—5 second maximum; transparent glass cap. 125 V rating. UL Recognized. CSA Certified.

PICO II™ Fast-Acting Subminiature Fuses Radial Leads

NOTE: LF and amperage rating are LASER-MARKED on both sides of all non color-coded PICO II™ fuses.

For circuits of 125 V or less with ampere rating of 1/16 to 15. **Blow Time:** 4 hours minimum at 100% (1/16-15 amps); 5 seconds maximum at 200% (1/16-10 amps); 10 seconds maximum at 200% (12-15 amps). **Body Diameter:** .095". **Body Length:** .28". Leads are solder-coated copper, .025" diameter for 1/16-10 A, .032" diameter for 12-15 A. LF and amperage rating laser marked on both sides of fuse. UL Recognized. CSA Certified.

Axial-Lead PICO II™ Subminiature Fuses

251 000 Series
(Non color-coded)

NOTE: Leads are solder-coated copper, .025" diameter for 1/16-10A, .032" diameter for 12-15A.

For subminiature circuit protection where short circuit currents may be as high as 300 amperes. Low resistance values, high-speed action, insulated terminations, encapsulated epoxy-coated body. Will withstand vibrations of 10-55 Hz per method 201 of MIL-STD-202, and of 55-2000 Hz at 10 Gs per method 204, test condition C, of MIL-STD-202, and shock of 100 Gs for 6 milliseconds per method 213, test condition I of MIL-STD-202. **Operating ambient temperature:** -55°C to 125°C. At -55°C current carrying capacity is 110% of rating; at 25°C, 100% of rating; at 125°C, 80% of rating. Fuses will withstand an axial pull of 7 pounds. **Voltage Rating:** 125 V on 1/16-10 amps; 32 V on 12-15 amps. **Body Length:** .280". **Lead Length:** 1.50". **Body Diameter:** .095". **Lead Diameter:** .025" on 1/16-10 amps; .032" on 12-15 amps.

Blown-Fuse Indicating Panel Mount Type For 3AG Fuses

QPL®

Approvals: Recognized under the Components Program of Underwriters Laboratories and Certified by CSA.

Specifications. Electrical: Rated at 20 amperes at lamp voltage as shown below. Dielectric withstanding voltage exceeds 1500 volts. All fuseholders are supplied with a resistor. When designing indicating type fuseholders into a circuit, consideration should be given to the resistance of fractional amperage fuses and the parallel resistance of the indicator lamp and its resistor. **Mounting:** Withstands 15 lb.-in. mounting torque. Maximum panel thickness is .250". **Molded Parts:** Black thermoset (UL 94V0), except lens is thermoplastic (UL 94V2). See Table below for lens color. **Knob:** Bayonet style. **Terminals:** Copper and copper alloy. Tin-plated. **Ambient Temperature:** -40°C to +60°C. **Hardware:** Neoprene washer, lockwasher and hex nut unassembled.

Shock-Safe Fuseholders

For 1/4 x 1/4" fuses. UL recognized and CSA certified (20 A, 300 V). Designed to meet International Electrotechnical Commission specifications 65 and 257. Eliminates any possibility of electrical shock. Terminals accept solder of 3/16" female connector.

Low Profile

Extends to .16" from panel. Screwdriver slot knob.

Stock No.	Mfr.'s Type	Bottom Terminal	EACH		
			1-99	100-499	500-999

International Shock-Safe Fuseholders

Shock-safe design per IEC Standards 65 and 257. Universal fuseholder body accepts 3AG, 5 x 20 mm, and 2AG fuse sizes depending on knob selected. Choice of three terminal styles: dual purpose 3/16" solder/quick-connect, 3/16" NEMA quick-connect, and 1/4" NEMA/DIN quick-connect. UL recognized, CSA certified, VDE approved and SEMKO approved.

Fuses and Fuse Holders

5 × 20 mm Fuses — Low and High Breaking

Fast-acting FSF/SP and time-delay FST/SPT fuses are according to IEC 127. FSF/FST fuses break at 35 A/250 V AC. SP/SPT fuses break at 1500 A/250 V AC. UL recognized (FSF — 100 mA-6.3 A; FST — 125 mA-6.3 A; SP — 500 mA-6.3 A), CSA component acceptance, VDE approved (FSF and FST — 100 mA-6.3 A; SP — 500 mA-6.3 A), SEMKO approved (SPT — 1 A-6.3 A).

Surface Mount Fuse and Holder

OMF 63 V, 125 V and 250 V fast-acting surface mount fuses. OMF 63 V and 125 V blow in less than 10 milliseconds at 400%. Breaking capacity is 50 A AC/DC for the OMF 63 V; 300 A AC/400 A DC for the OMF 125 V. OMF 250 V blows in 300 seconds maximum at 200%. Breaking capacity is 100 A/250 V AC/DC. Made from UL 94V-0 thermoplastic for reflow, vapor-phase and wave soldering. Available in bulk (100 pcs.) OMH 125 V 031.7701.11 and 250 V 031.7702.11 fuseholder optional.

Stackable Plastic Frame Cabinets

Series 2000. Stackable storage cabinets feature see-through styrene drawers, a polystyrene frame, pedestal base and recessed tray tops for stacking, and keyhole slots for wall mounting. Drawers have stop-tabs to prevent content spillage and come with dividers. Frame is lightweight, virtually unbreakable. **Dimensions:** 18 1/4 x 8 5/8 x 6 3/8".

Stock No.	Mfr.'s Type	No. of Drawers	Storage Capacity	EACH

Industrial TK Series Enclosures

High Cover

Standard Gray Cover

Transparent Cover

Smooth Sidewalls

Sidewalls with Knockouts

Whenever electrical and electronic components need to be housed in dustproof and watertight, completely insulated and corrosion-free enclosures, Altech/Spelsberg TK series enclosures offer solutions. Enhance the value of your products with their appealing design

in a variety of sizes with standard gray or transparent covers in different heights. The exceptional possibilities of subsequent processing (drilling, milling, bonding, lacquering, fitting components) permit virtually all special requirements to be met.

DIN Rail Mount Enclosures

"Get the international look." Package your products and devices in attractive enclosures that come complete with four to 144 ready-to-wire terminals and integral PC board guides. Terminal-to-board connections can be made by wire jumpers, solder tabs and, on some enclosures, with card edge connectors or machine solderable terminals to reduce production time. These enclosures can be easily customized with logos or other imprints. Internationally accepted, they are molded of UL 94V0 materials.

K70

- 6 to 32 Terminals
- Housing Material: Polycarbonate
- Cover Material: ABS
- Standard Color: Gray
- Terminals Rated to 25A (Pluggable to 10A)
- Terminal Covers Optional

Cost effective kits have snap-on covers for easy insertion and removal of PC boards. Pressure plate terminals, fixed and pluggable terminal-to-board connections.

K04070

- 4 to 6 Cage Clamp Terminals
- Housing Material: Polyamide
- Standard Color: Gray
- Terminals Rated to 16A
- Extended Length Pins Available

Compact, cost-effective snap together kits. Removable cage clamp terminals with dual solder pins are machine solderable. Horizontal and vertical PC board positions. Funnel shaped wire entries.

KU4080

- 8 to 64 Terminals
- Integral Printed Circuit Board Guides
- Housing Material: Polycarbonate
- Standard Color: Gray
- Terminals Rated to 10A

Versatile enclosures provide ample internal space for wiring and electronic components. Kits consist of snap-in double level terminals, cover and base, with integral PC board guides. Machine solderable pins, pressure plate terminals. Fit standard 45mm DIN cutout in larger enclosures like Altech's EK Series nonmetallic enclosures.

Slanted Series Electronic Enclosures

Convenient, easy to customize small ABS enclosure with a slanted top in two designs and three bottom heights. Style A has a 15° and Style B has an 8° inclination. Top and bottom shells are joined by four self-cutting screws. Multiple mounting provisions for PC boards are provided. The inclined top surface is recessed to accept an aluminum panel of up to 1 mm (.04") thickness. **Standard Color: Gray.**

Aluminum Series Electronic Enclosures

Small to medium size enclosures made of aluminum sheet metal, consisting of an anodized aluminum base with integral front and back panels and a black aluminum cover with integral front and side walls. The base and cover are joined together with four self-cutting screws on both front and back. Supplied as a kit, including screws. Surfaces are protected with a peel-off film.

EMI/RFI Series Electronic Enclosures

Use for RF frequency components such as filters, amplifiers, receivers, etc. and to keep radiation close to its source. ER-371 to ER-374 include dividers and have snap-on covers. ER-433 to ER-454 have deep drawn bottom shells and are used to hermetically seal RF emitting components. Cover is loose fitting, use adhesive or potting compound to attach securely. Both series are made of hot tin plated sheet metal.

Altech/Teko plastic enclosures can be used for many applications. Screws are used on most designs to join top and bottom shells for stability, and to eliminate the possibility of

breaking interlocking pins. Open anytime without damaging the enclosure. Customization is easy.

Top Cover Electronic Enclosures

3

Consist of ABS base, with integral printed circuit board guides and a cover which is mounted with four screws. ABS or aluminum covers. Supplied as kits.

Front Panel Series Electronic Enclosures

- Standard Color: Gray; Black Available
- Non-Skid Feet

Consists of two ABS half shells plus front and rear 1 mm (.04") thick aluminum panels which are inserted vertically. Enclosures are complete with molded in PC board guides and four PC board mounting provisions. Assembled with two self-cutting screws. Supplied as a complete kit with protective covers on aluminum surface. Some FP Series enclosures are equipped with a battery compartment. Easy to customize.

Mini Pocket Series Electronic Enclosures

Available in three sizes with up to four push buttons with or without a clear front panel for infrared signals or a clear top plastic readout. Choose from gray or black ABS housings with blue, red or yellow pushbuttons. Two half shells assembled with one self-cutting screw. Styles 1 and 3 have four internal mounting provisions for PC boards. Stainless Steel clips are available.

Seal cable entries and keep contaminants such as liquids, gases and solid materials from entering into enclosures. Provide strain relief to reduce stress on components and termination points. Available in

Polyamide (PA) and Nickel Plated Brass (BN). For additional functions and colors, please contact Altech directly.

Standard Liquid Tight Strain Reliefs

Suitable for most applications, widely used.

Straight-Through

Polyamide (PA)

- ▶ PG7 to PG48 and NPT3/8" to NPT3/4" Sizes with Integral Sealing Ridges
- ▶ PG29 to PG48 Sizes Have an Additional Preinstalled Polyethylene Seal Ring
- ▶ Standard Color: Light Gray

Nickel Plated Brass (BN)

- ▶ Preinstalled Perbunan (P) Seal Ring (O-Ring)

Cord Grips, Polyamide (PA) with Neoprene (NE) Sealing Sleeve

Inclined and Upright Cabinet Racks

Series 2000 Inclined Panel Cabinet Racks

Series 2000 Inclined Panel Racks are similar to the upright models in style and construction and can be used in conjunction with them. The front is divided into upright and 20° inclined panel space. Two pairs of fully adjustable mounting rails are in the front upright and sloping panel area, and one pair in the rear. 24" panel space racks available on special request. Be sure to ask about our console availability using Bud Wedges and Add-A-Racks. We'll be happy to help you design the proper configuration. Available in Royal Blue (RB) or Gray textured (GT).

Series 2000 Upright Cabinet Racks

- ▶ 14 Gauge Welded Steel Frame
- ▶ Sides Removable From Inside
- ▶ Rear Door Included
- ▶ Steel and Plexiglass Front Door Available: Order Separately
- ▶ Open Bottom
- ▶ 2 Pair Adjustable Panel Mounting Rails Included
- ▶ Finish: Royal Blue (RB) or Gray Textured (GT)
- ▶ Available in 8 Panel Heights and 3 Depths; Inclined Panel Racks Also Available
- ▶ Add-A-Rack Available

Here are electronic enclosures that do more than house equipment. The sheer square line of the Series 2000, its symmetrical styling is the result of experience and perception Bud designers have. All Series 2000 cabinet racks include welded frame and base, sides, top and rear door (louvered sides also available from factory).

Add-A-Rack System

For Series 60, Series 30 and Series 2000 Cabinet Racks

Used to combine two or more enclosures into one integral system. **Design Features.** Assembly consists of a welded frame, top, bottom and rear door. Aluminum extrusions are included for Series 2000. **Bonus Features.** The advantage of using this system is economy. When developing a band of enclosures, costs can be dramatically reduced by using one complete unit and several Add-A-Rack assemblies to obtain the optimum width. **Finishes:** Order the same color as the cabinet rack.

All American Rack

- ▶ 14 Gauge Welded Steel Frame
- ▶ Sides Removable From Outside, No Screws
- ▶ Rear Door Included
- ▶ Steel and Plexiglass Front Door Available: Order Separately
- ▶ Open Bottom
- ▶ 2 Pair Adjustable Panel Mounting Rails Included
- ▶ Finish: White Textured Frame With Sand Textured Sides, Rear Door, and Top
- ▶ Available in 5 Panel Heights and 2 Depths
- ▶ Add-A-Rack Available

The All-American Rack features a unique combination of steel and aluminum components which provide an optimum blend of strength and economy. The frame is constructed of heavy-duty aluminum extrusions with die-cast aluminum corner brackets and steel supports. The sides, top and doors can be removed from the outside in seconds to provide complete interior accessibility. Available in five panel heights and a choice of 24" or 30" depths, the All-American Rack also offers a wide range of accessories including plexiglass doors for front or rear. An Add-A-Rack system, used to combine two or more racks into one integral system, is also available. For complete engineering data, Form No. AA-87, and to order, contact your local Allied facility.

Classic II Portable Cabinets

Whether used independently or as a companion to the Classic II cabinet rack, the design of this distinctive cabinet harmonizes perfectly with the most sophisticated systems. While it's portable, it is equally effective for permanent installations. **Design Features:** Top, bottom and side panels .060 aluminum. Frame, 6063-T5 aluminum extrusions. Accommodates 19" panels. Doors and panels not included but are available. 1/8" aluminum alloy doors attach to mounting rails. Black thermoplastic flush-type latch. **Bonus Features:** Recessed brushed chrome handles are attached to two steel flanges extending the length of the cabinet. This added support assures carrying safety. Two 16 gauge steel vertically adjustable chassis supports included. Shipped completely assembled. Finishes: Royal Blue (RB) or Gray Textured (GT)).

Telecom/Open Relay Racks

Ideal for installations where easy access to components is a top priority. Each built for years of solid, trouble-free service, as well as obvious ease of service where frequency attention is desired (i.e. telephone switching systems, etc.)

RR-1263 Series

Design Features: Exceptionally strong structure made up of chassis-type base and supporting angles. Uprights, 7/8"; steel channels, 3" deep; top plate, 1 1/8" x 3 1/8". Rails tapped 10-32 on E.I.A. universal spacing. Base is 19 3/8" x 22" and drilled for RC-7758 casters. Shipped knocked down. Finishes: Metallic gray (MG) and black textured (BT).

Deluxe Relay Racks

Versatile, economical enclosures house a wide range of electronic equipment and control system. **Design Features:** Well-ventilated racks take 19" panels. Rear door has two black thermoplastic catches. If casters are required, specify RC-7758. Top, bottom, sides and rear door, 16 gauge steel. Shipped knocked down. **Bonus Features:** Contoured front vertical members include 7/8" panel mounting supports drilled and tapped 10-32 on E.I.A. universal spacing. Finishes: Royal blue textured (RB) and metallic gray (MG).

Wall Mount Relay Rack

These racks provide open relay and distribution rack provisions when floor mounting space is not available. They feature 19" wide panel space, with mounting holes tapped with #12-24 thread on EIA universal spacing on both front and rear flanges, and are constructed of standard natural finish aluminum with heavy gauge aluminum wall mounting brackets. Includes all assembly and panel mounting hardware except for wall attachment fasteners.

The Stylist Cabinets

Heavy-Load-Bearing Cabinets
Decorative aluminum extrusion trim with black insert frames the front of the cleanly designed cabinet. Square corners enhance the unit's contemporary styling and, in turn, enhance the appearance and marketability of your product. **Design Features.** 16 gauge steel. Rear fitted with louvered panel; 13 1/4" high opening for cable access. Front and rear openings accept 19" panels or Stylist doors. Self-adhesive feet furnished. **Bonus Features.** Full-width box flanges at top and bottom eliminate tilt and sway even when unit is loaded to its full 500-pound capacity. Cold-rolled steel structure is self supporting, no internal framework. Bustle-type door allows placement of panel behind door for meters, knobs, etc. **Finishes:** Royal blue textured (RB) or gray textured (GT).

Rak•Mount Chassis

- ▶ Front Panels: 1/8" Thick Mill Finish Aluminum With "Surface Shield" Protection
- ▶ Side and Rear Panels: .090" Aluminum
- ▶ Finish: Natural; Other Finishes Available On Request
- ▶ Shipped Unassembled With All Necessary Assembly Hardware

Side Panel mounting holes are punched on 7/8" grid to allow total flexibility in mounting of components. Rear Panel is fully adjustable from front to rear. Standard 19" Front Panels feature "Surface Shield" protection which provides surface for laying out drilling and punching protection which provides surface for laying out drilling and punching positions. **Optional Accessories.** Internal Chassis — .090" aluminum, natural finish. Can be mounted vertically or horizontally. Handles — chrome plated steel. Solid top or bottom cover — .050" aluminum, natural finish. Can also be used on bottom as full depth chassis for mounting components. Ventilated top or bottom cover — .050" aluminum, natural finish, 1/8" x 3/4" slots for maximum ventilation. Slides — two-piece slide, 20" long with 15" travel. Friction disconnect allows removal of chassis from cabinet or rack. Supplied in pairs, order mounting brackets separately.

"Valu/Line" Series

Combines innovative engineering techniques with styling that is both classic and contemporary. Priced surprisingly low. May be used as an independent enclosure or in a standard EIA 19" cabinet rack. Adhesive paper protective covering of the .090" brushed aluminum panels provides an excellent surface for indicating position when drilling or punching panel areas. Base, rear and top are .050" aluminum with smooth white enamel finish. Sides are .090" aluminum with white textured enamel. Unassembled unit includes two separate detachable rack mounting brackets and rubber feet.

Aluminum 2-Piece Miniboxes

Self-contained units for use where shielding as well as protection from dust and dirt is desired. May be used for phono amplifiers, VHF and UHF converters, low-pass TVI filters, test and measurement units, etc. Two-piece construction permits installation of components or wiring modifications. Flanges assure low RF leakage and provide high rigidity. Choice of snap-lock fastening or screw fastening; all hardware supplied. Made of high-quality aluminum—Smooth Gray (SG) or Natural Finish (NF). Easy to cut, punch and drill.

Special Capabilities for Custom Enclosures

When precision products need to look their innovative best, take a look at Bud. High quality special enclosures create a distinctively functional advantage for sophisticated technical products. Bud, the best known and most preferred line of standard cabinets and enclosures for the electronics industry, has some very special fabrication capabilities that make unique products look as good as they perform.

The Bud reputation for customer service means more than quality products. From design assistance through fabrication and finishing to silk screening and engraving, Bud concentrates of the efficient, economical solution to unique application problems. Bud, the single source for factory value added, extends the industry's finest service policy through a national network of trained sales representatives and Allied. When precision products need to look their innovative best, depend on Bud.

Custom fabrication is standard at Bud. With nearly 3000 standard products in the Bud line, many times our engineers can modify a standard enclosure to meet your special needs. This can even further reduce costs and speed delivery. And, with Bud's extensive tool and die inventory, customers rarely pay tooling charges normally associated with custom fabrication.

Econoboxes

Versatile die-cast utility boxes for applications requiring a sturdy structure. Especially desirable for concealed or other interior use where safety enclosure is required. Feature close-fitting flanged lids fastened to bosses in the body. The close fit of the lids and the thickness of the aluminum alloy combine to provide excellent screening properties. Cast of LM-380 aluminum.

Tilt-A-View Cabinets

Present selective angles of viewing for accurate reading of meters, dials and recorders. Viewpoints are obtained with the slanted front face and vertical rear face. The 2" detachable legs allow changing the position of the cabinet to a desired angle. Two-piece 18-gauge steel construction. Lower and upper portions of cabinet fastened with sheet metal screws. Gray textured cover (GT) with white textured body (WH).

Econocab

— NEW —

Low-Cost Cabinets

This new portable cabinet offers the same built-in quality as other Bud cabinets at economy pricing not found anywhere else in the industry. **Design Features.** All welded 18 gauge steel construction. Stationary panel mounting rails resulting in a 14.5" clear inside depth. Accepts standard 19" wide panels. Available in 5 panel space heights. Snap-in handles, feet and all panel mounting hardware are included. **Finish:** Standard finishes are black textured (BT) or sand textured (S). Special colors are available on request.

Small Portable Cabinets

Fig. A

Fig. B

Fig. C

Fig. A. The Showcase. The design of this Bud unit makes it perfect for your portable instrumentation, yet the versatile, lightweight Showcase will do an effective job as a desktop instrument case, in systems or racks. Compounding its versatility is the fact that the Showcase comes in 10 sizes. **Design Features.** Top, sides and bottom, .050 aluminum; front panel, .090; rear panel, .050. Extruded aluminum frame. Side gussets provide added strength. Strong, flexible handle is recessed and secured firmly into top for safe handling. Ventilation slots under handle. **Bonus Features.** Use with chassis or PC boards. Front panel and chassis may be loaded from front or rear. Comes with front and rear panels and bail. **Finishes:** Two color combinations — black textured (BT) body with white frame or royal blue textured (RB) with white frame. Indicate color when ordering.

Fig. B. The TR Series. With the TR, you'll give your instrumentation a look that sets it far apart from the conventional. Its styling and versatility makes the TR ideal for your application whether it be a portable enclosure, a desk top instrument case or in systems. **Design Features.** Top and bottom, .050 aluminum; front panel, .090 aluminum. Extruded aluminum frame. Corner gussets for added support. Carrying handle may be used as tilting bail. Front panel, self-adhesive rubber feet and handle/bail included. **Bonus Features.** Since chassis is reversible, two configurations are possible with one unit. Top and bottom easily removed for access to dust-free interior. Will accommodate an accessory chassis or 1/16" thick PC boards. **Finish:** Royal Blue textured (RB) body with white frame, and bail.

Contempo Series Small Cabinets

Small Cabinets

Here's a versatile line of Bud enclosures you can use for any number of applications, and their versatility is equalled by functional, modern styling. **Design Features.** Body, .062 aluminum; end panels, 9/16" molded cycloc plastic. **Bonus Features.** 22 sizes in four styles. Supplied with tie-bar, screws and four self-adhesive rubber feet. Top slides into grooves in end panels and is secured with two screws. Black plastic filler supplied on model IV only. **Finish:** The letter "B" in the prefix designates black pebble end panels with smooth gray body. The letter "W" in the prefix designates woodgrain finish on end panels and top, with smooth eggshell white body.

Plasticase

Offering 3 styles and 10 sizes of these sturdy enclosures constructed of high quality impact resistant ABS material. Molded-in card guides—Styles A and B—and mounting bosses—all styles—provide a variety of mounting options. Housing design allows complete accessibility to internal components.

Design Features for Styles A and B

- Impact Resistant ABS
- Molded-In Card Guides and Mounting Bosses
- Easy to Assemble—Comes complete with stainless steel screws and rubber feet
- Finish—Double-textured PC Bone Gray
- Shipped Assembled

PlastiBox

Available in 3 styles and a variety of sizes, these functional utility enclosures are made from UL rated high-impact ABS with scratch resistant finish. All PlastiBox models come with vertical card guides and are bossed for mounting horizontal circuit cards.

Three styles are offered to meet your specific needs:

- Textured body with smooth top for silk screening capabilities—Prefix PS
- Textured body with textured top—Prefix PT
- Textured body with smooth top and 9-volt battery compartment—Prefix PBS

NEMA 4X Sealed Polycarbonate and ABS Enclosures

- Designed to IP 65 of IEC 529 and NEMA 4X
- Wall Mounting Holes and Cover Attaching Screws are Outside the Sealing Area, Preventing Ingress of Moisture and Dust
- Internal Bosses Allow Mounting of PCBs Horizontally or for Connection of Terminals, etc., into Threaded Brass Inserts
- Internal Guide Slots for Mounting PCB Assemblies Vertically

These polycarbonate and high-impact ABS molded enclosures meet NEMA 4X specifications and are ideal for use in the electrical and electronic industries. Available in six sizes, these molded enclosures are offered in three different versions:

- Light Gray Polycarbonate Body and Clear Polycarbonate Cover
- Light Gray Polycarbonate Body and Cover

Polycarbonate, an engineering thermoplastic, features good electrical insulation and heat resistance. The high-impact ABS material is easily drilled and punched. These enclosures are ideal for circuit enclosures and junction boxes. Wall Thickness: .118".

- Dark Gray ABS Body and Cover

Polystyrene and ABS Molded Enclosures

- Designed to IP 54 of IEC 529
- Two Part Design with Tongue and Groove Joint Between Top and Bottom Covers and Specially Designed End Panels of the Same Material
- Internal Guide Slots Provided for Vertical Mounting of PCBs
- Internal Bosses Provided for Horizontal Mounting of PCBs
- Top and Bottom Covers are Lightly Textured Providing a Scratch-Resistant, High Quality Finish

This line of molded enclosures is ideally suited for instrumentation and telecommunications equipment from hand-held to desk top sizes. Available in twelve sizes in either high-impact Polystyrene, which is flame retardant to UL94-V0, or high-impact ABS.

Sealed Die-Cast Aluminum Enclosures

- Designed to IP 65 of IEC 529 and NEMA 4
- Wall Mounting Holes and Cover Attaching Screws are Outside the Sealing Area thus Preventing Ingress of Moisture and Dust
- Cover Incorporates a Recessed Neoprene Gasket
- Internal Guide Slots for Mounting PCB Assemblies Vertically
- Internal Bosses for Mounting PCBs Horizontally or for Connecting Terminals, Ground, etc
- Screw Holes for Cover Mounting are Roll Threaded and Screws are Captivated and Recessed

Die cast in aluminum alloy and resistant to atmospheric and marine corrosion, these enclosures are ideal for housing sensitive electronic assemblies and pneumatic, hydraulic and electrical devices in both commercial and industrial environments. Specifications. Body and Cover: Aluminum Alloy #A380. Gasket: Neoprene. Cover Screws: M-4 Stainless Steel, non-magnetic. Ground Screw and Washer: Copper-plated. Finish: Natural finish or Gray (add suffix G).

Accessories

Power Outlet Strips Rackmount

- 15 Foot Black 14/3 SJT Power Cord
- 15 AMP, 125 Volt Rating
- Combination On/Off Switch and Pilot Light on Front Panel
- Black Painted Steel Housing
- 1.75" High x 2.37" Deep x 19.00" Wide Panel Space
- Meets UL Standard 1363
- Surge Protected Models also Meet UL Standard 1449

Designed for 19" panel space open relay racks and enclosed cabinet racks, these units are easily installed to the panel mounting surface of the racks. They provide instant power distribution from either the front or rear of the unit.

Plastic Enclosures, Potting Boxes and Aluminum Chassis

Bud Plastic Enclosures—The Utilibox Series

Bud's Utilibox Series is the ultimate value in plastic utility boxes. Now available in 3 styles and 13 sizes.

Style A

- ▶ KJB Cylolac Thermoplastic with Flammability Rating of 94-V0 at .080" Thickness and Continuous Use Temperature of 70°C
- ▶ Card Guides Accept .062" Thick Cards
- ▶ Comes with Close Fitting Interlocking Lid and Assembly Hardware
- ▶ Finish—Black Is Standard; Special Colors and Finishes Are Available Upon Request

Dimensions are ±.010".

With Mounting Brackets

Two styles of mounting brackets, depending on size of Utilibox needed. To order, add Suffix-MB to Utilibox catalog number. Brackets are fastened to Utilibox at the factory and shipped as one

Style B

- ▶ Impact Resistant ABS
- ▶ Cover Panel, .050" Aluminum
- ▶ Card Guides Spaced at .53" Centers Allow Flexibility of Component Placement or Creation of Compartments for Potting; Guides Accept .062" Thick Cards
- ▶ Finish—Black Body with Anodized Aluminum Cover Panel
- ▶ Shipped Assembled

Optional molded-in mounting brackets are available for all sizes of Style C. To order, add suffix-MB to catalog number.

Aluminum Chassis

Offer outstanding strength and rigidity for construction of amplifiers, meters and other components. Made from one piece of sheet metal. Welded on government-approved spot welders developed for aluminum. All sides folded in at the bottom for additional support assuring strength and durability. Natural finish aluminum alloy 5005 H-14. .040 Aluminum.

Blowers

Design Features. Panel heights: 3 1/2", 5 1/4" and 7". All units are 19" panel width with standard EIA notching for rack mounting. Dust filters removed through front panel, no tools needed. All U.L. approved. Guaranteed for 20,000 hours continuous service. 115 volts.

Model B-23A: Two-speed blower requires minimum panel space. Pressurizes or evacuates cabinet as desired. 1400/1150 RPM, 150/60 watt-shaded pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 18 lbs.

Model B-25A: Two-speed motor delivers turbulent air distribution to eliminate hot spots in cabinet. Recommended for minimum back pressure. 1135/675 RPM, 410/225 watt-shaded pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 30 lbs.

Model B-27A: Two-speed packaged blower. Noise level lower than found in comparable models with equal CFM. Recommended for use where densely packed electronic components require maximum cooling. 1350/850 RPM, 580/370 watt-shaded pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 34 lbs.

Model B-52: Designed for applications requiring higher back pressure. Two extra-wide, small-diameter centrifugal blower wheels supply a large volume of clean filtered air to pressurize enclosure. 3000 RPM shaded-pole motor. 70 watts. Permanently lubricated ball-bearings. 24" long, 2-wire power cord. 16 lbs.

Model B-54: Quiet, efficient with dual, slow-speed, low-velocity centrifugal blower wheels. Noise level below average DB level found in most business offices. 1550 RPM, fan-cooled, rubber-mounted 95 watt shaded-pole motor. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 22 lbs.

Model B-50: Requires only 3 1/2" panel height. Low audible noise level. Air stream delivered vertically through a 12 1/2" wide opening. Air velocity and pressure cool densely packed electronic equipment. 3100 RPM shaded-pole motor. 80 watts. Permanently lubricated ball-bearings. 24" long, 3-wire power cord. 13 lbs.

Fan Tray Assembly

Fan Tray Assembly — FT-1170. Includes 9-position fan tray with preassembled front panel; a 9-outlet daisy chain cord and 6-foot power cord; adjustable support angles. **Materials:** Fan tray and support angles — 16-gauge steel; front panel — 12-gauge steel. **Finish:** Fan Tray, front panel, white textured (WH) or metallic gray (MG).

Fans — FN-1280. Order separately. Can be mounted in any pattern to suit individual cooling requirements. Each fan supplied with one hardware cloth finger guard. **Specifications:** 110-volt, AC; 105 CFM; -20°C to +60°C temperature range; UL approved. Optional Wire Form Finger Guard — FG-1281.

Accessories — Tem-Stat Temperature Controls

Prevent shut-downs caused by over-heating of electronic or electrical equipment in enclosures. Units react quickly to gradual or sudden temperature changes. **TS-15:** Contacts close when temperature reaches designated setting. Contacts remain closed until there is a 10° ±5°F drop in temperature. **TS-22:** Contacts open when temperature reaches designated setting. Contacts remain open until there is a 10° ±5°F drop in temperature. Can also be used for temperature control in convection and radiant heating applications. U.L. and C.S.A. listed. **Temperature Range:** 80° - 170°F. **Temperature Accuracy:** ±8°F.

Molded Plastic Cases and Matching Plastic Covers for Mounting Test Equipment. Meters Fit into Cases with Flanges. Engineering Drawing Available Upon Request.

- ▶ Satin Finish
- ▶ Available in Flame Retardant ABS (An Improved Thermoplastic with a Flammability Rating of 94 V-0 at .058")
- ▶ Four Plain Holes for Self Tapping Screws
- ▶ Partitions: Guides Can Be Used for Partitioning of Electric Components
- ▶ Printed Circuit Boards (for Model 225): Two Guides on Long Side; One Guide on Short Side; Guides Accept .062" Thick Cards
- ▶ Printed Circuit Boards (for Model 250): Three Guides on Long Side; Two Guides on Short Side; Guides Accept .062" Thick Cards
- ▶ Typical Wall Thickness: .080"

Flame Retardant ABS Boxes

- Carries A UL Flammability Rating Of 94 V-0 At 1.47 mm Thickness and A Continuous Use Temperature Rating Of 60°C
- Comes In Colors: Blue, Black, Gray, and Beige
- Interlocking Flange On The Lid
- Comes With M3 $\times$.5 $\times$ 10 mm, Phillips Head Screws, Countersunk Lid, and Tapped Integral Brass Bushings
- Integral Card Guides Accept .062" P.C. Cards
- Cat. No. 1591E Has Removable Center Brace
- Comes With FRABS Lid In Matching Color. Optional Clear Plastic Or Metal Lids Are Available
- EMI/RFI Shielding Factory Stock In Black
- Lid Adds 4.0 mm/.156" To Overall Height

1599 Hand Held Plastics

- Molded In a Flame Retardant ABS High Impact Plastic — Meets UL 94 V-0. Finish Is a Light Texture to Resist Scratching. Available In Black or Gray
- Includes Integral Brass Inserts and Machine Screws (M3 Slot Head). This Provides Extra Strength for Repeated Assembly and Disassembly
- Recessed Top Panel Ideal for Membrane Display
- Extra Deep Top and Ultra Shallow Base Designed to Both Enhance Aesthetics and Improve Flexibility
- Twelve PCB Bosses (Six In Both Top and Bottom) and Vertical Mounting Slots Are Molded In

Diecast Aluminum Enclosures

1590 Diecast Aluminum Boxes

These diecast aluminum alloy boxes with tumbled surface come drilled and tapped with countersunk lid and four 6-32 x 1/2 Phillips screws (models "D" and "E" have two additional center posts and six screws). These boxes are excellent for RF/audio connectors because of their RF shielding capabilities due to an interlocking flange in the lid. The aluminum alloy allows for easy drilling and punching with the durability of metal.

Contempra II Electronic Rack Systems, Economy Racks, Relay Racks and Accessories

Economy Racks

A knock-down cabinet that couldn't be simpler to assemble — only one bolt in each corner locks the cabinet sides to the top or bottom. The strength comes from the interlocking structure. The two combination panel-accessory rails are fully adjustable. Four adjustable leveling glides are standard on all models. All cabinets are shipped complete except for front and back doors or panels. **Color:** GY2 gray or CG1 contempra gray. **Depth:** 24.5".

Series 2000 Single Door Enclosures

- Machine Tool Control Transformers Available; See Transformer Section

NEMA 2000

The Series 2000 enclosure offers the latest in enclosure technology and design for improved aesthetics, convenience and value. Available in two finishes, these enclosures provide flexibility for electrical and electronic applications with UL and CSA listings. Perfect for equipment protection from dust, oil, water and other contaminants. Simply pick the series that matches your protection level. Available in 304 stainless steel from the factory.

NEMA Type Enclosures and Nema Wallmount Enclosures

PJ Series Non-Metallic Enclosures NEMA Type 4, 4X

- Application**
- Designed To Insulate and House Electrical and Electronic Controls, Instruments Or Components
 - Protects From Dirt, Dust, Oil and Water
- Construction**
- Strong Molded Fiberglass Reinforced Polyester Construction With Matching Cover
 - Continuous Stainless Steel Hinge Where Provided
 - Captive Stainless Steel Cover Screws
 - Stainless Steel Wall Mounting Hardware Included
- Especially Well Suited To Higher Temperature Or Corrosive Environments
- Machine Tool Control Transformers Available; See Transformer Section
- Threaded Integral Bushings Provided For Optional Inner Panel Or Terminal Kits
- JIC Sizing
- Fiberglass Material Is Easily Punched, Drilled Or Sawn

Plastic Hand Held Case

- ▶ 9 Volt Battery Compartment with Removable Lid
- ▶ Two Part Construction Secured with Four M3 Screws into Brass Inserts
- ▶ 24 Degree Angled Display — 2.9" × 1.25"
- ▶ Four Inserted Rubber Feet
- ▶ Key Pad Area 2.9" × 3.98"
- ▶ Four PCB Mounting Bosses In Key Pad Area and Two in Sloped Display Area
- ▶ Stocked in Black and Mid-Grey ABS Plastic

1592 T-Case Hand Held Display Cases

The "T" case is available with two different types of displays. The solid display has an area of 4.8" × 3.4" that will accommodate display boards up to 4.6" × 2.37". The clear polycarbonate lens has an area of 4.0" × 1.77" and a plain mylar mask kit which allows the installation of a wide variety of display boards with the protection of the clear lens and dressed by the mylar frame. The lens can be easily glued snugly into the case and provides protection from dust and dirt. The back of the case has been designed to accommodate a magnetic strip which will allow an operator to affix the case to a suitable work surface. The finish is a light texture which will resist wear but allow high quality silk screening or pad printing. The "T" case is molded in flame-retardant ABS with a UL rating of VO and is stocked in grey or black.

PacTec Instrument Enclosure Kits are molded in medium impact, ABS (Acrylonitrile Butadiene Styrene - 94HB - 1/8" Thick). PacTec provides built in mounting features which save design and assembly steps and extra hardware. All Standard Kits are individually packaged and include all necessary component parts and assembly hardware to build a prototype unit. The Standard Kits are available in Black and PC Bone; Gray and Tan are available by request on some items. *To order a desired color, insert the number of the

color where "N" appears in the Allied stock number — 1 = Black; 2 = PC Bone; 3 = Tan; 4 = Gray. All products are available in UL 94-VO flame retardant material. PacTec enclosures are easily and economically modified using our unique insert tooling methods, or machined secondarily modified by request, as a special order. All PacTec products can be screen printed for custom identification, or have a custom overlay or nameplate provided by LaFrance.

HM/JM Series

For applications in the 2 sq." to 10 sq." the JM and HM are an ideal choice. The JM22, 42 series consists of four pieces — top and bottom cover, front and rear panel. JM24 is 2 pieces — top and bottom cover. The HM and HML series are 3 pieces — top and bottom cover, and 1 panel. The covers and panels can be inexpensively custom molded or modified to your specifications. **Additional Options Available:** Belt clip.

C and CL Series

C, CL and CLLP enclosures are modular units with expandable sides. By changing the side expanders, filler panels, spacers and panels, you can build more than 64 different models from a C, CL or CLLP unit. There are handles (H) and bail (B) variations for each basic case. **Additional Options Available:** Vents.

CF Series

CF Series are composed of 4 pieces — top cover, bottom cover and 2 end panels. This series offers options which include: bail tilt stands, and a standard venting pattern. Additionally extra height expanders, which provide further .125", is available for all CF models. The series is best suitable for 76" sq. in PCB applications.

The Standard Kits are available in Black and PC Bone; Gray and Tan are available by request on some items. *To order a desired color, insert the number of the

color where "N" appears in the Allied stock number — 1 = Black; 2 = PC Bone; 3 = Tan; 4 = Gray. All products are available in UL 94-VO flame retardant material. PacTec enclosures are easily and economically modified using our unique insert tooling methods, or machined secondarily modified by request, as a special order. All PacTec products can be screen printed for custom identification, or have a custom overlay or nameplate provided by LaFrance.

KE/KEU Series

KE, KEU Sloped top stylized keyboard enclosures are composed of four pieces — top cover, bottom cover, aluminum keyboard panel and rear aluminum I/O panel. Newly designed "LP" versions have a molded in, recessed keyboard panel and a matching color I/O panel in KJW 94 VO material.

†Available in Black and PC Bone only.

Switch Pac Series

Switch Pac's include 1 enclosure with 9VB compartment, standard membrane switch with ribbon connector, blank overlay, and a user diagram. Membrane switches utilize a durable steel dome design for tactile feel, and are made to withstand one million operations. Switches include flexible ribbon cable and connector. The polyester overlay is ready for you to create switch legends, graphics, transfer type, screen printing, typewriting or hand printing. Custom printed overlays and switches are available through Allied.

Stock No.*	Mfr.'s Type	Outside Dimensions (In.)			EACH

P.F.T. Modular Vertical Enclosures

PFT Special Features

- Rack ships knockdown in four cartons
- Frame is 14 gage steel; corner posts are 13 gage steel
- Removable side panels made from 18 gage steel
- Lift-off rear door; 18 gage steel mounts L.H. side of frame
- Royal blue texture finish on rear door and side panels
- Ash white texture finish on the frame
- Multi-bay capability
- Knockdown concept saves up to 66% on freight cost

Unique Corner Post Design.

PFT combines two unique design features to provide strength and rigidity associated only with expensive welded units. Interlocking tab and slot construction in the corner joints omits torsional movement of the corner posts. A heavy-gage mounting plate is

welded (slightly recessed) into the top and bottom of each corner post. Thus, when the corner bolt is tightened, the cabinet base (or top) flexes slightly, ensuring that the joint is always preloaded in tension, providing additional rigidity.

Mod-U-Line Venting

Moduline cabinets can be ordered with 3 venting options. Specify a vented top panel use part number suffix "VT". Use "VB" to order an MCLS with vented bottom panel. When both top and bottom panels are to be vented, use suffix "VTB". In each case a 1" wide strip of ventilation holes .125" dia. on .25" centers is provided. Ventilation can be provided to customer specifications.

Modifications

PFT does a significant amount of modifications to its standard moduline chassis and modubox instrument cases.

- 25 piece min. quantity
- Cut outs, rounds, squares
- Connector openings
- Press in studs, standoffs
- Lead times generally 5-6 weeks after receipt of order.
- Weld in studs, standoffs
- Silkscreening
- Special paint capability
- Dimensional changes

PFT Modubox Enclosures

Construction. Modubox enclosures are of high quality construction. Each enclosure has two parts: a sturdy texture painted wrapper of .090" aluminum and a smooth finished insert of .062" aluminum. The inserts are typically modified with cut-outs and silkscreening. Part numbers reflect the basic shapes offered. **MBK:** Modubox Keyboard style. **MBS:** Modubox Sloped front style. **MBL:** Modubox Linear (rectangular) style. Part numbers follow the rough outside dimensions. For example, an MBS030706BW is a Sloped front Modubox 3" high, 7" wide, and 6" deep with a Blue wrapper and White insert.

Modular Relay Racks

PFT Special Features

- Heavy duty aluminum extrusion construction utilizing 6061-T6 aluminum alloy
- 10-32 dia. tapped holes on front and rear flanges
- EIA hole spacing full height of vertical uprights

Each PFT Modular Relay Rack Consists Of:

- 2 fully tapped vertical uprights
- 2 mounting bases (front and rear)

- Available in smooth black oven baked finish
- Designed for multi-bay configurations
- UPS shippable for economical freight costs
- Designed to accommodate a variety of PFT accessories

- Top angle
- Assembly hardware

Now available from PFT—Modular Relay Racks that are UPS shippable! These all aluminum open frame racks are available in 19" and 24" rack mount widths with standard EIA hole spacing. PFT Modular Relay Racks are ideal for mounting electronic and test equipment, patch panels, shelves, data-communications and telecommunications products as well as other cabling and rack mount products. PFT Modular Relay Racks offer an economical alternative to your rack mount needs at a fraction of the cost of a fully enclosed vertical enclosure. These racks are ideal when a fully enclosed cabinet is not required. All PFT Modular Relay Racks are shipped unassembled for a significant freight savings. Assembly is easily accomplished in a matter of minutes using standard socket or adjustable wrenches. Racks are designed to bolt to the floor for extra stability.

How To Order

Step One: Select the width, height and depth Modular Rack desired. **Step Two:** Refer to the dimensional chart below to obtain Allied part # and cost. **Step Three:** Refer to accessory items needed to complement your Modular Relay Rack.

Welded Vertical Enclosures

Each unit contains: frame with 2 sets of adjustable rails, locking plexiglass front door, locking louvered rear door, louvered top, 2 locking and 2 non-locking double wheel casters, removable solid side panels, open bottom, and side security screws to prevent side panel removal. (Install only if you desire to eliminate the ability to remove side panels from outside of cabinet.) **Features.** Equipment Mounting for many applications can be easily accomplished. The WVE comes equipped with 2 sets of adjustable mounting rails. Fully adjustable, front to back, two sets of 10-32 drilled and tapped mounting rails are infinitely adjustable between the front and the rear of the cabinet frame. Access to internal electronics is fast and simple. Modular design enables access from front, rear and both sides. Side panels lift off easily or can be secured to prevent removal from outside. Finish color is textured polyurethane ivory to harmonize with any plush office environment and other office equipment. Two locking and two non-locking double wheel casters are included. Front plexiglass door and rear louvered steel door have convenient lift-off hinges. The WVE comes with a standard louvered top and an open bottom for plenty of wire and cable access. Multi-bay add-ons in any quantity are quickly assembled using a PFT joining kit (JK02). A full line of accessories for Welded Vertical Enclosures are available, including PFT's sliding tower shelf. Drawers, shelves, filler panels, fans and many other accessories are available from stock for immediate shipment.

Tower Shelf For Welded Vertical Enclosures

PFT's tower shelf installs to the bottom of any WVE series cabinet. The shelves slide independently from their stored position to ease access to towers for maintenance, installation or any purpose where access is important. Packed in pairs. Each shelf rated for 90 lbs. capacity. Smooth polyurethane paint coat finish in ivory to match cabinet cosmetics. All assembly hardware included.

724Q3558. TS0820I PER PAIR 233.35

Pagoda Top For Welded Vertical Enclosures

The pagoda top is ideal for applications where air flow through the top of a cabinet is required but where preventing internal cabinet contamination is a priority. Fits in same opening as top filler (Remove filler and install pagoda top). All hardware included. Texture finished to cosmetically match standard WVE series.

Universal Networking Frames

- Available with $\frac{10}{32}$ " or $\frac{12}{24}$ " Tapped Holes
- Mounting Holes on Both Front and Rear Flanges
- All-Aluminum Construction
- Hole Patterns per Universal EIA Spacing
- All Sizes UPS Shippable
- Available in 19" or 23" Rack Mount Widths
- Equipped with Two $\frac{3}{16}$ " $\times$ $\frac{1}{4}$ " Cross Bars Across the Top of the Unit

PFT Universal Networking Frames are used in conjunction with either the Swing Gate Bracket or Stationary Wall Bracket Kits. These frames utilize the same innovative features offered in other PFT Networking Frames.

Bracket Kits

Swing Gate Bracket Kits — Fig. A

- Ball Casters for Weight Support
- 180° Rotation with Five Locking Pivot Points
- Universal Mounting for Right or Left Hand Hinging
- Polyurethane Baked Finish
- Packed as Pairs

PFT Swing Gate Bracket Kits offer you an economical method for wall mounting a Universal Networking Frame while providing a hinging mechanism for swinging the frame out for maintenance and installation purposes.

Stock No.	Mfr.'s Type	Depth Range Front of Frame to Wall	PER PAIR

*In the Mfr.'s Type Number: "PLA" is a cabinet that is painted black with plexiglass doors and louvered cabinet sides; "PSA" is a cabinet that is painted black with plexiglass doors and solid cabinet sides; "SLA" is a cabinet that is painted black with a solid steel door and louvered cabinet sides; "SSA" is a cabinet that is painted black with a solid steel door and solid cabinet sides.

PFT, Inc. manufactures economical, high-quality desk top and wall mount cabinets, vertical enclosures, chassis products, small instrument boxes, and a variety of data comm products.

PFT has the capability to complete modifications, including hole punching, silkscreening, or size changes. Modifications can be completed on quantities as few as 25 pieces.

Cable Management Rack

- ▶ Drilled and Tapped with 10/32" or 12/24" Mounting Holes per EIA Universal Spacing on Both Front and Rear Flanges
- ▶ Designed for 19" Rack Equipment, 45 Rack Units in An Overall Height of 84 Inches
- ▶ All Aluminum construction with Black Polyurethane Finish
- ▶ Double Bolted Design at Front and Rear; Top and Bottom for Extra Rigidity and to Assure Squareness
- ▶ A PFT Proprietary Designed Hanger Which Allows for 45 Degree Rotation
- ▶ All Assembly Hardware Plus Accessory Pack that Includes: 20 Cable Ties, 16 Cable Hangers, 40 Cuphead Screws, Grommeting for Cutouts and Plastic Plugs for 2" Diameter Holes
- ▶ Lance Mechanism for Attaching Ties Inside the Channel
- ▶ Cable Tie Slots on Rear of Unit for Additional Cable Management Capability
- ▶ Large Round Cable Access Cutouts on Rear of Unit
- ▶ Round Cable Access Holes on Front of Unit

Now available from PFT — a unique Cable Management Rack that combines all the attributes of a relay rack, raceway and cable routing into one complete unit. This rack features PFT's new proprietary cable management hanger, which is mountable in 45 degree increments.

This all aluminum Cable Management Rack allows mounting of a variety of standard 19" wide patch panels, hubs, concentrators and other data comm equipment in a single rack with built in cable ties, cable hangers and provisions for organized routing of wire and cable. Each rack is shipped knock down for exceptional freight savings in a single carton.

Model CMR1977A. 19" x 77" Cable Management Rack featuring 10/32" tapped mounting holes. Finish: black.

Muffin® AC Fans

The most requested cooling fan available. At 105 CFM (free air), this 4.71" square x 1.50" deep fan is available in either sintered bronze sleeve or stainless steel ball bearings. UL recognized and CSA certified. Flame retardant plastic housing and propeller. Impedance protected. Terminal versions only.

- ▶ Ball Bearing

Venturi: PBT with glass; black; meets UL94V-0. **Propeller:** PBT; black; meets UL94V-0. Designed to EMI standards per FCC Part 15, Subpart J of Docket 20780, Class A and B radiated and conducted emissions, and per VDE Specification 0871/6.78 for category A and B requirements. **Dimensions:** 3.62" square × 1.0" deep (92mm × 25.4mm). **Weight:** 4.9 oz. (.14 kg).

Muffin XL® DC Fans

These ball-bearing fans feature the famous Feathered Edge™ blade design for lower noise. Electronic locked rotor protection; polarity protected. 4.125" mounting hole centers. For ambients of -10° to +70°C. Cased in a die-cast zinc housing. Meets FCC and VDE EMI requirements. UL Yellow Card Recognized; CSA Certified. **Weight:** 21.5 oz. (.61 kg).

Blowers, Impellers and Axial Fans

Dual Inlet Centrifugal Blowers

Dual inlet blowers offer a large discharge from a quiet, compact unit. The external rotor motor is inside the forward curved impeller. 115 VAC, 50/60 Hz. See wiring diagram A.

Backward Curved Motorized Impellers

The narrow profile of backward curved motorized impellers provides excellent space utilization. The impellers can be used in either evacuating or pressurizing applications and can be mounted horizontally or vertically. Impellers do not require a scrollhousing although an inlet ring is recommended on air inflow. 115 VAC, 50/60 Hz. See wiring diagram A.

AC and DC Fans, Blower and Accessories

Models RL90-18/00, RL90-18/12 and RL90-18/24 Blowers

Fig. A Model RL90-18/00 Blower

Housing of fiberglass reinforced plastic (PC) and metal plate, impeller of fiberglass reinforced plastic (PA). Shaded pole motor. Clockwise rotation viewed from rotor, air output through housing window. Elec. connection via 2 leads AWG 18, TR 64, 12 in. (310 mm). Mass 24.5 oz. (680 g).

4.75" x 4.75" x 1.45" (121 mm x 121 x 37 mm)

MIL Grade Brushless DC Fans

These Electronically Commutated Direct Current (ECDC) fans are designed to meet the tough requirements of defense and aerospace users, as well as others requiring top caliber performance. There are no brushes to wear out, so you get long life and low maintenance. Features low power consumption, low EMI/RFI, and high operating temperature capability (to 100° on some models). The rotational speed

(RPM) change is accomplished by simply varying the voltage. Included as a built-in, standard feature, the performance sensor monitors fan rotation. This, coupled with the optional Low Speed Warning Detector, ensures state of the art reliability.

Spartan ECDC Fan

These fans give up to 135 cfm (65 L/Sec) free air delivery at 12 VDC and 180 cfm (86.5 L/Sec) at 26 VDC. Designed to meet applicable military specs, these 12 and 26 VDC models withstand ambients from -54°C to 100°C. Dimensionally interchangeable with Muffin and Spartan AC and DC fans. Features built-in performance sensor and the same housing, ball bearing suspension system, and lubricant in proven high reliability AC designs. Low maintenance because there are no brushes to wear out. See the Selection Guide on page 97 for specifications. **Call your nearest Allied facility for pricing.**

AxiMax® 2H and 3 Air Movers

These miniature air movers meet all applicable military specifications and are made for airborne and other critical space/weight/performance applications. Features free air delivery from 10 cfm to 155 cfm (4.7 to 73 L/Sec), and life expectancies from 10,000 hours at 72°C, at 22,000 RPM. Withstands ambients up to 257°F (125°C). For 115 VAC, 1 phase, 400 Hz; 200 VAC, 3 phase, 400 Hz; 115 VAC, 1 phase, 60 Hz. **Size and Weight:** AxiMax 2H—2 × 1 1/2" (50.8 mm × 38.1 mm), 4 1/2 oz. (128g); AxiMax 3—3 × 2 5/16" (76.2 mm × 58.7 mm), 14 oz. (4 kg). Optional Altivar motors automatically increase speed with altitude. See selection guide on page 97 for specifications.

MIL 80 ECDC Fan

Dimensionally interchangeable with Sprite and MIL 80 AC fans, the MIL 80 ECDC models provide up to 65 cfm (28.8 L/Sec) free air delivery at 12 V and 26 VDC; and 38 cfm (18.3 L/Sec) at 48 VDC. 12, 26 and 48 VDC models are designed to meet all applicable military specs. Feature built-in fan performance sensor and low maintenance (without any brushes to wear out). Withstand ambients from -54°C to 100°C. Housing, ball bearing suspension system and lubricant are the same as those supplied in high reliability AC designs. See the Selection Guide on page 97 for specifications. **Call your nearest Allied facility for pricing.**

MIL 80 Fan

The MIL SPEC version of the Sprite fan provides free air delivery from 28 to 58 cfm (13 to 27 L/Sec). Features pressure building capability up to .5" (12.7 mm) H₂O at cut-off. Withstands ambients up to 257°F (125°C). Meets all applicable military specifications. See selection guide on page 97 for specifications.

Model D Blower

Model DRFP (X)/KS-505-CW-329XF. This rugged centrifugal blower, designed for defense/aerospace applications, provides free air delivery to 130 cfm (61 L/Sec). Features pressure building capability up to 2.0" (50.8 mm) H₂O at cut-off. Handles pressure building with relatively less noise than fans. QPL accepted under MIL-B-23071/9-001 and -002. Allow for extra lead time—not a stocking item. See the Selection Guide on page 97 for specifications. **Call your nearest Allied facility for pricing.** 598-1430. Type 033461.

Spartan Fans

This MIL SPEC version of the famous Muffin fan gives 113 cfm (53 L/Sec) free air delivery, up to 188 cfm (89 L/Sec) for some 400 Hz models. Offers an efficient multi-slot motor, double shielded stainless steel ball bearings, and high pressure characteristics of up to .8" (20.3 mm) H₂O. These fans are dimensionally interchangeable with the Muffin fan, 4.71" sq. × 1.50" (119.6 mm × 38.1 mm). Venturi, spiders, and hub are single aluminum casting for shock and vibration resistance. Withstands ambients from -60° to +212°F (-54° to +100°C). Some models are lower. Lubricated for life. Meet all applicable military specs. See selection guide on page 97 for specifications.

Airflow Interlock Switch

Model 2A. This SPDT 5 amp, 250 VAC switch features 8 velocity ratings and interchangeable actuating vanes. Mounts on round and flat ducts with a single screw. Life expectancy is 500,000 operations. **Weight:** 4.5 oz. (0.13 kg).

Plastic Fan Filter Assemblies

Fig. A

Fig. B

Fan-S offers a unique fan filter package consisting of a guard, foam filter media and media retainer, manufactured with UL listed 94-V0 material for 80 mm - 3/8", 92 mm - 3/8" and 120 mm - 4/2" tubeaxial fans for the removal of dust and contaminating particles. Installation is quick and simple: four mounting screws secure the guard portion, then snap on the retainer and filter media with no extra hardware or brackets required.

The two major features of our filter package are safety and low down time. When the filter media requires maintenance, simply taking the retainer off, the media is exposed for cleaning or replacement thus leaving the guard attached to the fan assuring employee protection and eliminating possible damage of the fan component during handling. This leaves the fan operational during servicing thus eliminating down time.

Aluminum Fan Filters

These tested and proven filters provide maximum airflow with effective filtering. Mill and iridite finishes are offered to enhance EMI/RFI shielding as well as an anodized finish for aesthetic purposes. The tightly woven aluminum corrugated mesh screen is encased in a formed aluminum frame built for ruggedness and durability. The units are easily washed in a solvent or degreaser and can be mounted directly to the fan or to a panel.

The 08 series wire form fan guards are designed for use with tubaxial fan sizes 40 mm - 1 1/2", 50 mm - 2", 60 mm - 2 1/2", 80 mm - 3 1/8", 92 mm - 3 5/8", 120 mm - 4 1/2", 127 mm - 5", 150 mm - 6" and 254 mm - 10". Our 3/16" and 1/4" maximum ring spacing designs were developed to assist our customers in complying with domestic and international safety agency requirements that are in effect today or that may develop in the future. We maintain the highest level of quality control by insuring that we use only the highest grade of materials that must pass a very stringent level of incoming inspection prior

to being accepted to our manufacturing inventory. All wire form fan guards are inspected during the manufacturing process to assure compliance to our rigid specifications. They receive an additional final inspection prior to shipment that insures compliance with both mechanical and esthetic parameters. **Specifications.** All guards are designed to ensure safe operation and comply with U.L., CSA and VDE requirements. Nickel chrome plating is standard finish for all wire formed guards. All wire form fan guards listed above are also available in zinc or black electro deposit.

The 09 Series of plastic fan guards offer customers maximum airflow while meeting compliance to safety regulations. The guard attaches to either side of the tubaxial fan without creating pure tones due to blade passing frequencies. Each guard was tooled with ring spacing that is in compliance with UL 1/4" probe requirements. The material is UL rated 94 V0 high impact plastic.

AC and DC Cooling Fans

GLOBE MOTORS

The Globe Motors commercial cooling fan product line provides cooling solutions for industrial applications from office copiers, micro-computers and laboratory instrumentation to industrial control cabinets.

Through the use of CAD/CAM and strict statistical process controls (SPC), our fans have

a life expectancy of 60,000 hours and a 0.005% field failure rate (50 parts per million).

Special care has been taken to design-in long operating life and low acoustical noise. All fans use precision, life-lubricated ball bearings.

AC Fans

E47145 LR35886

Designed for maximum performance with the minimum noise in a wide range of sizes, from 3.15" square to 10" diameter with air flow ranges from 17 CFM to 560 CFM. Features include rugged cast aluminum venturi blocks for strength and cool operation. Impellers are made from thermoplastic with a UL 94V0 rating. All fans are impedance or thermal protected and are UL/CSA and VDE or TUV listed. Fans are designed for 10 years of continuous use without lubrication at 25°C (78°F).

4.69" x 4.69" x 1.5" AC Fans (Series 3-15-25XX/35XX/44XX Sleeve Bearings)

Globe Motor Division

Globe Motor Division approved modification centers in Dallas, Texas and San Jose, California are staffed with Globe factory-trained personnel, some of whom have been meeting customer needs for more than 20 years.

This experience allows us to provide additional services in the following areas:

- Computerized motor performance data under load and temperature conditions
- Machine shop capabilities
- Inventory support for small and large product needs
- Custom configuration of any Globe Motor
- Design assistance

While serving customers through 32 nationwide locations, we also provide engineering assistance through our Motorvation Hot Lines at 1-800-541-4105 or (in Texas only) 214-343-5000.

Give us a call. Hundreds of satisfied customers do each day. We're the company that cares about your needs.

Motors for Industrial Applications

For computer peripherals, machine tools, instrumentation, robotics, office equipment and medical equipment.

Manufacturers of everything from handheld tools to robotics are finding Globe is a competitive source for quality miniature motors, gearmotors and blowers.

When you need precise, reliable motion in minimum space, Globe can give you the design options and the quality you need to meet rigid material and testing standards.

Strategically located distribution modification/assembly centers can make thousands of variations from our basic motor modules, including options in EMI filters, special mounting, tachometers, special couplings and lubrication. With 48-hour delivery of standard units direct from our distributors.

FRACTIONAL HP DC PLANETARY GERMOTORS
Standard Gear Ratios: from 4:1 to 46,656:1
Continuous Torque: from .75 oz. in. to 1,250 oz. in.

FRACTIONAL HP DC MOTORS
Continuous Torque: from .25 oz. in. to 43.0 oz. in.
Diameter: from 1.3" to 2.6"
VDC: 4, 6, 12, 24, 50, 115

IM-13 SPUR GERMOTORS
Standard Gear Reduction: from 3.97:1 to 1,276.09:1
Continuous Torque: from 3.0 oz. in. to 60.0 oz. in.

Motors for Military Applications

FRACTIONAL HP DC PM MOTORS
Continuous Torque: from 0.20 oz. in. to 16.0 oz. in.
Diameter: from .75" to 2.25"
VDC: 5, 12, 27, 50, 115

FRACTIONAL HP DC PM GERMOTORS
Standard Gear Ratios: from 3.82:1 to 36,873:1
Continuous Torque: from 1.0 oz. in. to 550 lb. in.

For missile guidance and control systems, missile fin actuation, aircraft instruments, control systems, aircraft actuation systems, land track vehicles-in-line fuel pumps—transfer and bilge pumps—cabin ventilation.

Globe can help you meet rigorous quality, material and testing standards for motors, gearmotors, and blowers.

We can give you custom capabilities and options in actuators (linear and rotary), pumps with leakproof magnetic couplings, torquers, and blowers.

Strategically-located distribution modification/assembly centers can make thousands of variations from our basic motor modules, including options in EMI filters, special mounting, tachometers, special couplings and lubrications, with 48-hour delivery of standard units direct from our distributors.

MINIATURE FANS AND BLOWERS
CFM: from 6 CFM to 600 CFM

Stepping, Geared, SAS Series Motors

Geared SAS Series motors have step angles ranging from 0.0125° to 0.75° and torque ratings from 200 ounce inches (maximum gear train loading) to 35 ounce inches. All at 200 p/s. Gear trains are industrial quality throughout. Dual sleeve bearings. **Input Power:** 8 Watts. **Winding Resistance:** 36 ohms. **Weight:** 16 oz.

Stock No.	Mfr.'s Type	Step Angle	Output Speed @ 200 p/s (rpm)	Torque @ 200 p/s* (Oz.-in.)	Steps Per Rev.	EACH

*Torque measured at nominal voltage with L/R drive. †Max. gear train loading.

Stepping, Direct Drive, SAS Series Motors

Industrial quality, economical SAS Series direct stepping motors have excellent torque/size ratio: 7.5 ounce inches at 4-5 p/s. Unipolar operation at 12 VDC is standard. Step angle is 7.5°. Dual sleeve bearings. 48 steps per revolution. **2-Phase Holding Torque (oz.-in.):** 10.5. **Winding Resistance:** 36 Ohms. **Weight:** 8 oz.

Stock No.	Mfr.'s Type	Steps Angle	Rated Torque @ 4-5 p/s (Oz.-in.)	Input Power (Watts)	Rotor Inertia (Oz.-in.)	EACH

Stepping, Linear Actuator, SLS Series Actuator

Stepping SLS Linear actuator has a reversible, permanent magnet rotor with unipolar operations. Rotor assembly features sintered bronze nut for extended life. Nut accepts 1/4" diameter, .048 pitch Acme screw that provides linear motion for pushing, pulling, lifting and positioning applications. Standard 8" screw with maximum travel of 6.75" and maximum thrust of 15 pounds. Ball bearings. **Winding Resistance:** 25 ohms. **Weight:** 10.5 oz. (with screw).

Stock No.	Mfr.'s Type	Steps Inch	Max. Rec. Load	Input Power (Watts)	Nominal Voltage (DC)	EACH

Stepping, Geared, AS and ABS Series Motors

Geared AS and ABS stepping motors have a die cast housing, hardened steel gears and pinions running on ground, and hardened steel studs. No plastic or fiber parts are used. These dependable motors are used in precision instruments and computer peripherals. **Winding Resistance:** Models 3004-1001 and -008, 100 ohms; Models 3008-005, 53 ohms.

Stock No.	Mfr.'s Type	Steps Angle	Output Speed @ 200 p/s (rpm)	Torque @ 200 p/s* (Oz.-in.)	Input Power (Watts)	EACH

*Torque measured at nominal voltage with L/R drive. †Max. gear train loading.

SUPERSMALL Synchronous Motor

This instrument-grade, SUPERSMALL, synchronous motor is reversible and operates at 720 rpm on 115 VAC, 60 Hz. It weighs just 2.1 ounces and is less than an inch in diameter.

The new BA Series synchronous motor is a practical solution to control problems in equipment where space is at a premium. It also is suited to products employing variable frequency AC controls. **Note:** Capacitor is furnished with motor, 115 V.

Model: BA. **Speed at Output Shaft:** 720 rpm. **Rated Torque:** 0.625 oz.-in. **Input Power:** 1.5 watts. **Capacitor Value:** 0.15 ±10%, 400 VDC. **Full Load Temperature Rise:** 30°C. **Weight:** 2.1 oz. **Shaft Bearing:** Sleeve.

25-Up.....EACH 37.53

Stepping Motor Control with Display

Model EPC-015. General purpose controller with step frequency display. Operates from a single external 6-24 VDC power supply. Will drive 4-phase stepping motors requiring up to 1.0 Amp per phase. Also includes adjustable step frequency, and phase driver disable control. Continuous, single step, or jog operation. Bi-directional control.

542-0060. 1-24.....EACH 234.67

Synchronous, Geared, A and AB Series Motors

Permanent magnet, reversible, A and AB Series synchronous motors have gear trains engineered for heavy-duty industrial use. Both pinion and gear teeth are case hardened for wear resistance and rotate upon hardened and ground steel studs. No plastic or fiber parts are used. Capacitor furnished. **Weight:** 11 oz.

Synchronous, Geared, T Series Motors

Enclosed in a rugged die cast housing, T Series permanent magnet, reversible, synchronous motors have a rated torque of 233 ounce-inches (maximum gear train loading) at 2 rpm. Sleeve bearings. 24 poles. When operated at 60 Hz, rotor speed is 300 rpm. Capacitor is furnished. 115 V, 60 Hz.

Stock No.	Mfr.'s Type	Shaft Speed (rpm)	Rated Torque (Oz.-in.)	Input Power (Watts)	Cap. Value (mfd)	EACH

Synchronous, Direct Drive, SA Series Motors

Compact, low cost SA Series direct drive, reversible AC, synchronous motors have a rotor speed of 300 rpm when operated at 60 Hz. Sleeve bearings. Full load temperature rise is 28°C. These permanent magnet motors are ideal for use where space is at a premium and dependable, long-life service is demanded. Capacitor furnished. **Weight:** 8 oz.

Hysteresis Synchronous, Geared, Reversible, DA Series

Heavy duty DA Series gearmotors maintain timing accuracy and are available in shaft speeds from 1 to 120 rpm. Recommended for applications requiring high gear torque rating. Rated pull-out torque is as great as 100 ounce inches (maximum gear train loading) at 1 rpm. Capacitor furnished. All motors are 115V, 60 Hz models. **Temperature Rise:** 40°C above ambient. **Weight:** 14 oz.

Radial Lead Electrolytic Capacitors

Compact, electrolytic capacitors for original equipment or replacement use in all kinds of communications equipment. Operating Temperature: -40° to +85°C. Capacitance Tolerance: ±20%. Life: 2000 hours at +85°C. Rated Working Voltage Range: 10 VDC to 100 VDC. Capacitance Range: 0.47 mfd to 10,000 mfd. Straight leads. Solvent proof type, long life.

Lead Spacing and Lead Diameter $L \leq 20.0a = 1.5$, $L > 20.0a = 2$

Type MDD Film Capacitors

- ▶ Non-Inductive Construction
- ▶ Non-Combustible, Epoxy Coated
- ▶ Capacitance Tolerance ±10%
- ▶ 250 VDC Rated (130 VAC), 400 VDC (200 VAC), and 630 VDC (250 VAC)
- ▶ MDD Series Crosses to Panasonic ECQ-XXXXXZ, S Series

These resin coated metallized polyester film capacitors are rated 250 VDC and 130 VAC at 60 Hz. Capacitance Tolerance: ±10%. Operating Temperature: -40°C to +85°C. Non-inductive construction. Non-combustible and epoxy coated. Insulation Resistance: Less than 0.33 µF ≥ 10,000 MΩ × µF. Dissipation Factor: ≤ 1% at 1 kHz. Stress Voltage Test: Rated voltage × 1.5 for one minute.

250 VDC (130 VAC at 60 Hz)

Type CF-KC Film Capacitors

UL, CSA, VDE, SEMCO SEV, EIA/MILCO, DEMKO and NEMKO recognized for across-the-line, antenna-isolation and line-bypass capacitors. These metallized plastic film capacitors are non-inductively wound in a plastic case and sealed in resin. The radial leads are tin plated copper. Markings are on the top and side in approved standards. **Temperature Range:** -40°C to +85°C. **Rated Voltage:** 250 VAC. **Tolerance:** 20%. **Dissipation Factor:** 0.01 or less at 25°C (1 kHz).

Type CF-MH Film Capacitors

► UL, CSA and European Safety Standard Film Capacitors

UL, CSA, VDE, and SEMCO recognized for across-the-line, Type CF-MH capacitors are constructed of metallized plastic film enclosed in a noncombustible resin. **Temperature Range:** -40°C to +85°C. **Capacitance Range:** 0.01 µF to 0.22 µF. **Capacitance Tolerance:** ±20%. **Rated Voltage:** 250 VAC (50, 60 Hz). **Withstand Voltage:** Between terminals, 1000VAC for 1 min.; between terminals and enclosure, 2000 VAC for 1 min. **Insulation Resistance:** Between terminals, more than 12,000 MΩ at 100 VDC after 1 min. **Dissipation Factor:** 1% or less than 1% (1 kHz 25°C).

Epoxy Coated Polyester Film Capacitors

Design and Construction

- Dielectric: Polyester Film (Polyethylene Terephthalate Film)
- Electrode: Aluminum Foil — Inductive Wind — Welded Tabs
- Winding: Fully Automatic
- Terminals: Copper Plated Steel Wire with Solder Coat (Straight Leads)
- Coverage: Coated with Epoxy Resin (Dipping Method)

Rated Values and Characteristics

- Nominal Capacitance: 0.001 mfd. to 0.47 mfd.
- Capacitance Tolerance: ±10%
- Rated DC Voltage: 100 V
- Temperature Range: -40°C to +85°C
- Test Voltage: 200% of Rated DC Voltage for 60 Sec.
- Insulation Resistance: More Than 9,000 M Ohms, Avg. 100,000 M Ohms at 20°C
- Dissipation Factor (Tan Theta): Below 0.8%, Avg. 0.4% at 1,000 Hz, 20°C

Dipped Mica Dielectric Capacitors

Dipped Mica Dielectric Capacitors in miniature styles (CD6 and CD7) use in delay lines and IF transformers. Other styles are larger and higher rated capacitors. All types feature a dipping process to impart high moisture and humidity resistance. All leads are copper wire for improved solderability. They are available in a wide range of sizes and ratings to meet application requirements. Units are marked with Manufacturers name or symbol, nominal capacitance in pF and percent tolerance, and DC working voltage. Miniature units (CD6 and CD7) are marked with capacitance in pF and tolerance letter designation. All have operating temperature range of -55°C to +125°C.

X387S Metallized Polypropylene

- Motor Run Capacitors
- Extremely Low Losses and Heat Dissipation
- Non-PCB Oil Filled
- Self-Healing Ability
- UL Approved Internal Protection Device

ASC oil-filled capacitors employ high quality metallized polypropylene film dielectric. They are non-PCB oil-filled in metal cases designed for industrial applications, motor run applications in refrigeration and air conditioning equipment, power factor correction, power supplies, and general purpose AC applications. Non-inductive wound metallized polypropylene, oil-filled (non-toxic, disposable) construction. Non-corrosive seamless can, with double roll lock aluminum cover, suitable for outdoor applications. Terminals are tin plated, 1/4 inch quick disconnect tines. Marking include logo, capacitance, tolerance, voltage, capacitor type, EIA date code. 10% tolerance.

X386S Metallized Polypropylene

- Standard Operating Temperature Range: -40°C to +70°C
- Non-PCB Oil Filled
- Self-Healing Ability for Enhanced Reliability and Long Life
- Extremely Low Loss and Heat Dissipation
- Other Capacitance Values, Dual Capacitance Values, Tolerances, and Operating Temperature Ranges Available Upon Request
- UL Approved Internal Protective Device and CSA Approved

ASC oil-filled capacitors employ high quality metallized polypropylene film dielectric. They are non-PCB oil filled in metal cases designed for industrial applications, motor run applications in refrigeration and air conditioning equipment, power factor correction, power supplies, HID lighting applications, and general purpose AC applications. They use non-inductive wound metallized polypropylene and oil-filled construction. Short circuits are virtually eliminated due to the self-healing properties of the metallized polypropylene film. They are non-toxic and disposable. Non-corrosive seamless can, with double roll lock aluminum cover, suitable for outdoor applications. Terminals are four 1/4" quick tines. 50% size and weight reduction over conventional designs. 10% tolerance. Other capacitance values, tolerances, temperature ranges, and dual capacitors available upon request. Call for price, delivery and minimums.

Hardware

- Round or Oval Bracket Style
- Economical and Easy to Use
- Made to Hold Above Capacitors Securely in Place

Designed in either oval or round bracket styles, these clamps will hold motor run capacitors securely and accurately in place. Made of coated steel, they will withstand vibration, corrosion, and dirty environments.

X363 Metallized Polypropylene

- ▶ Long Stable Life
- ▶ Lowest Dissipation Factor

- ▶ Very High Insulation Resistance
- ▶ Fully Rated At 105°C

Non-inductive wound metallized polypropylene construction. Case is polyester tape wrap and epoxy end fill. Leads are solder coated or tinned solid wire. Excellent stability plus outstanding electrical properties make the X363 ideal for use in timing and integrating circuitry in instrumentation. The X363 exhibits negligible capacitance drift and electrical property degradation under environmental conditions normally requiring hermetically sealed encasements with other dielectrics. Temperature must be limited to 105°C. The X363 is ideal where close tolerance is required because of inherent stability with service conditions and life. The inherent long life characteristics and reliable performance capability of the X363 render it suitable for a wide variety of military applications where hermetic sealing or temperature capability higher than 105°C are not requirements. Markings include logo, capacitance, tolerance, and voltage. When space permits, capacitor type and EIA date code will be marked. 5% tolerance.

X465 Metallized Polycarbonate

- ▶ Round Axial Wrap And Fill Construction
- ▶ Cost Effective
- ▶ Miniature Size And Light Weight

- ▶ Rated Up To 125°C Without Degradation
- ▶ Auto Insertable

Non-inductive wound metallized polycarbonate construction with polyester tape wrap and epoxy end fill case. Leads are either solder coated or tinned solid wire. The X465 is ideal for circuits requiring NPO type characteristics. Rated up to 125°C without derating. Low dissipation factor makes polycarbonate ideal for pulse circuit applications up to 250 KHz. Stability and retrace capabilities of polycarbonate make this an excellent choice where long term precision is a requirement, such as timing, precision and other circuits requiring long term stability. Markings to include logo, capacitance, tolerance, voltage. Where space permits, capacitor type and EIA date code will be marked. 5% tolerance.

Surface Mount Ceramic Capacitor Kit

Large Surface Mount Ceramic Capacitor Kit

AVX multilayer ceramic chip capacitors in a sampler kit. Capacitance, voltage, tolerance, temperature coefficient, chip sizes and quantities as noted below. Quantities listed are for large kit.

881-6700.....EACH 300.00

Small Surface Mount Ceramic Capacitor Kit. Same as above, but with 1/2 the quantity of each value of capacitor.

881-6705.....EACH 170.00

Resin Dipped Radial Capacitors

TAP Series Solid Tantalum Resin Dipped Capacitors

TAP is a professional device manufactured with a flame retardant coating and featuring ultra low leakage current and impedance, very small physical sizes and exceptional temperature stability. It is designed and conditioned to operate to +85°C without derating. The 15 case sizes with wide capacitance and working voltage ranges means the TAP can accommodate almost any requirement. Also available on Tape and Reel for auto insertion.

Capacitors

Radial Leads/SkyCap

Note: Coating clean .784/.031 min. above sealing plane.
 *Lead length tolerance = +1.5 mm (.060") - 0.
 Also available with lead length of 31.75 mm (1.25") minimum.

General Information AVX SR Series

- Conformally Coated Radial Leaded MLC
- Temperature Coefficients: NPO, X7R, Z5U
- 50 V, 100 V (200 V Available On Request)
- Case Material: Epoxy (Flame Retardant to UL Bulletin 492, Par. 280)
- Lead Material: Solderable

AVX Ceramic Chip Capacitors

AVX ceramic surface mount capacitors, available in NPO, X7R and Z5U, have historically been one of the most reliable electronic components available. NPO and Z7R have temperature coefficients of -55°C to +125°C. NPO is the most popular formulation of the "temperature-compensating" EIA Class I ceramic materials. They show little capacitance change with frequency and dielectric absorption is typically less than 0.6% which is similar to mica and most films. The X7R is the most popular intermediate dielectric-constant formulation that is called "temperature-stable" in ceramics and fall into EIA Class II materials. Capacitance for X7R varies under the influence of electrical operating conditions such as voltage, frequency and time (approximately 5% change in 10 years). Z5U formulations are "general purpose" ceramics which are meant for use in limited temperature applications where small size and cost are important. They provide the highest capacitance density possible in a given size for the three most popular formulations. They show wide variations in electrical operating conditions. Despite their capacitance instability, Z5U formulations are very popular because of their small size, low ESL, low ESR and excellent frequency response. These features are particularly important for decoupling applications where only a minimum capacitance value is required.

Size	Dimensions (mm)			Terminal Width	
	Length	Width	Thickness (Max.)	Min.	Max.
	L	W	T	t	t
0805	2.0 ± 0.2	1.2 ± 0.2	1.27	0.25	0.71
1206	3.2 ± 0.2	1.6 ± 0.2	1.27	0.25	0.76

AVX Tantalum Chip Capacitors

AVX offers solid tantalum capacitors in a wide range of sizes, styles and ratings to meet any design needs. The four case sizes offered here are the most popular and conform to EIA standard EIA-35BAAAC. The TAJ Series is qualified as MIL-style CWR11. The TAJ Series is temperature rated at -55°C to +85°C.

How to Order (Commercial):

TAJ Mfr.'s Type	B Case Code	335 Cap Code	M Tol. %	016 Volt DC	R Packaging	
Case Code	Dimensions					
	L	W	H	W1	A	S (min.)
A	3.2	1.6	1.6	1.2	0.8	1.1
B	3.5	2.8	1.9	2.2	0.8	1.4
C	6.0	3.2	2.6	2.2	1.3	2.9
D	7.3	4.3	2.9	2.4	1.3	4.4

W1 dimensions applies to the termination width for "A" dimension area only.

Stock No.

Capacitor Kits

TSD-150, TSD-300 Tantalum Capacitor Kits. Both kits contain high quality Hitachi resin dipped tantalum capacitors. TSD-150 has 5 pieces each of 30 values — total 150 pieces. TSD-300 has 10 pieces of 30 values — total 300 pieces. All in 15 quick select drawers. **Kit Dimensions:** 10 × 8 × 6½". **Kit Includes:** 10 V, 16 V, 20 V and 35 V in .1 MFD through 47 MFD capacitance ranges. **777-0150. TSD-150.....EACH 192.95**
777-0300. TSD-300.....EACH 259.94

CEC-410 Low Leakage and Sub-Miniature Capacitor Kit. Features Include: 10 pieces per type. High quality Nichicon product. Tantalum like performance levels. **Kit Dimensions:** 10 × 8 × 6½". **Kit Includes:** 10 V, 16 V, 25 V, 35 V and 50 V super miniature lytics; 35 V and 50 V super miniature low leakage lytics. **777-0410. CEC-410.....EACH 145.95**

CC-540-12 Multi-Layered Ceramic Chip Capacitor Kit. 10 pieces each — 43 values. Ultra-miniature size, light in weight and thin body thickness. Highly reliable performance. 9 × 7.5 × 1.6" styrene case with chip types clearly marked. **Includes:** EIA 1206 case sizes, NPO, X7R and Z5U types, 10 pF-1 MFD capacitance ranges at 50 volts. **777-5412. CC-540-12.....EACH 174.95**

NAC-400 Capacitor Kit. Includes: Miniature aluminum electrolytic, ceramic disc and film capacitors in 15 clearly labeled drawers. 10 × 8 × 6½" kit holds aluminum electrolytics — axial - 17 values, 16, 25, 35, 50 VDC; radial - 16 values; ceramic discs — 11 values - .001 pF-1 MFD 12 V, 50 VDC; polyester film — 9 values - 100 VDC; metallized film — 9 values - 250, 400, 630 V. **777-0400. NAC-400.....EACH 169.95**

CC-540-08 Multi-Layered Ceramic Chip Capacitor Kit. 10 pieces each — 43 values. Ultra-miniature size. Thin body thickness, light in weight with highly reliable performance 9 × 7.5 × 1.6" styrene case with see through locking lid, and clearly marked chip types. 10pF-1mF capacitance ranges at 50 volts. EIA 0805 case size, NPO, X7R, and Z5U types. **777-5408. CC-540-08.....EACH 174.95**

CEC-360 Surface Mount Kit. One of a kind organizer kit containing 120 pieces of surface mount electrolytic capacitors. 4-50 VDC; 0.1-220 MFD. Packed in compartments in clear plastic polystyrene case. **777-0360. CEC-360.....EACH 182.95**

CEC-181 SMD Ceramic Chip Capacitor Kit. EIA 1206 size multi-layer ceramic chip capacitors. 10pF-1mF capacitance ranges at 50 volts. 5 pieces each — 18 values. NPO, X7R and Z5U types. **777-0181. CEC-181.....EACH 44.20**

CEC-182 SMD Ceramic Chip Capacitor Kit. EIA 0805 size multi-layer ceramic chip capacitors. 10pF-1mF capacitance ranges at 50 volts. 5 pieces each — 18 values. NPO, X7R and Z5U types. **777-0182. CEC-182.....EACH 44.20**

CEC-123 Electrolytic SMD Capacitor Kit. Surface mounting construction. Miniaturized down to 5.5 mm heights. Load Life: 2000 hours at 85°C. **Operating Temperature Range:** -40° to +85°C. **Capacitance Range:** .1 mF to 220 mF. **Voltage Range:** 4 V to 50 V. **Capacitance Tolerance:** ±20% at 120 Hz, 20°C. Quantity of 10 pieces each of 12 values for total of 120 capacitors. **777-0123. CEC-123.....EACH 73.10**

CEC-51 Axial Aluminum Electrolytic Capacitor Kit. Easy to read label clearly shows capacitor type, capacitance and voltage. Lower body and smaller case sizes. 12 values from 1 mF to 2200 mF in voltages from 16 to 50 VDC. Total of 51 capacitors. ±20% tolerance. Sturdy, clear, see-through plastic case with 12 individual compartments. **Operating Temperature Range:** -40° to +85°C. **777-0051. CEC-51.....EACH 46.75**

CEC-59 Radial Aluminum Electrolytic Capacitor Kit. Easy to read label clearly shows capacitor type, capacitance and voltage. Lower body and smaller case sizes. 12 values from 1 mF to 2200 mF in voltages from 25 to 50 VDC. Total of 59 capacitors. ±20% tolerance. Sturdy, clear, see-through plastic case with 12 individual compartments. **Operating Temperature Range:** -40° to +85°C. **777-0059. CEC-59.....EACH 39.10**

CEC-60 Radial Tantalum Capacitor Kit. 12 of the most requested resin dipped radial tantalum capacitance values. The resin coating provides solvent-proofing and excellent flame retardant characteristics with special emphasis on low leakage current, humidity proofing, resistance to heat shocks and low temperature characteristics. 16 and 35 VDC in .1 mF through 47 mF. Total of 60 capacitors. Easy to read label clearly shows capacitor type, capacitance and voltage. Sturdy, clear, see-through plastic case with 12 individual compartments. **777-0060. CEC-60.....EACH 64.60**

CEC-121 Ceramic Disc Radial Capacitor Kit. 12 of the most popular 500 V radial NPO, Y5F and Z5U ceramic disc capacitors. Excellent heat and moisture resistance. Resin dipped and was impregnated. Barium Titanate ceramic dielectric. Quantity of 10 each of 12 different values for a total of 120 capacitors. Easy to read label clearly shows capacitor type, capacitance and voltage. ±5%, ±10% and ±20% tolerance. **777-0121. CEC-121.....EACH 34.00**

CEC-62 Tantalum SMD Chip Capacitor Kit. Ultra-small case sizes. High soldering heat resistance. Excellent reliability. 5 pieces each of the 12 most popular capacitance values of .047 mF to 68 mF and 4 V to 35 V for a total of 60 capacitors. ±20% tolerance. Sturdy, clear, see-through plastic case with 12 individual compartments. Easy to read label clearly shows capacitor type, capacitance and voltage. **777-0062. CEC-62.....EACH 67.92**

CEC-100 Radial Metallized Film Capacitor Kit. Highly reliable and superior performance in high frequency applications. Inside and outside double epoxy resin coating provides excellent humidity resistance. **Operating Temperature Range:** -40° to +85°C. Easy to read label clearly shows capacitor type, capacitance and voltage. .022 mF to 1 mF and 250 to 630 V. Total of 100 capacitors. ±10% tolerance. **777-0100. CEC-100.....EACH 51.85**

CEC-105 Polyester Film Radial Capacitor Kit. Polyethylene terephthalate film used for better performance. Coated with epoxy resin for superior heat, humidity and solvent resistance. Latest miniaturized type. **Operating Temperature Range:** -40° to +85°C. 12 of the most popular values of .001 mF to .1 mF in 100 V for a total of 105 capacitors. ±10% tolerance. **777-0105. CEC-105.....EACH 43.35**

CEC-122 Miniature Low Leakage Radial Capacitor Kit. Tantalum-like performance levels. Very low leakage current of .002 CV or 0.2 µA (whichever is greater). **Operating Temperature Range:** -40° to +85°C. 10 pieces each of 12 of the most popular values of .1 mF to 100 mF in 25 and 50 V for a total of 120 capacitors. ±10% tolerance. Sturdy, clear, see-through plastic case with 12 individual compartments. **777-0122. CEC-122.....EACH 45.90**

Vitramon Ceramic Chip Kits

KV-VJKTNPO Vitramon Monolithic Ceramic Chip Capacitor Kit. Ceramic chip capacitors in 0805 and 1206 size package with NPO characteristics. 5 pieces per value of 35 different values for total of 175 pieces. 50 and 100 VDC. From 1 to 4700 pF. Tolerances from 0.25% to 5%. Sturdy, clear, see-through plastic case with 35 individual compartments. **777-0772. KV-VJKTNPO.....EACH 96.90**

KV-VJKT7R Vitramon Monolithic Ceramic Chip Capacitor Kit. Ceramic chip capacitors in 0805, 1206 and 1210 size package with X7R characteristics. 10 pieces per value of 30 different values for a total of 300 pieces. 25 and 50 VDC. From 0.01 to 6800 pF. 10% tolerance. Sturdy, clear, see-through plastic case with 30 individual compartments. **777-0773. KV-VJKT7R.....EACH 100.30**

KV-VJKTZ5U Vitramon Monolithic Ceramic Chip Capacitor Kit. Ceramic chip capacitors in 0805, 1206, 1210 and 1812 size package with Z5U characteristics. 5 pieces per value of 30 different values for a total of 150 pieces. 50 VDC. From 0.01 to 6800 pF. 20% tolerance. Sturdy, clear, see-through plastic case with 30 individual compartments. **777-0774. KV-VJKTZ5U.....EACH 100.30**

KV-VJKTPOP Vitramon Monolithic Ceramic Chip Capacitor Kit. Ceramic chip capacitors in 0805 and 1206 size package with X7R characteristics. 5 pieces per value of 30 different values for a total of 150 pieces. 25 and 50 VDC. From 0.1 to 1000 pF. From 0.25% to 20% tolerance. Sturdy, clear, see-through plastic case with 25 individual compartments. **777-0775. KV-VJKTPOP.....EACH 93.50**

KV-VJKTTHQ Vitramon Monolithic Ceramic Chip Capacitor Kit. Ceramic chip capacitors in 0805 and 1206 size package with X7R characteristics. 5 pieces per value of 40 different values for a total of 200 pieces. 100 and 200 VDC. From 1 to 680 pF. From 0.1% to 5% tolerance. Sturdy, clear, see-through plastic case with 40 individual compartments. **777-0776. KV-VJKTTHQ.....EACH 127.50**

KV-VJKT0603 Vitramon Monolithic Ceramic Chip Capacitor Kit. Ceramic chip capacitors in 0805 and 1206 size package with NPO and X7R characteristics. 20 pieces per value of 30 different values for a total of 600 pieces. 25 and 50 VDC. From 0.01 to 8200 pF. From 0.1% to 10% tolerance. Sturdy, clear, see-through plastic case with 30 individual compartments. **777-0777. KV-VJKT0603.....EACH 130.90**

Dale Inductor Kits

KD-IMC1812 Dale Surface Mount IMC-1812 Inductors. Molded construction provides superior strength and moisture resistance. Compatible with vapor phase and infrared reflow soldering. Surface mount inductors in 1812 packaging. 5 pieces per value of 18 values for a total of 90 pieces. From 0.33 to 220 µH. Packed in notebook style plastic case. **777-1812. KD-IMC1812.....EACH 130.90**

KD-ISC1812 Dale Surface Mount ISC-1812 Shielded Inductors. Molded construction provides superior strength and moisture resistance. Compatible with vapor phase and infrared reflow soldering. Surface mount inductors in 1812 packaging. 5 pieces per value of 18 values for a total of 90 pieces. From 0.33 to 100 µH. Packed in notebook style plastic case. **777-1813. KD-ISC1812.....EACH 132.60**

KD-IMC1210 Dale Surface Mount IMC-1210 Inductors. Molded construction provides superior strength and moisture resistance. Compatible with vapor phase and infrared reflow soldering. Surface mount inductors in 1210 packaging. 5 pieces per value of 18 values for a total of 90 pieces. From 0.033 to 100 µH. Packed in notebook style plastic case. **777-1210. KD-IMC1210.....EACH 130.90**

KD-ISC1210 Dale Surface Mount ISC-1210 Shielded Inductors. Molded construction provides superior strength and moisture resistance. Compatible with vapor phase and infrared reflow soldering. Surface mount inductors in 1210 packaging. 5 pieces per value of 18 values for a total of 90 pieces. From 0.1 to 100 µH. Packed in notebook style plastic case. **777-1211. KD-ISC1210.....EACH 132.60**

Computer Grade Capacitors

MALLORY

CGS Computer Grade Capacitors

High performance computer grade capacitor. Long life expectancy available in high or low post configurations. **Operating Temperature:** -40°C to +85°C. Low ESR high ripple capabilities. **Voltage Range:** 10 WVDC 450 WVDC. **Tolerance:** -10% +75% up to 150 WVDC, -10% +50%, 200-450 WVDC.

Epoxy Dipped Solid Tantalum Capacitors

Type TDC capacitors offer the long life electrical stability characteristics of solid tantalum at low cost. The tough epoxy coating provides uniform lead spacing and protection against mechanical damage and moisture. These capacitors are ideal for industrial and consumer applications where premium performance, minimum size, and low cost are essential. **Operating Temperature:** -55°C to +125°C (with voltage derating above 85°C). The TDC dip-coated solid tantalum capacitor has leads 0.187" maximum in length. A tolerance of ±20% is indicated by an "M" in the Mfr.'s type number; a tolerance of ±10% is indicated by a "K" in the Mfr.'s type number. **Leads:** Diameter: .020" (.51 mm). **Leads Space S (Using Last 3 Letters in Mfr.'s Type):** NSE, NSF — .125" (3.17 mm); WSG — .250" (6.35 mm).

Capacitor Kits In Plastic Storage Cabinets

MONO151A Monolithic Capacitor Malloin. A collection of Monolithic ceramic capacitors with voltages to 200 WVDC. Values from 10 pF to 1 µF. **852-2610. MONO151A. EACH 179.83**

SKR151A. A selection of single ended aluminum electrolytic capacitors with voltages to 450 WVDC. Values to 1 µF to 6800 µF. **852-2604. SKR151A. EACH 64.55**

TC151A. Assorted axial leaded aluminum electrolytic capacitors with voltages to 450 WVDC. Values from 10 pF to 200 µF. **852-2601. TC151A. EACH 62.98**

TDC151A. An assortment of epoxy dipped solid tantalum capacitors. Voltages to 50 WVDC. Values from .1 µF to 220 µF. **Tolerance: ±10%. EACH 137.30**

TAC151A Solid Tantalum. An assortment of 78 axial leaded molded solid tantalum capacitors. Six each of 24 popular ratings from .1 µF to 47 µF. Voltages to 50 WVDC. **852-2620. TAC151A. EACH 180.00**

Radial Lead Snap-In Capacitors

This high capacitance general purpose aluminum electrolytic capacitor has radial snap-in leads. These are ideal for input filter in SMPS. PVC insulating sleeve. **Tolerance: 20%. Temperature Range: -40 to +85°C.**

Miniature Radial Electrolytic Capacitors

Type SKR Miniature Aluminum Electrolytic Capacitors

The SKR series is a radial lead, high CV miniature aluminum electrolytic capacitor which is smaller in case size than other general use products. This series is suitable for those electronic products requiring small size. It is suitable for consumer electronic equipment, such as stereo radios, TV sets, etc. The aluminum case is enclosed in a vinyl sleeve. **Tolerance: ±20%. Operating Temperature Range: -40 ~ +85°C.**

Type TKR Miniature High Temperature Electrolytic Capacitors

The TKR series is a radial lead, high temperature, general use miniature electrolytic capacitor. The TKR series is suitable for consumer electronic equipment, telecommunication equipment and general industry products requiring high temperatures. The aluminum case is enclosed in a vinyl sleeve. **Tolerance: ±20%. Operating Temperature Range: -40 ~ +105°C.**

Aluminum Electrolytic Capacitors

Type SKA Axial Miniature

The SKA series is an axial lead, general purpose, miniature electronic capacitor. This series is suitable for those electronic products requiring small size. It is suitable for consumer electronic equipment, such as stereo radios, TV sets, etc. The aluminum case is enclosed in a vinyl sleeve. **Tolerance: ±20%. Operating Temperature Range: -40 to +85°C.**

TC Aluminum Electrolytic Capacitors

TC capacitors are single section metal tubulars with plastic insulating sleeve. Sizes are for bare unsleeved cans; add .015" to the diameter and .062" to the length to allow for plastic sleeve. TC capacitors have etched cathode construction and 2.25" min. tin leads. **Specifications. Operating Temperature: -40°C to +85°C. Tolerance: -10% to 75% up to 350 WVDC, -10% to +50% for 450 WVDC.**

TCG Series

Long Life, Axial Leads. The TCG is a small tubular axial version of the Mallory Type CG capacitor. The TCG features long life and low ESR and utilizes a PVC insulating sleeve as well as a safety vent on diameters .5 inches and larger. 7th digit of part number indicates tolerance. **Specifications. Capacitance Range: 10 to 10,000 µF. Voltage Range: 10 to 450 WVDC. Capacitance Tolerance: T = -10%, +50%; U = -10%, +75%. Operating Temperature: -40°C to +85°C.**

DC Voltage Rotary Fans

— NEW —

- Solid State Brushless DC Motors
- Low Current, Low Noise and Low Interference
- Ball or Sleeve Bearings Available
- CPU Cooling Module Available For The 40 mm Fan
- CPU and TÜV Approvals

Operating Temperature: -10°C to +65°C. Operating Voltage: At 12 VDC — 6 to 13.8 range; at 24 VDC — 14 to 27.6 range. Expected Life: 30,000 hours at 40°C. Wire Material: Red — (+) UL 1007, 22 AWG; Black — (-) UL 1007, 22 AWG. Plastic Material: Impeller — PBT UL94V-0 or ABS UL94HB; Frame — PBT UL94V-0.

Radial Ceramic and Electrolytic Capacitors

MALLORY

Q/QLR Series (QUENCHARC®) Metallized Polyester Arc Suppressor/ Snubber Network

- ▶ Noise and Arc Suppression
- ▶ RC Snubber Network
- ▶ Relay Contact Protection
- ▶ EMI/RFI Reduction
- ▶ Noise Reduction on Controllers/ Drivers
- ▶ Type QRL: UL/CSA Version

"ARCING", "SPARKING", and "TRANSIENTS" often cause premature failures in relays, switches, thyristors, triacs, contactors, and related products. QUENCHARC® extends operating life when properly selected and applied.

General Specifications. Operating Temperature: -55°C to +85°C at full rated voltage. **Voltage Range:** 200 VDC (125 VAC) to 600 VDC (250 VAC). **Capacitance Values:** 0.1, 0.5, 1.0 µF. **Resistor Values:** 22, 47, 100, 150, 200 ohms. **Tolerance at 100 KHz:** Capacitance: ±20%; Resistance: ±10%. **Construction:** Metallized polyester in series with a carbon composition resistor. **Case:** Coated with a flame retardant epoxy. **Dielectric Withstand:** Units shall withstand a DC potential of 1.5 times the DC voltage rating. Testing conducted at +25°C. **Test Method and Performance. DC Life Test:** Units shall withstand a test potential of 125°C of the rated voltage for a period of 500 hours at 85°C. A failure shall consist of capacitance change >5% or of R greater than original limits. **Long Term Stability:** The capacitance shall not change more than 2% when stored at ambient temperature and humidity for a period of two years or less.

Series 158X Metallized Polyester Suppressors

- ▶ Capacitance: .01 µF to 1.0 µF (Other Cap Values Available On Special Order)
- ▶ Voltage: 250 VAC
- ▶ Temperature: -55°C to +125°C (With Voltage Derating Above +85°C)
- ▶ International Agency Approvals Including UL1414 and CSA
- ▶ Short Leads Available As Special Order Item. Add "S" to Part Number (Lead Configuration: .138" Min.)
- ▶ 10% Tolerance Available As Special Order Item by Adding "K" to Mfr.'s Type

The Series 158X is a radial leaded metallized polyester, AC line suppression capacitor, housed in a flame-retardant pre-molded plastic case with epoxy resin fill. **Temperature Range:** -55°C to +125°C with voltage derating above 85°C. **Capacitor Range:** 0.1 µF to 1.0 µF. **Lead Configuration:** .591" min. length. Suggested applications are energy storage, filtering, pulse discharge, discrimination, and suppression.

Series 168 Metallized Polyester

- ▶ Capacitance: .001 µF to 1.0 µF (Other Cap Values Available On Special Order)
- ▶ Voltage: 50 V, 63 V, and 100 V (250, 400 Voltages Available On Special Order)
- ▶ Temperature: -55°C to +125°C (With Voltage Derating Above +85°C)

The Series 168 is a radial leaded metallized polyester self healing film capacitor. Non-inductively wound. Housed in a molded, flame-retardant case with epoxy fill. **Temperature range:** -55°C to 125°C with voltage derating above 85°C. Suggested applications are blocking, bypass, decoupling, smoothing, timing and tuning.

Monolithic Ceramic Capacitors

These Molded Case Monolithic Ceramic Capacitors are constructed to MIL-C-11015. **Tolerance:** ±10%. **Operating Temperature Range:** -55°C to +125°C. Capacitors are .09 ±.01" (2.29 ±.25 mm) thick; lead spacing is 2 ±.015" (5.08 ±.38 mm); lead length is 1.25" (31.75 mm) minimum. Made from ferroelectric, barium titanate material.

PSU Series AC Motor Start Capacitors

- ▶ For Motor Starting and Other Intermittent Duty AC Applications
- ▶ Dual Quick Connect Terminals
- ▶ Rugged Bakelite Case
- ▶ Compact Size; Easily Mounted
- ▶ Meets EIA RS-463 Type 2

— NEW —

Temperature: Operating: -40°C to +65°C; Storage: -55°C to +85°C. **Voltage Range:** 110 to 330 VAC. **Capacitance Range:** 21 µF to 1280 µF. **Operating Frequency:** 50 to 60 Hz. **Power Factor:** 10% max. (12% ≤30 µF).

GRM Series Chip Capacitors

Non-polarized and miniature size chip capacitors have uniform dimensions and configuration. Flow and reflow solderable. Nickel barrier termination is highly resistant to metal migration. They have minimum series inductance.

Safety Ceramic Disc Capacitors

Safety recognized ceramic disc capacitors are 125VAC rated and have -25°C to +85°C temperature characteristics. Used for across the line or line by-pass applications. Available in ammo pack for automatic insertion as custom order. Call for price and delivery.

High Voltage Ceramic Capacitors

NOTE 1: This terminal may extend up to 0.100 (2.5) above insulated surface.

NOTE 2: No. 8-32 NC-28 Tapped holes.

EIA class I and II high voltage capacitors. **CAUTION:** Some chemicals such as Freon, oil, etc. may be harmful to this series when used as an insulation medium. **Tolerance:** M = ±20%; Z = -20% +80%.

Kits

These kits are specifically designed to aid the design engineer in prototyping applications. Each kit contains a wide selection of commonly used values and sizes that meet a variety of circuit design requirements.

RPE Radial Lead Ceramic Capacitors

RPE Radial Lead Ceramic Capacitors

These monolithic ceramic capacitors have industry standard sizes and an epoxy coating meeting UL94V-0. Leads are tinned copper clad steel wire. Additional values, voltages,

temperature coefficients, tolerances and markings available, as well as additional lead spacing and tape and reel option available as custom order. Call for price and delivery.

UVX Series Radial Capacitors

UVX miniature electrolytic capacitor for general purpose features reduced case size anti-solvent through 100 volts. The VX series is most suitable for electronic equipment where a smaller case size is required. The small case size makes it ideal for use with high speed automatic insertion equipment. Load life of 2000 hours at 85°C. Units with $\phi 6.3$ mm or more are provided with our unique safety case vent. **Capacitance Tolerance:** $\pm 20\%$ at 120 Hz. 20°C. **Operating Temperature Range:** -40° approximately $+85^\circ\text{C}$.

TVX Series Axial Capacitors

TVX Compact Series miniature aluminum electrolytic capacitors provide higher component density in solid-state circuitry. Features further miniaturization of both body length and diameter for greater CV density when compared to conventional type aluminum electrolytic lines. **Capacitance:** $\pm 20\%$. **Operating Temperature Range:** -40°C approximately $+85^\circ\text{C}$.

UKL Series Radial Capacitors

UKL low leakage current electrolytic capacitor has anti-solvent feature and small size. The UKL series will exhibit only a slight increase in leakage current when subjected to no load at high temperature or shelved for long periods of time at normal temperature. Standard units have capacitance tolerance of $\pm 20\%$ at 120 Hz 20°C. The Nichicon safety vent is standard on capacitors with diameters ≥ 6.3 mm. **Operating Temperature Range:** -40°C to approximately $+105^\circ\text{C}$. **Leakage Current:** After one minute of application at rated voltage, leakage current will be no more than 0.002CV or 0.2 μA , whichever is greater. Other values, tolerances and voltages available as custom orders. Call for pricing and delivery. Manufacturer's literature available upon request.

Pre-Packaged Resistor and Capacitor Kits

Features:

- Each Kit Contains the Top 30 most popular resistors or capacitors for group specified
- Cabinets stack together to build a component storage center
- One piece frame is lightweight and virtually unbreakable
- Keyhole slots for wall mounting
- Frame measures 9 1/8"W x 7 1/2"H x 6 1/2"D
- Contains 15 drawers, each divided in half

The CW-Series capacitors are designed to provide reliable temperature stable performance over an extremely wide temperature range in bypass, coupling and blocking operations. The CY- and CZ- Series capacitors are ideally suited for a wide range of non-critical general purpose bypass, coupling and filtering applications. Note:

Mono-Axial Conformal Coated Ceramic Capacitors

These devices enable the electronic manufacturer and assembler to increase the printed circuit board density and allow use of both sides of the board for greater productivity. Class I dielectrics (COG or NPO) have a stable, predictable, linear change over their operating temperature range and typically are neither voltage nor frequency sensitive. Class II (X7R) and Class III (Z5U) typically are used for bypass and coupling applications, where their

Philips General Purpose capacitors provide a wide choice of 1000 Volt DC rated units for general purpose applications. These high dielectric ceramic discs offer small physical size, tighter tolerances and a rugged humidity resistant coating. Capacitors are primarily designed for non-critical coupling, bypass and filter applications found in all types of entertainment, industrial and medical equipment. **Capacitance Tolerance:** $\pm 10\%$, (*) $\pm 20\%$ or (+) $+100-0\%$ (GMV) or ($\pm$) $+80-20\%$ as listed. **Working Voltage:** 1000 volts DC except ($\pm$) 500 DC. **Dielectric Strength:** 200% of rated working voltage. **Operating Temperature Range:** -55°C to $+85^{\circ}\text{C}$. **Encapsulation:** Phenolic coated. **Insulation Resistance:** 10,000 megohms minimum. Tested at 500 volts DC maximum. Centralab diamond, capacitance value, capacitance tolerance or code letter (D = ± 0.5 pf, K = $\pm 10\%$, M = $\pm 20\%$, P = $+100-0\%$) working voltage and EIA temperature characteristic code as space permits.

Series DD High-Voltage Disc Ceramics

Designed for non-critical coupling, by-pass and filter applications. **Operating Temperature Range:** -55°C to $+85^{\circ}\text{C}$. Tinned wire leads. **Encapsulation:** Phenolic coated. **Dielectric Strength:** 200% of rated working voltage. These high dielectric ceramic discs offer small size, tighter tolerances and a rugged humidity resistant coating. **Weight:** 2 oz.

Low-Voltage Ceramic Disc Capacitors

Working voltage is 50 VDC to 150 VDC. Tolerance of type CK is -20% to $+80\%$. Tolerance of type DC is $\pm 20\%$. Dielectric strength is 250% of rated marking voltage. **Operating Temperature Range:** -55°C to $+80^{\circ}\text{C}$. All have Z5V characteristic $+22\%$ to -82% max. capacitance change from $+25^{\circ}\text{C}$ reading over temperature range of $+10^{\circ}\text{C}$ to $+85^{\circ}\text{C}$. **Weight:** 2 oz.

UK Miniature Disc Capacitors

Philips Ultra-Kap capacitors provide many advantages when compared to ordinary ceramic capacitors. Their unique semiconductor design allows for the maximum in capacitance while retaining the miniature size required for today's low voltage applications. Dissipation factor at 1 kHz, 5-10%. **Tolerance:** 10 and 20 WVDC, -20% to $+80\%$, 12, 16, 25 and 50 WVDC tolerance is $\pm 20\%$. Tinned wire leads #22 AWG. **Weight:** 1 ounce.

Type 199D Tantalex® Resin-Coated Solid-Tantalum Capacitors

Designed for use in entertainment and commercial equipment and many other minimum-cost applications. Priced competitively with any other capacitor of this type, domestic or offshore. Capacitors listed below are standard stock items; numbers ending with A1 have lead spacing of .100". Other lead styles available on special order. Drawing above shows those styles available. **Tolerance:** $\pm 20\%$; for $\pm 10\%$ tolerance, change 9th character in Mfr.'s Type from 0 to 9; prices available on request. **Operating Temperature Range:** -55°C to $+85^{\circ}\text{C}$.

173D Series Tantalum Capacitors

Solid tantalum capacitors are designed for auto, industrial and consumer electronic equipment. Made of precision-molded thermosetting flame-retardant epoxy resin. Supplied lead taped. **Temperature Range:** -55°C to $+85^{\circ}\text{C}$. **Capacitance Tolerance:** $\pm 10\%$. **Leakage Current:** Type suffix U, 0.5 μA ; type suffix V, 0.7 to 1 μA ; type suffix W, 1.4 to 2 μA ; type suffix X, 2.4 to 5 μA . **Dissipation Factor:** (A + 25°C) 6 through 20 WVDC capacitors, 4 to 6%; 25 through 50 WVDC capacitors, 3 to 4%.

109D Series Sintered-Anode Tantalex® Tantalum Electrolytic Capacitors

109D Series fills the basic requirements for applications in the industrial, automotive and tele-communications design field. Meet requirements of Military Specification, MIL-C-39006, Style CLR65 (E Seal). Other sizes available.

Type 150D Axial Solid Tantalum Capacitors

- Hermetically Sealed Metal Cases
- Recommended for Industrial, Military, and Commercial Applications
- Capacitors Listed Have Outer Plastic-Film Insulation
- Capacitors Listed Have Capacitance Tolerance of $\pm 10\%$
- Operating Temperature Range: -80°C to $+85^{\circ}\text{C}$; to $+125^{\circ}\text{C}$ with Voltage Derating

Orange Drop® Capacitors

192P Pacer Filmite "E" Axial Capacitors

Extended foil film sections are terminated in end caps with wire leads, to assure the best possible non-inductive section. Protected by heat shrinkable plastic sleeve or epoxy coating. Designed for operation to 85°C. Tolerance: ±10%.

Type PS Orange Drop Dipped Tubular Capacitors

- ▶ Double Dipped in Bright Orange Epoxy Resin — Beats Heat and Humidity
- ▶ Outside Foil On All Units Identified by Black Striping
- ▶ Crimped Wire Leads for Correct Spacing When Mounted on Printed Wiring Boards
- ▶ Dual Dielectric (Polyester Film-Paper) Solidly Impregnated with Exclusive HCX — Produces Rock-hard Capacitor Section
- ▶ Other Values and Voltages Available Upon Request

- ▶ Molded Case Available In Four Case Codes
- ▶ Compatible With All Popular "High Voltage" Automatic Pick and Place Equipment
- ▶ Optical Character Recognition Qualified
- ▶ Meets IEC Specification QC300801/US0001 and EIA 535BAAC
- ▶ 8 mm, 12 mm Tape Available Per EIA-81-1 and Reeling Per IEC 286-3; 13" (330 mm) Standard; 7" (178 mm) or Full Reels Available
- ▶ ±10% Tolerance

Performance/Electrical Characteristics. Operating Temperature: -55°C to +85°C (to +125°C with voltage derating.) Capacitance Range: 0.1 µF to 330 µF. Capacitance Tolerance: ±20%, ±10% standard; ±5% available as special. Voltage Rating: 4 WVDC to 50 WVDC. Resistance to Solder Heat: 260°C ±5°C for 30 ±5 seconds. Coefficient Thermal Expansion: 75 x 10⁻⁶ inch/inch/°C. Molded Body: Semiconductor grade molding material. Compilant Terminals: 60/40 Sn/Pb finish, standard. Automatic Redundant Screening: Capacitance, DF, DCL and ESR. (Data shipped with product on request.)

Type 225P Orange Drop® Polyester Capacitors

Type 225 capacitors are designed for PC boards and are furnished with radial leads to facilitate insertions. Used in TV sets, radios, instruments and commercial electronic equipment. Sections are wound from polyester film and thin gauge foil. Wax-free conformal epoxy coating protects against moisture. For operation up to 85°C. Tolerance: ±10%.

Snap Lock Aluminum Capacitors

Ideally suited for use in input and output filters, power supplies, computer equipment and other industrial or commercial applications. The 80D series is a two pin snap-in/lock-in capacitor. The snap-lock terminals securely snap into and hold onto a PC board for soldering and physical stability. It has high ripple capability. Capacitors have PVC insulating sleeve with resin end seal to withstand halogenated cleaning solvents.* Leads are tinned copper-clad steel. The capacitance tolerance is -10% to +30%. The operating temperature is -40°C to +85°C. Other capacitance values, voltages, and sizes available as custom order. Call for price and delivery. *Not available on 22 mm dia. size.

36D Series Powerlytic Electrolytic Capacitors

Excellent for use in power supply filters, computer related equipment, and other industrial or commercial applications. They have high capacitance per case size, high ripple current, low leakage current, long shelf life and operating life. Low screw insert terminals. **Operating Temperature:** 36D and 36DX — -40°C to +85°C; 36DE — -40°C to +95°C. **Capacitance Tolerance:** 10-100VDC — -10% to +75%; 200-450 VDC — -10% to +50%. Other capacitance values, voltages, and sizes available as custom order. Call for price and delivery.

Axial Electrolytic Capacitors

Type 39D Powerlytic Axial Electrolytic Capacitors

The 39D series is recommended for replacement applications and is designed for applications requiring large capacitance in small physical case size. Welds at all critical anode and cathode terminals eliminate riveted or pressure connections to assure freedom from open circuits even when operated in the microvolt or millivolt signal range. Improved molded phenolic end seals with pressure-sensitive safety vent. Service life of 10 years or more in normal circuit applications. Capacitors have outer plastic-film insulation. -20°C to +85°C operating temperature. **Capacitance Tolerance:** 10-75 WVDC — -10%, +75%; 250 WVDC — -10%, 50%. Other voltages, capacitance values, and specs available as custom order. Call for price and delivery. Manufacturer literature available upon request.

Type 53D Tubular Axial Electrolytic Capacitors

This general purpose capacitor has rugged construction and large CV ratings in an axial lead capacitor. Replacement for the 39D series. Recommended for new designs. Service life of 10 years or more in normal circuit applications. Capacitors have outer PVC film insulation. -40°C to +85°C operating temperature. -10% to +50% capacitance tolerance. Other voltages, capacitance values, and specs available as custom order. Call for price and delivery. Manufacturer literature available upon request.

Type 500D General Purpose Miniature Aluminum Capacitors

General purpose miniature axial lead electrolytic capacitors. Increased CV efficiency. **Operating Temperature:** Up to 250 VDC — -40°C to +85°C; Over 250 VDC — -20°C to +85°C. 20% capacitance tolerance. Other voltages, capacitance values, and specs available as custom order. Call for price and delivery. Manufacturer literature available upon request.

510D Series Radial Capacitors

The 510D series miniature radial lead aluminum capacitors feature a broad operating range, low DC leakage current, low dissipation factor, and are a suitable replacement for solid tantalum applications. **Capacitance Tolerance:** ±20%. **Operating Temperature Range:** -40°C to +105°C. Additional values and voltages are available as special orders. Call for price and delivery.

511D Series General Purpose Radial Capacitors

These general purpose miniature radial lead aluminum capacitors feature +105°C operation, improved CV and are suitable for long life applications. **Capacitance Tolerance:** ±20%. **Operating Range:** -40°C to +105°C. Additional values and voltages are available as special orders. Call for price and delivery.

515D Series Radial Capacitors

These miniature radial lead aluminum capacitors feature high CV per case size, low cost, solvent resistant construction, and low profile ratings. **Capacitance Tolerance:** ±20%. **Operating Temperature:** -40°C to +85°C. Supplied with uncut leads. Additional values, voltages, packaging and lead configuration available as special orders. Also available in both tape and reel packaging and tape and ammo box packaging as special order. Call for price and delivery.

600D Series High Reliability Axial Capacitors

These high reliability miniature axial lead aluminum capacitors feature a wide temperature range, a unique Teflon end seal for long life, high vibration capability, a life test of 2000 hours @ +125°C and have an polyester insulating outer sleeve. They are a foil tantalum replacement. **Capacitance Tolerance (8th character):** F—10% to +50%; G—10% to +75%. Additional values, voltages, tolerances, and Military version (MIL-C-39018/01) as special order. Call for price and delivery.

672D Series Radial Capacitors

The 672D series is a miniature aluminum capacitor with radial leads. They feature minimal ESR change, high ripple current capability and are original SMPS output capacitors. **Capacitance Tolerance:** -10% to +100%. **Operating Temperature Range:** -40°C to +105°C. Supplied with polyester insulating sleeve with resin end seal and cut leads. Negative lead is 0.281" long and the positive lead is 0.375" long. Additional values and voltages are available as special orders. Call for price and delivery.

673D Series Tubular Radial Capacitors

The 673D series is a tubular radial lead aluminum capacitor. They feature a wide temperature range and are ideal for SMPS output filters. **Capacitance Tolerance:** -10% to +50%. **Operating Temperature Range:** -40°C to +105°C. Supplied with polyester insulating sleeve. Additional values and voltages are available as special orders. Call for price and delivery.

Type TVA ATOM Axial Tubular Electrolytic Capacitors

Polarized Single Units

Smallest standard tubular capacitors available. High dependability with lower leakage currents and long shelf life. Withstands high temperatures, ripple currents, and surge voltages. Capacitors rated at 100WVDC or less operate at -40° to $+85^{\circ}\text{C}$; above 100 WVDC, -20° to $+85^{\circ}\text{C}$. Metal case with thermoplastic outer insulating sleeve. **NOTE:** Sizes subject to change without notice.

Cera-Mite® Ceramic Capacitors

Tiny, tough and dependable. Fine replacement for molded micas and tubular ceramics. Heavy moisture-proof insulating coat. For 85°C use.

Hypercon® Ceramic Discs

Ultraminiature discs for transistorized circuitry, bypass and coupling. Especially suited for any low voltage use where high capacitance and low power factors are important.

Type TE LITTL-LYTIC Axial Electrolytic Capacitors

- Proven Dependable Performance in Industrial and Electronic Equipment With Either Transistor or Modified Electron-Tube Circuits
- All Terminal Connections Welded, Eliminating Possibility of "Open" or Intermittent Contacts Occasionally Found in Pressure Joints of Conventional Capacitors
- Superior in Size, Performance Characteristics, Shelf Life, Construction, Reliability
- Metal-Encased, With Clear Plastic Outer Insulating Sleeve
- Excellent Circuit Performance When Used as Coupling Capacitors
- Minimum Drain and Long Battery Life When Used in Battery Bypass Applications
- Better Performance Under Life Test Than Most Miniature Aluminum Electrolytic Capacitors

Type 715P Orange Drop Polypropylene Dipped Tubulars

- Conformally Coated With Flame-Retardant Epoxy Which Provides Protection From Humidity and Mechanical Damage
- Furnished With 1.250" Long "Hockeystick" Crimped Leads

PERFORMANCE CHARACTERISTICS. Operating Temperature Range: -55° to +85°C; to +105°C with 50% voltage derating. **Capacitance Tolerance:** ±5%. **Dielectric Strength:** Unit rated up to 800 volts shall withstand a d-c potential of 250% of rated voltage for not more than 5 seconds. Units rated above 800 volts—200%.

Ceramic and Film Capacitors

Monolithic Ceramic Capacitors

Conformal-coated radial lead capacitors. Capacitors listed are 100WVDC. Size: .200" W x .250" H x .125" T. Lead length is 1.0" Min. Additional values, voltages, tolerances, temperature characteristics, lead styles and sizes available as special order. Call for price and delivery. Manufacturer's literature available upon request.

Metallized Polyester Film Capacitors

Economical capacitors with extensive ratings and rugged construction in a small size. Solid tinned wire leads are 1.75" long min. 10% tolerance. -55°C to +85°C operating temperature.

Molded Inductors

Flame-retardant coating, precision performance, excellent reliability and sturdy construction. Epoxy molded construction provides superior moisture protection. Wide inductance range in a small package. IMS-5 offers electromagnetic shielding.

Molded Surface Mount Inductors

Molded construction provides superior strength and moisture resistance. Printed marking. Compatible with vapor phase and infra-red reflow soldering.

RF Inductors and Chokes

Subminiature Shielded RF Inductors

Epoxy molded and shielded for minimum coupling in high-density package. Meet electrical and environmental requirements of **MIL-C-15305C, Grade 1** (resistance to moisture and immersion). **Class B** (-55° to +125°). For altitudes to 70,000 feet **Tolerance: ±10%**. Less than 3% coupling. Low DC resistance. **Dielectric strength: 700 V R.M.S.** Size: 0.162 ±.010 dia. × 0.410" ±.020 long. AWG #22 leads. **Weight per 100: 3½ oz.**

Subminiature RF Chokes

► Moisture Resistant

Iron core RF chokes are designed to meet demand for high-reliability ultraminiature components. Suited to network and filter design, delay lines, and computer applications.

RF Chokes With Axial Leads

These chokes cover an inductance range from 1 microhenry to 50 millihenries. Either single layer or 3-pi universal winding is used to insure low distributed capacity. Chokes are wound on low-loss molded phenolic or powdered iron core forms and are impregnated with a moisture and fungus-resistant varnish. Leads are 1½" (38.1mm) long.

Single Layer Windings

Phenolic Core: 3/16" (4.76 mm) diameter × 3/4" (19.05 mm) long. **Tolerance: ±10%–20%.**

Bead Inductors

Ferrite beads are used for noise suppression in car radios, digital control equipment and for the prevention of spurious oscillation in radio frequency amplifiers. Ferrite bead inductors are devices which can effectively be used on printed circuit boards where high component density is essential. Applications include micro computer, switching regulators, digital control equipment, car radio, car stereos, etc. Tape and reel in axial and radial versions available as well as ammo pack as custom order. Call for price and delivery.

External Drive Piezo-Alarms

These piezo-alarms have no "feedback" tab and is particularly suited for the generation of both single tones and the unusual sound effects that are possible with specifically designed driving circuits. These sounds include musical melodies, insect sounds, etc. All mechanical and electrical components are designed to be compatible with most standard PC board assembly and wave soldering techniques. Rugged construction, low cost and high reliability with variable tone outputs along with no EMI output make this unit extremely useful for musical toys, home appliances, communications equipment, computer peripherals and office equipment and instrumentation. This external drive unit has no internal circuitry.

Chip and Bead Inductors and Encased Piezo-Alarms

High Frequency Chip Inductors

These chip inductors consist of air-core chip inductors using subminiature alumina core as a bobbin. The self-resonant frequency characteristics yield the high Q and highly stable inductance at high frequencies that make these inductors ideal for use in the high frequency circuits of video and communications equipment. The outstanding solder heat resistance means both flow and reflow soldering methods can be used.

PC Mountable Piezo-Alarms with Internal Circuitry

These PC mountable piezo-alarms are completely self-contained requiring only a DC voltage source for operation. Providing the use with high audio outputs while requiring very low input power, they can be operated over a broad range of input voltages. Their small size, high reliability and low cost make them ideal for data processing equipment, electronic instrumentation, medical equipment, automatic control devices and cash registers.

*Also available as washable parts with tape covering the sound emitting hole and epoxy seal at the case bottom as custom order. Call for price and delivery.

Internal Drive Piezo-Alarms

These piezo-alarms are completely self-contained requiring only a DC voltage source for operation. Providing the user with surprisingly high audio outputs while requiring very low input power, they can be operated over a broad range of input voltages. -20°C to +60°C. Case material is Noryl and is rated UL-V1. Producing an extremely clear and penetrating sound which is audible through surrounding noises, the audio output reaches long distances. These units have compact size, light weight, no electrical noise, very low power consumption and operate over a broad voltage range. Wide application ranges including fire alarms, burglar alarms, gas detectors, automotive alarms, toys, games, machines, electrical appliances, automatic control devices, conveyors and medical equipment. 24 AWG leads.

Self-Drive Piezo-Alarms

PKM11

PKM25
PKM29

As the use of microprocessors in consumer products has become increasingly popular, so too has the use of piezo-alarms as the accepted means of audio alarm generation. Their ability to be driven by ICs, small size, low cost and high reliability, make them ideal for such applications. These units are equipped with a feedback tab for use with self-oscillating circuit designs. By utilizing the feedback, the part's individual resonant frequency is found to optimize sound pressure level. All mechanical and electrical components are designed to be compatible with most standard PC board assembly and wave soldering techniques. These units feature a unit with low cost and high sound pressure level in a small size with low input voltage and low current consumption. Some of the many applications are clocks, office equipment, machine tools, toys, games, automatic controlling devices, instrumentation, calculators, home appliances and smoke alarms. Operating Temperature: -30°C to +70°C. Operating Voltage: 3 to 20 V.

ENVIRONMENTAL

Temperature Cycle: ± 5 ppm max, 0 to 120° C, 3 cycles, 2 hours max each, 25 ± 2° C Ref.
Shock: 1000g's 0.35ms sec, half sine wave, 3 shocks each plane
Vibration: 10-55Hz, 1.50mm D.A., 55-2000Hz, 35G's, Duration - 12 hours.
Humidity: 85% relative humidity, at +85° C, 250 hours.

MECHANICAL

Gross Leak Test: All units 100% leak tested in De-ionized H₂O
Package: Hermetically Sealed
Seal Strength: 10⁻⁴ atoms cc/sec of helium
Bend Test: 9kgs max. force perp. to top and bottom.
Marking Ink: Will withstand max. bend 90° ref. to base 2X.
Solvent Resistance: Epoxy, heat cured.
Isopropyl alcohol, Trichloroethylene, Freon.

Also Available:

- Microprocessor Crystal Units HC-49 Short (AT Strip)
- Microprocessor Crystal Units Surface Mount - TT-SMD
- Clock Oscillators - Dual Output
- Clock Oscillators - Enable/Disable
- Clock Oscillators - ECL Compatible
- Clock Oscillators - HCMOS Compatible
- Voltage Controlled Crystal Oscillators - VCXO
- Temperature Compensated Crystal Oscillators - TCXO
- Monolithic Crystal Filters
- Ceramic Resonators - 200 to 800 KHz, 2.000 to 12.000 MHz

Raltron manufactures one of the most complete product lines of frequency management components including high quality crystal units, oscillators, filters, and ceramic resonators both through-hole and surface mount.

Because the product line is so complete, the inventory so large, Raltron and Allied can offer pricing that is always competitive, and often far lower than the competition.

B Series Filters

1 to 20 Amps; 115/250 Volts AC; 50-60 Hz

B Series RFI power line filters are general purpose low cost filters which provide effective line-to-ground RFI filtering in most applications. **Maximum Leakage Current (Line-To-Ground):** .5 mA at 115 VAC 60 Hz, 1.0 mA at 250 VAC 50 Hz.

Hipot Rating (1 Minute): Line-to-ground — 2250 VDC; Line-to-line — 1450 VDC. **Operating Frequency:** 50-60 Hz. **Rated Voltage:** 115/250 VAC. Low leakage models and higher maximum line amp units available as custom order.

K Series Filters

1 to 20 Amps; 115/250 Volts AC; 50-60 Hz

K Series RFI filters are general purpose filters which provide line-to-line filtering in addition to normal line-to-ground attenuation of RFI. Particularly suited where pulsed, continuous and/or intermittent RF interference is present in your application. **Maximum Leakage Current (Line-To-Ground):** .5 mA at 115 VAC 60 Hz, 1.0 mA at 250 VAC 50 Hz. **Hipot**

Rating (1 Minute): Line-to-ground — 2250 VDC; Line-to-line — 1450 VDC. **Operating Frequency:** 50-60 Hz. Low leakage models and higher maximum line amp units available as custom order.

R Series Filters

1 to 10 Amps; 115/250 Volts AC; 50-60 Hz

The dual-T filter design of the R Series makes these filters effective with low impedance motor loads. The 1- and 3-amp versions have an insertion loss as low as 54 dB at 150 kHz. These dual-section filters provide positive RFI control of line-to-line as well as line-to-ground noise. Small in size, designed for computer peripheral and a wide variety of other critical applications. **Maximum Leakage Current (Line-To-Ground):** .5 mA at 115 VAC 60 Hz, 1.0 mA at 250 VAC 50 Hz. **Hipot Rating (1 Minute):** Line-to-ground — 2250 VDC; Line-to-line — 1450 VDC. Low leakage models and higher maximum line amp units available as custom order.

Rating (1 Minute): Line-to-ground — 2250 VDC; Line-to-line — 1450 VDC. **Operating Frequency:** 50-60 Hz. Low leakage models and higher maximum line amp units available as custom order.

H Series Filters

3 to 10 Amps; 115/250 Volts AC; 50-60 Hz

All H Series filters are for use in both patient care equipment and nonpatient equipment and meet UL 544 requirements. In addition, the 56EH4C incorporates a separate ground circuit inductor to isolate the equipment chassis from power line ground at RF frequencies. **Maximum Leakage Current (Line-To-Ground):** .2 µA at 120 VAC, 60 Hz; 5 µA at

250 VAC, 50 Hz. **Hipot Rating (1 Minute):** Line-to-ground — 1500 VAC; Line-to-line — 1450 VDC. **Operating Frequency:** 50/60 Hz. **Rated Voltage:** 120/250 VAC.

†All SEV Approved except 10EH Series.

W Series

1 to 10 Amps; 115/250 Volts, 50-60 Hz

6, 10 Amp

20 Amp

Typical Dimensions. Fastons: 250 (4) Holes: 87 Dia. Mounting Holes: 188 Dia. (2) Solder Tabs: 67 x 15

The W series filters will protect equipment from malfunctions due to conducted interference coming into the equipment from the line, especially line-to-line noise and transients. In addition, the W series filters combine line-to-ground interference rejection filters with additional circuitry designed to reduce line-to-line transients. They are also effective to control emissions in equipment using SCR and T2L circuits, for compliance with FCC Part 15, Subpart J, and VDE 0871,

Level A, down 150 KHz. The W series provides an N=4 line-to-ground impedance for common mode and an N=5 impedance for line-to-line differential mode interference. They are designed for use when equipment impedance at RF frequencies is high. The two-stage construction provides excellent suppression at high frequency. The W series filters are particularly effective when applied in equipment using switching power supplies.

EEA Series Filters

1 to 10 Amps; 115/250 Volts, 50-60 Hz

Note: Specify line cord #80-1245 below to mate with IEC connector.

The EEA Series are a new generation of compact RFI filters with IEC socket. Totally new in design in both the internal structure and manufacturing process make this new series cost effective and compact. The EEA series supercedes the EF series by providing superior performance, particularly in the common mode at low frequencies. Mechanically, its slimmer size makes it compatible with all similar filters in the market. Quarter inch fastons in line in the EEA1 offer versatility when behind the panel room exists. The EEA2 with the quarter inch fastons at a right angle to the IEC connector allow for a

shorter tip-to-tip length. The P style models are PC board mountable offering compact size and direct to board connection. Models with 4-inch wire leads available as custom order parts. **Maximum Leakage Current (Line-to-Ground):** 0.25 mA at 120 VAC 60 Hz; 0.42 mA at 250 VAC 50 Hz. **Hipot Rating (1 Minute):** Line-to-ground — 2250 VDC; Line-to-line — 1450 VDC. Uses line cord 80-1245 below.

Mounting Diagram
Recommended Panel Cutout

Note 1: Jumper required if only SPST Power Switch is used. Note 2: Jumper required if no input filtering is used. Note 3: Use only 120V and 240V positions for 2-volt selection units. Note 4: Fuse cover door shown in open position. Note 5: Standard units mount in panel thickness of .060-.090".

J Series Voltage Selecting and Fused Connector is designed for the equipment manufacturer who markets a product worldwide. While incorporating a fuse holder and a standard IEC power line connector, the J Series also features a unique voltage selector card which enables an easy means to change transformer primary connections. Integral fuse holder, line side, accepts .25" x 1.25" fuse. Meets UL/IEC requirements per CEE publication 22 Type VI. Connector back terminals

suitable for soldering, wire wrapping or crimp-on lugs such as MOLEX #2123. **Maximum Leakage Current (Line-to-Ground):** at 250 VAC 50 Hz; 5 microamps (6VJ1); 0.5 mA (6J4). **Hipot Rating (1 Minute):** Line-to-ground — 2000 VAC (6VJ1) and 2250 VDC (6J4); Line-to-line — 2150 VDC (6VJ1) and 1450 VDC (6J4). Construction meets IEC 161 category 10/70/21. The J1 version is unfiltered while the J4 model houses a built-in filter.

Stock No.	Mfr.'s Type	Dimensions — Inches (mm)			Max. Line Amp	EACH

* Leads Without Fastons.

** Stud Terminals Without Fastons.

858 Series High Performance IEC Filters

A high performance general purpose filter with an IEC connector providing effective EMI suppression on line-to-line and low frequency line-to-ground noise.

Stock No.	Mfr.'s Type	Corcom P/N	Amp Rating	Size L x W x H	EACH	
					1-24	25-99

ST* Connectors

The 3M® ST* Connector product line provides high repeatability and low light loss for premises, LAN and telco applications. The improved 3M connector design is compatible with the AT&T ST* connector product line as well as the Premise Distribution System (PDS) components and other ST* connector products. The 3M products are supplied with a high quality PC finish on zirconia ceramic ferrules.

FC/PC3 Connectors

The new 3M brand FC/PC3 Connector has been designed to combine the best features of the 3M FC/PC 1 (field mountability) and the 3M FC/PC 2 (pull-proof design) into one versatile connector design that is fully compatible with all FC Connectors adhering to the NTT specification. The FC/PC 3 incorporates 3M pre-radiused PC zirconia ceramic technology to provide high optical performance and minimize reflected power to -50 dB on factory polished cable assemblies. The ferrule is independent of the backbone so that a pull on the jacketed connectorized cable will not cause the ferrule to break optical contact with a second ferrule in a connection.

FC/PC3 Connector

SC Connectors

3M has simplified the design of the SC connector to enhance performance and cable retention, and provide a readily field mountable connector. The connector is fully compliant to the NTT, JIS, ISO/IEC, and TIA/EIA component and ISO/IEC, CENELEC, ANSI, TIA/EIA-568A and BICSI system and cabling level standards. The 3M SC Connector has a rectangular push-pull coupling mechanism for easy insertion and high repeatability.

89-Series .100" x .100" IDC Socket Connectors

— NEW —

- ▶ Pre-Assembled Connector Body
- ▶ Pin One Indicated With A Red Stripe
- ▶ Double-Rescued Cover Supports Cable Termination From Either Side Of Connector
- ▶ UL 94V-0, Gray
- ▶ 28 AWG Stranded
- ▶ Contact Plating: Wipe Area — 30 µ" Gold; Under Plate — 100 µ" Nickel
- ▶ Polarizing Center Bump
- ▶ UL File No.: E68080; CSA File No. LR40971

These high-quality, standard-performance IDC sockets minimize applied assembly costs without sacrificing reliability.

.100" x .100" PCB Connectors

Fits standard .100" x .100" header layout. Two row style uses less board area than 4-row design. Accommodates Wire Sizes: 26 AWG solid or stranded; 28 AWG solid or stranded; 30 AWG solid. Current Rating: 1 amp. Insulation Resistance: >1 x 10⁹ ohms @ 500 VDC. Temperature Rating: -55°F to +105°F.

"D" Subminiature Connectors

Connectors are fully compatible with all .050" spaced flat cables with 26 and 28 AWG solid/stranded or 30 AWG solid wire. The low profile tin-plated metal shell ensures long-term reliability and EMI/ESD reduction. Pins and wiping leaf are plated with 30 µ gold. **Mounting Style:** 6000 Series — through hole; 6003 Series — 4-40 threaded insert.

.100" x .100" Plug Connectors

Plug connectors are made of polybutylene terephthalate, with a flammability rating: UL 94-V0. Connectors accommodate 26-28 AWG, solid or stranded, or 30 AWG wire. (Adhesive cover comes with connector; strain reliefs, ejector latches, and polarization keys optional.)

89-Series D-Sub Connectors

— NEW —

- Pre-Assembled One-Piece Body
- For 26 and 28 AWG Solid or Stranded
- UL 94V-0, Gray
- Mounting Style: Through-Hole
- Contact Plating: Wipe Area: 15 µ" Average Gold Over Nickel
- Accepts .050" Flat Ribbon Cable and Discrete Wire

These standard-performance D-Sub Connectors are designed to reduce costs and save assembly time.

Card Edge Connectors

Rugged overall construction and bifurcated beryllium copper contacts, plated with 30 µ" gold, in the card wiping area, provide high reliability in performance and assembly. All sizes are available with slotted flange, hole flange or without flange.

.050" x .100" Mini, Latch/Eject Headers Straight, Four Wall

- 50 Mil x 100 Mil Doubles Board Density
- Latch and Eject for Rugged Applications
- Tripolarization to Mini Socket — High Walls to Protect Pins
- Two Row Design Saves Board Space
- Color: Gray

2 mm Vertical Boardmount Sockets

- High Temperature Dielectric
- IR, Vapor and Wave Solder Compatible
- Industry Standard Compatible
- Minimizes PC Board Stacking Heights
- End Stackable and Side Stackable
- Color: Natural
- Contact Material: Beryllium Copper

Solder Splice Connectors

A unique one-step system for reliable splicing, the 3M Solder Splice Connector represents a breakthrough in wire splicing and connecting technology. In one easy step, multiple wires can be soldered, insulated and environmentally sealed. This system does not require a crimp tool, just a standard heat gun designed for solder-type connectors. The 3M Solder Splice is ideal for harness fabrication in a variety of industries.

- Aerospace
- Automotive
- Military Appliance
- Marine Off-Road Vehicles

Scotchlok™ 2 Wire Connectors

- Rounded Wings Make Twisting Easier
- Unique Design Incorporates A Long, Flexible Skirt and Rigid Top. Flexible Skirt Covers Over-Strips and Protects Conductors, and Yet Conforms To Take Up Less Room In A Box
- Unique Spring Grip Expands To Accept A Wide Range Of Wire Sizes
- Rated To 600 Volts

3M Scotchlok™ 2 wire connectors make wiring faster and easier.

Scotchlok® Electrical Spring Connectors

The original color-coded wire connectors, featuring three-part construction with live spring action for outstanding performance. Flexible vinyl insulator won't cut or abrade wire. Steel inner shell allows for spring expansion/contraction to compensate for heat rise. Flared design aids wire insulation.

IDC Electrical Connectors

No strip, no twist — just squeeze. These IDC connectors have productivity built right in, reducing wire waste on the job. No special tools are needed. Make quick work of tap, inline and pigtail connections. Connectors are constructed of flame retardant materials. (For use on copper conductors only).

Solderless BreadBoards — NEW — (300 Series)

- Simply Plug In Components and Interconnect with Ordinary 22-Gauge Solid Wire; Time Consuming Soldering Is Eliminated and All Components Can Be Used Again and Again
- Alpha-Numeric Identification Along the Strips Allows for Fast and Easy Layout Designs and Project Applications; Every Tie-Point Position on the Strip Can Quickly Be Identified by a Letter and Number Combination
- 3M Jumper Wires Are Included
- DIPs of All Sizes and a Wide Variety of Discrete Components with Lead Diameters of Up to .032" Can Be Used
- The Sturdy Metal Base Plate Serves as a Ground Plane to Help Minimize Noise and Voltage Spikes in Today's High-Speed Circuits
- By Jumping Across the Center Area, Full-Length Distribution Buses Can Be Created Vertically
- Use the 5-Way Binding Posts for Easy Connection to Ground, Power Supply, and other External Equipment

3M Series 300 Breadboards incorporate state-of-the-art techniques in design and fabrication to yield a circuit-building system with unparalleled flexibility and reliability. A voltage distribution system is integrated with the basic component breadboarding matrix, and 5-way binding posts provide the interface for connections from the power supply, signal generators or other external equipment. All models incorporate the 3M laboratory-proven multi-tie-point terminal design for convenient, solderless, plug-in circuit building. Each terminal position contains electrically connected tie-points spaced on a continuous .100" matrix to accept any component with .100" lead spacing as well as components whose leads can be dressed to fit. The surface of the steel base is high gloss baked enamel for protection. Rubber feet prevent sliding during bench work.

Stock No.	Mfr.'s Type	Model	DIP Capacity Up To	Total Tie Points	No. of Binding Posts	Dim. (In.)		EACH

Super-Strips and Circuit Strips

Super-Strips and Circuit Strips give all the advantages of terminal and distribution strips in a single unit. They can be used alone or grouped with any other of ESM's solderless breadboarding strips. Circuit Strip has about three-fourths the capacity of Super-Strip. Super-Strip has a molded-in alpha-numeric grid for faster and easier identification of tie-points. All sizes of DIPs and discrete components with lead diameters up to .032" can be accommodated. Use solid hookup wire for interconnections; #22 AWG is recommended. They can be permanently mounted with the integral non-shorting instant-mounting backing or mounted with screws on panels up to 1/8" thick. Hardware and mounting templates are provided with every strip.

Stock No.	Mfr.'s Type	Tie-Pts.	DIP Cap.	Size (In.) A x B	No. Buses	Terminals	EACH

ZIP DIP Sockets

Designed for applications where field replacement or programming of DIPs is required. The patented ZIP (zero insertion pressure) feature uses screwdriver rotation of a cam for security against vibration or accidental unloading. Leads are on .100" centers.

Jumper Wires

- For Quick, Neat Circuit Connections

Speed your circuit building even more. Each wire is stripped 1/4" and bent 90° on both ends for easy insertion. All Jumper Wires are PVC insulated #22 AWG solid, tinned copper and are recommended for use with all solderless breadboarding units from ESM.

SOIC* Test Clips

Now normally hard-to-access SOICs can be connected to test probes quickly and easily without the risk of shorting out chips or damaging other board components. SOIC test clips are available in different pin sizes to accommodate a wide range of requirements. Industry standard .025" square contact pins on .050" centers are staggered to permit easy attachment of IDC socket connectors or wire wrapping and help prevent shorting of adjacent probes. With

these smaller test clips, you can stack SOICs as close as .050" end-to-end. Like our other test clips, the SOIC series features heavy duty helical compression springs that provide firm, positive contact pressure, an insulating contact comb to prevent accidental shorts and a patented wiping action to ensure integrity in testing. The steel hinge pin and tough glass-filled polyester body, UL rated 94V-0, provide long service life. Available in gold or alloy 764, SOIC test clips from 3M offer solutions for all your test and prototype needs.

Logical Connections

Logical connections are ideal for connection of remote testing equipment to DIP circuitry. On one end a connector-compatible test clip is mated with a pair of single row socket connectors. 1 1/2" cable loop between connections "A" and "B" allows for free actuation of the test clip. Probe holes in the backs of all connectors provide access to individual lines. Connectors are molded onto cable ends for optimum electrical integrity and rugged strain relief. Available unterminated or with DIP connector on remote end of the 18" flat ribbon cable. Each unit is a complete, tested and ready-to-use assembly.

DIP Termination. Logical Connections (Test Clip and Dip Plug)

Intra Connectors

The Intra-Connector allows access to previously inaccessible lines. In use, the connector is interjected between mating system connectors to provide external pin contacts that can be probed individually or connected to another cable assembly; pins also can be used to facilitate daisy chaining from a single connector end.

PLCC* Test Clips

Our new Surface Mount Test Clip is truly the state-of-the-art for testing Plastic Leaded Chip Carrier (PLCC) style integrated circuits. The unique action wedge design — with all four sides opening simultaneously — provides a faster and easier attachment to the PLCC. The helical compression spring and insulating contact combs ensure integrity in contact when testing. Our narrow body design allows components to be tested with as little as .100" lead-to-lead spacing, side stackable at .200" lead-to-lead spacing. Probe access points are immediately visible for fast and safe individual lead testing, while

staggered contact rows on .100" centers allow for easy probe attachment and help prevent accidental shorting of adjacent probes. Industry standard .025" square contact pins permit easy attachment of female socket connectors or wire wrapping.

DIP Test Clips

The narrow-nose design makes it easy to attach on high-density boards, fits onto ICs with only 0.1" between leads and adjacent components. "Duck bill" contacts are flat, won't roll off IC leads. Open-nose construction enables probe at IC leg. Pin rows are offset for easy attachment of probes. "Contact comb" construction separates contacts with precision. No shorts. Heavy duty, industrial-grade springs for firm contact pressure. Steel pivot pin. The standard models have "nail-head" leads which keep probes and test leads from sliding off. The connector-compatible models have headless leads .025" long to allow attachment of cable assemblies (see Logical Connections on this page). Leads are .031" in diameter on .100" centers on both models.

"Crimp" BNC Connectors

Identical to standard solder-type BNC's up to 500 MHz. Connectors may be used with other than 50-ohm cable for non-impedance match. Rated 500 Volts maximum. Impedance, 50 ohms, VSWR, 1.25:1 maximum (Straight Plug and Jack). Cable retention strength equal to cable braid. Center contact is soldered; braid may be soldered or crimped. Delrin dielectric. Connector is brass, center pin is silver plated; other parts nickel-plated. **Note:** These connectors are made to commercial standards — not for MIL use.

Type N Coaxial Connectors

Medium size, threaded coupling units may be used in systems up to microwave frequencies. SWR is consistently low. Rated 500 Volts peak. Impedance, 50 ohms. Plated to take constant handling. Connector installation is easy, especially in tight spots.

DIN Rail Mount Terminal Blocks

Standard terminal blocks feature a universal foot for mounting on 35 mm or 32 mm DIN rail. Ground Blocks are designed for either 35 or 32 mm rail, as indicated by the suffix in the Mfr.'s Type No. High density design features screw-cage clamps for reliable connections. **Material:** Polyamide 6.6. **Ratings:** 600 V or 300 V. UL, CSA, IEC/VDE.

Select the appropriate terminal block for your application from TABLE I using the SELECTOR ILLUSTRATION (SI#) shown opposite. Choose the accessories required for each terminal block selection from TABLE II, also using the SELECTOR ILLUSTRATION.

Marking Tags

Give a professional look to every job, large or small, standard or special with Altech's comprehensive Marking System. Marked terminal blocks increase wiring efficiency, save installation time and make wire hook-up, system modifications and troubleshooting quick and easy.

SB and BSTR

Push-on tags are available in two widths and fit most DIN rail mount and panel mount terminal blocks. They can be inserted individually or in strips of ten to speed installation. BSTR Tags are extra large for multiple digits or large markings. They are available blank for hand marking or imprinted. Standard tags are white with black imprint, marked consecutively or with identical numbers, horizontal (W) or vertical (V). Refer to Table I on page 162 to determine which tag can be used on each terminal block type. A package contains 10 strips of 10 tags.

TME

Top marking strips snap onto the tops of terminal block assemblies to provide a wide surface for multi-character markings. They can also be used as protective covers for internal jumpers. Strips are supplied blank for hand marking or computer imprinted labels. Supplied in .5 m (19.7") lengths which cut easily.

Ferrules

Fig. 1 — Insulated

Fig. 2 — Uninsulated

Fig. 3 — Dual Wire Insulated

Insure reliable electrical connections and prevent fraying and breaking of wire strands when terminating conductors in screw clamp terminal blocks. Insulated ferrules have molded-on plastic sleeves and prevent conductor breakage due to bending, wire stress or vibration.

Eurostrips®

Compact, easy to use double row tubular screw terminal strips are a safe, cost effective alternative to barrier strips. Ideal for HVAC, appliance, power distribution and more. Dead front design. Supplied with wire protector. White polyimide 6.6 housing. Strips are easily cut to the desired number of poles.

TS1.5 Flat Base. 300 V, 15 A, 20-14 AWG.

Pole Spacing: 8 mm (.32"). **Mounting Hole Diameter:** 2.8 mm (.11"). **Width:** 18.2 mm (.72").

Panel Mount Terminal Blocks

► **High Density, 50 or 60 Terminations Per Foot**

► **Screw-Cage Clamp**
► **Accepts Standard Marking Tags**

Compact and convenient to use where space is a constraint. Cost effective sectional design allows for changing requirements. Order preassembled or easily snap together single pole components to form multipole assemblies. Mounting sections snap onto ends of assembly or between terminal block components to provide additional mounting points.

BKA assemblies accept external jumpers while RKB4 assemblies feature an internal bussing provision to distribute power selectively or throughout the assembly.

BKA2.5 Terminal Block Components (1 Pole) and Assemblies (2 Poles and Up)

Pole Spacing: 5mm (.197"). 22mm (.87") wide x 23mm (.91") high; 300V, 20A, 22-12 AWG.

For individual jumpers see DIN Rail Mount Terminal Blocks and Accessories Table II, Type RKD4.

Printed Circuit Board Terminal Blocks

Fixed — Tubular Screw Clamp Design

- Front, Top Wire Entry
- Up to 15 A, 300 V, 28-16 AWG

- Modular and Single Mold
- Standard Color: Gray

Use for cost sensitive applications where infrequent wire terminations are expected. UL, CSA, IEC/VDE.

Top Wire Entry

AK555. 3.5 mm (.138") Pin Spacing, 6 A, 300 V, 28-16 AWG. 6.5 mm (.26") high, with wire protector. Subminiature design provides small footprint and the highest circuit density available. 0.9 mm (.035") dia. Round Pins. **Color:** Gray.

Printed Circuit Board Terminal Blocks

Fixed — Screw-Cage Clamp Design

- ▶ Front, Top, 45° Wire Entry
- ▶ Up to 15 A, 300 V, 26-12 AWG

- ▶ Single, Double Levels
- ▶ Modular Construction

Ideal for industrial applications where frequent wire terminations occur. UL, CSA, IEC/VDE.

Front Wire Entry

Printed Circuit Board Terminal Blocks

Fixed — Spring Clamp Design

- 45° Wire Entry ► Standard Color: Gray ► Sectional Construction

Ideal for industrial applications where frequent wire terminations occur. UL, CSA, IEC/VDE.

Spring Clamp is screwless simplifying wire termination and saving time. Strip wire, open spring clamp, insert wire, close clamp. Sectional design, order multiple assemblies (up to 50 poles) or easily snap together single pole terminals and end plate. 5 mm (.197") nominal pin spacing, adjustable to 5.08 (.200"). Stainless steel spring. **Standard Color: Light Gray.**

Three Methods of Clamp Actuation: AK3000 — Without actuator lever, using a 3 mm (.118") wide screwdriver tip; AK3001KD — With actuator lever, push on lever with screwdriver tip to open clamp; AK3001FD — With finger operator actuator lever, push on lever with finger to open clamp.

AK3000. 5.0/5.08 mm (.197/.200") Pin Spacing. 10 A, 300 V, 22-12 AWG. †
12.9 mm (.51") high, 0.7 mm (.03") Square Pins. **Color: Light Gray.**

Printed Circuit Board Terminal Blocks

Econo Pluggable — Tubular Screw Clamp Design

- 10 A, 300 V, 22-14 AWG ► Standard Color: Gray

Cost effective plug and header design for light duty applications where infrequent multiple wire-to-board connections will be made. UL, CSA, IEC/VDE.

Straight open pin headers feature break-away construction and are supplied in lengths up to 24 poles.

AK130. 5 mm (.197") Pin Spacing. 10 A, 300 V, 22-14 AWG.

Wire entry perpendicular to plug in direction, modular construction, interlock 2 and 3 pole modules to create multipole assemblies. 10.8 mm (.43") high. **Color: Gray.** Mate with STL130, STL132 Straight Pin Headers (Right Angle Headers are available).

Printed Circuit Board Terminal Blocks

Industry Standard Pluggable — Screw-Cage Clamp Design Plugs

Wire Entry

- ▶ Perpendicular to Plug-In
- ▶ Same Direction as Plug-In
- ▶ Same Plane and Direction as Plug-In

Headers

- ▶ Vertical, Horizontal, 45°
- ▶ Open or Closed Ends
- ▶ Single or Double Level

For industrial applications and/or applications where frequent wire terminations occur. Single mold offers maximum strength. Plugs mate with shrouded headers listed on page 170. UL, CSA, IEC/VDE.

Wire Entry Perpendicular to Plug-In

BU02 Plug. 5.08 mm (.20") Pin Spacing. 15 A, 300 V, 22-12 AWG. Vertical construction with grip top makes insertion and removal easy. Wire entry perpendicular to plug-in direction on locking tab side. Mate with STLZ950, STLZ955, STLZ970, STLZ975 and AKZ990 headers. **Color:** Green.

Interface and Electronic Modules

Expand the capabilities of logic systems with Altech Interface and Electronic Modules. DIN rail or panel mount printed circuit board modules give design flexibility and simplify panel

layout, reduce maintenance and downtime.

Ribbon Cable to Discrete Wire Modules — Fig. A

Interface between multiwire flat cables with up to 64 conductors and discrete wires. No special tools are required. Supplied with short strain relief ejector latches (long latches available). Terminal blocks are individually marked to correspond to the numbers on the header pins. 3 A, 250 VAC, 22-12 AWG. DIN rail mount, panel mount available.

Stock No.	Mfr.'s Type	Part No.	Poles	Length (L) mm (In.)	EACH

Sub D Modules — Fig. B

Interface between high density connectors with up to 50 poles and discrete wires. No special tools are required. Equipped with male or female connectors. All terminal blocks are individually marked to correspond to the numbers on the connector pins or sockets. 4 A, 250 VAC, 22-12 AWG. DIN rail mount, panel mount available.

Modules with Sub-D Female Connectors

Miniature Relay Modules with Relays — Fig. C

Traditional relay interfaces in a high density package. Protect equipment devices and components from feed-back and cross-system overvoltages by isolating electrical and electronic circuits. Bussed or isolated coil circuits. Supplied with relays or with sockets only. Indicator and DC protection diodes. Available up to 220 VDC, 330 VAC with coil circuits. Contact circuits rated 260 V, 8 A (SPDT) or 6 A (DPDT) or 15 A (SPDT isolated only); 22-12 AWG. DIN rail mount, panel mount available.

I/O Opto Carriers — Fig. E

Mount standard optocoupler input/output (I/O) modules in a high density arrangement for logic output to field devices, or for input of field data to the controller. Altech I/O carriers can accept up to 16 industry standard .6" (15.24 mm) I/O modules in any combination — input, output, AC or DC from most manufacturers. 1, 2, and 4 isolated position versions with 5, 15 and 24 VDC logic; and 4, 8 and 16 bussed versions with 5 to 24 VDC. DIN rail mount, panel mount available.

Diode Modules — Fig. F

Wire individually labeled diodes into existing circuits for freewheeling, DC inductive kick suppression (commutating), reverse DC polarity protection, etc. Used bussed diodes for distribution of logic VCC or ground, or gather and decouple electrical signals for lamp testing or collective fault messages. Use as commutating diodes across inductive loads such as DC relays, solenoid valves, actuator magnets, etc. to suppress voltage surges. Standard modules include series connection diode circuits in 1 A versions, and diode gates with bussed anodes or cathodes. DIN rail mount, panel mount and 3 A diodes available. Can be ordered as Component Carriers without diodes.

CPC Connectors provide a substantial savings in weight and cost through the use of a plastic shell and a wide variety of pin and socket contacts. The various sizes and densities are supplied unloaded (without contacts). Recognized under the component program of Underwriters Laboratories, Inc. for 250V service. UL File No. E28476. CSA Certified File No. LR 16455.

Series 1. Standard density, multimate contacts for normal unsealed operations. **Materials:** 94V-1 rated, heat stabilized, fire resistant, self extinguishing black thermoplastic. (Contacts not included—order as a separate item).

Standard Sex Connectors are plugs with socket contacts, and receptacles with pin contacts. (Contacts Sold Separately).

Series 2

High density connectors for normal unsealed applications. These connectors accept Size 20DM (screw machined) and Size 20DF (precision formed) pin and socket contacts with a .040" (1.02 mm) diameter that are also used in D-Sub Connectors. Contacts can be either crimp or solder cup types and are sold separately. Cable Clamps are the same as for the same size of Series 1. Contacts, crimp tools, and insertion/extraction tools are listed with D-Subs on page 176.

Metal-Shell CPC Connectors

The four series of Metal shell CPC connectors require the same contacts and tools as like series of Circular plastic connectors. As with CPC, contacts are sold separately. Because of the larger size, a different series of cable clamps are offered. **Materials:** Insert: Black thermoplastic. **Shells and Coupling Ring:** Aluminum alloy, zinc-plated. **Retainer Ring:** Stainless steel.

Series 1. See circular plastic connectors for multimate contacts and tools.

AMP Power Lock Connectors have hermaphroditic housing and contact designs. The hermaphroditic housings are also modular in design and permit the clustering of connectors of the same series. Housings are made of impact resistant thermoplastic with stainless steel locking springs for contact stability. Terminals are available in strip and loose piece form with a material choice of silver, or gold plated copper. Contacts for Series I Connectors accept a wire size range of 18-12 AWG and contacts for Series II Connectors

accept a wire size range of 10-6 AWG. Both insert easily into housings where integral locking springs provide positive retention.

AMP Power Lock Connectors can be adapted to most high current applications and may be used as free-hanging, surface mounted and thru-panel mounted connectors, or when posted contacts are used, they can be used on printed circuits.

"D" Type Connector Kits

Contained in a rugged steel carrying case. Extra compartments allow customizing of kit. Replacement parts are available from stock.

Model 787053-2. RS232 type kit contains: 100 pin and 100 socket contacts, 6 25-position zinc receptacles, 18 25-position zinc plugs, 14 25-position cable clamps, an extraction tool, a crimp tool, and 25 4/5" cable ties.

512-9122 EACH 163.80

Model 787054-2. RS449 kit contains: pins and sockets (200 each); 9, 15, 25, and 37-position zinc receptacles (3 of each); 9, 15, 25, and 37-position zinc plugs (6 each); 9, 15, 25, and 37-position clamps (6 each); 100 4/5" cable ties. Also includes 4 extraction tools and 1 crimp tool.

512-9123 EACH 219.06

Male Screw Retainers

Kit contains 2 male-screws and 2 clips. Screws are made of zinc-plated steel with a yellow or clear chromate finish. Retaining clips are made of zinc-plated steel. Type 205980-1 for metal shell connectors. Type 745647-1 for all plastic connectors. All parts packaged unassembled. Thread size 4-40.

Stock No.	Mfr.'s Type	Description	Screw Length	SET/2

512-9055	745647-1	For all plastic D-sub	.220"	.61	.45	.37

Locking Posts

Kit contains 2 complete post assemblies. Constructed of cold-rolled zinc plated steel, 4-40 threaded. Size: .416" long.

100-499	SET/2 1.38
512-9080, Type 206514-1, 1-99	SET/2 1.55
500-999	SET/2 1.26

Female Screw Locks

Female screw locks for use with either metal or plastic connector shells. Available in square or hex nut types; short, standard, or long sizes. Each kit contains 2 female screw lock assemblies. All parts packaged unassembled. Includes female screw lock screw, two flat washers, lockwasher, and hex or square nuts.

All AMP QuietLine filter products offer proven, rugged performance to eliminate unwanted EMI/RFI. They assist in meeting design requirements of FCC Part 15 (A & B), VDE, and VCCI requirements, and are interchangeable with standard industry interfaces.

Distributed Element Filters

Current Rating (Max.): Load current (in connector), #20 contact — 7.5 amps (loose-piece filters — 15 amps); RF current — 0.3 amps. **Operating Voltage (Max.):** 100 VDC at -25°C to +85°C. **Dissipation Factor:** 0.1 max. **Dielectric Withstanding Voltage:** 250 VDC for five seconds. **Insulation Resistance (Min.):** 500 megohms, minimum at 100 VDC, 2 minutes and +25°C. **Direct Current Resistance:** .002 ohms max. **Filter Sleeve:** Ferrite and ceramic.

Tubular Capacitive Filters

Current Rating (Max.): Load current, #20 contact — 5 amps; RF current — 0.3 amps.

Plug/Receptacle D-Sub Adapters

Distributed Element Filters

Material and Finish. Shell: Steel, tin plated. **Insert:** UL rated 94VO thermoplastic. **Contact:** Pin-brass, socket-phosphor bronze, plated .000015 (0.00038) min. gold in contact area, plated tin/lead on termination end.

Loose-Piece Filters

Quiet Line loose-piece filters are especially suited to the cost/performance requirements of commercial electronic equipment. Typical applications include mobile radios, transducers, microprocessors, computer peripheral equipment and communication equipment.

Eyelet Style

Recommended Mounting Hole: .117^{+0.002} (.297^{+0.005}) (#32 drill). **Material and Finish. Contact:** Copper alloy 260, plated .000015 (0.00038) min. gold per MIL-G-45204, Type I, Grade C over .000070 (0.00178) min. nickel per QQ-N-290. **Eyelet:** Copper alloy per QQ-B-626 plated .000015 (0.00038) min. gold per MIL-G-45204, Type I, Grade C over .000070 (0.00178) min. nickel per QQ-N-290. **Solder:** SN10 per QQ-S-571. **Filter:** Ferrite and ceramic.

8-32 Bolt Style

Supplied with lockwasher and nut except as noted. ***Recommended Hole Sizes:** DA, DB, DD and DF Types — .177^{+0.002} (4.5^{+0.05}) dia. (#16 drill); DC, DE and DG Types — 8-32 UNC-2B. **Material and Finish. Contact and Bolt Body:** Copper alloy 260, plated .000100 (0.00254) min. silver per QQ-S-365 over .000050 (0.00127) min. nickel per QQ-N-290. **Filter:** Ferrite and ceramic.

12-32 Bolt Style

Supplied with lockwasher and nut. **Recommended Hole Size:** .228^{+0.002} (5.79^{+0.05}) dia. (#1 drill). **Material and Finish. Contact and Bolt Body:** Copper alloy 260, plated .000100 (0.00254) min. silver per QQ-S-365 over .000050 (0.00127) min. nickel per QQ-N-290. **Filter:** Ferrite and ceramic.

Z-Pack 2 mm FB (Futurebus+) Connectors

- Complies with Futurebus+, EIA IS 64 and IEC1076-4-0X (48B) Specifications
- "Cold Hold" Retention of Receptacles Provides Positive Placement. No Special Tooling Required, No Secondary Operations, No Heat Required...All Resulting in Lower Applied Cost
- Integral Lead Organizer Molded Into Receptacle Housing Aligns and Maintains Lead Position, Thus Improving Overall Manufacturability
- Receptacles Require No Special Application Tooling, Minimizing "Up Front" Investment and Simplifying Manufacturing Processes
- Sturdy Receptacle Leads Protected by Plastic to Minimize Potential Damage Before and After Application
- Receptacles and Pin Headers Offer Solder Leads, as Well as Solderless Compliant Press-Fit Leads

Single Crimp

Dual Crimp

Hex Crimp

Coaxial Connectors

AMP BNC RF connectors have bayonet-lock coupling. AMP's exclusive single and dual crimp terminations insure positive insulation grip and require absolutely no soldering. They provide termination at the lowest overall applied cost. **Rating:** 500 volts (RMS). **Frequency:** 0-2.5 GHz for single crimp; 0-2 GHz for 75 Ohm; 0-4 GHz for all others. Crimping tools for the connectors are listed on page 188. **Style:** Mil Type or Commercial (Com.).

BNC Right Angle Plugs (50 or 75 Ohms)

Standard single (S), dual (D), and hex (H) crimp termination plugs. Contact plating is gold (G), silver (S), or tin (T). Body plating is nickel (N) or silver (S). The dielectric is polyethylene (PE), polymethylpenilene (PM), polypropylene (PP) or teflon® (T).

SHV Connectors

Safe-tested at 5000 volts DC. Looks like, but isn't interchangeable with other bayonet-type connectors. Comply with Bureau of Standard's specification ND-545. Polarized center contacts that are recessed in the dielectric.

50 And 75 Ohm SMB Connectors

SMB Product Facts

- ▶ SMB Offers Snap-Fit Coupling for Quick Connect/Disconnect
- ▶ Choice of Commercial or MIL-Type Connectors
- ▶ 50 and 75 Ohm MIL-Type Connectors Available
- ▶ Screw Machined Components for Highest Performance

- ▶ Straight Plugs and Jacks are Completely Crimp Terminated
- ▶ Fast Easy Cable Assembly
- ▶ Low VSWR
- ▶ Standard Military, Commercial or AMP Tooling

- ▶ MIL-Type Connectors Offer Consistent Mating and Unmating Forces
- ▶ Dielectric: Teflon

Panel Mount Connectors

- Easy Cavity Identification
- Locking Devices are Integral Part of Design, Connector Halves will Hold Together Under Severe Conditions of Vibration and Shock
- Built-In Contact Stabilization and Self-Aligning Features
- Hot Side Egg Crate Design for Safety

- Precision Molded to Exacting Tolerance
- Recommended Panel Thickness, .025"-.065" (.064-1.65 mm)
- Natural Color UL 94V-2 Rated Nylon — Fully Polarized
- UL Rated for 250 V AC or DC

Free Hanging Connectors

This version of the MATE-N-LOK® Connector provides all the quality features of the panel mount, yet was designed for free-hanging installations. The 2, 3, and 4 circuit configurations feature detent locking housings while the 6, 8, and 10 circuit configurations utilize positive lock housings. A single circuit connector is available with an option of detent or positive lock housings. The multiple circuit connector is available with an option of detent or positive lock housings. The multiple circuit configurations are polarized to assure proper electrical connections.

Motor Mount Connectors

— NEW —

- Positive Lock
- Dual Row
- UL 94V-2 Nylon, Natural

Mounting Information: 1. Recommended panel thickness "E" is .040"-100" (1.02-2.54 mm) and is dependent on "T" and "R". 2. The pin housing must be inserted in a rocking manner; 3. The panel must be punched so that the housing enters the panel in the same direction as the punch. Note: Motor mount housings may be used in flat panels.

MR (Mini. Rectangular) Connectors

The housings are brick red in color (UL 94V-0 rated) and have .165" contact-to-contact spacing. Housings have molded-in polarization. Plugs and caps fit the same mounting hole. Contacts accept 26-18 AWG wire with insulation diameters from .025"-.115". UL recognized File E28476 and CSA certified LR7189 for 250 V and 105°C operation.

Panel Mount

1 Circuit Free-Hanging

2 Circuit

3, 4, 5 and 8 Circuit

6 Circuit

9, 12 and 15 Circuit

- ▶ Innumerable Keying Combinations
- ▶ Pins and Sockets Can Be Intermixed In The Same Housing
- ▶ Positive Polarization
- ▶ Rear Cavity Identification
- ▶ Pin or Socket Contact Can Be Hot
- ▶ Positive Locking Housings
- ▶ Insulation Capability To .200 (5.08) Diameter
- ▶ Removable, Crimp Snap-In Contacts
- ▶ Low Contact Mating Force

This series of connectors provides a highly reliable and economical means of grouping multiple-lead connectors in today's computer, computer/peripheral equipment and business machines.

Plug or Housing Strain Reliefs

Closed Type

2, 3, 4, 5, 6, 9, 12 and 15-Circuit (Enclosed)

(2) #6 x 3/8 Lg. Type B Pan head sheet metal screws (not supplied)

Strains Reliefs

Note: Two pieces are required for each strain relief assembly. If you order just 1 you will get 1/2 of a strain relief.

Plug Housing Strain Reliefs

Universal Pins and Sockets

Can be used in either plug or cap housings. Pin Dia.: .084" (2.13 mm).

DIPLOMATE® (DL) DIP and SIP Sockets

**AMP**

The DIPLOMATE socket family provides high quality at low cost with superior handling characteristics. It is available with dual wiping contacts in tin or gold plating over beryllium copper or economical phosphor bronze. The large target area of the contacts and tapered side ramps in the housing insure easy entry of a DIP package. Internal anti-overstress walls prevent contact damage. The housings are compatible with commercially available automatic insertion equipment for socket-to-board or DIP-to-socket applications. These stackable housings feature a "True Closed Bottom" design which prevents solder or flux wicking at class 1 conditions of EIA 486.

Standoffs provide board clearance for proper cleaning after soldering. Sockets are available with straight solder tails

for clinching and are "true positioned" for automatic insertion into the PC board. Solder tails with retention feature, for self-retention in the PC board during handling and flow soldering, are available for hand insertion.

Housings are constructed from self-extinguishing glass-filled polyester, 94V-0 rated material and meet the material requirements of Table 23.1 of UL 1410 Standard for Television Receivers and Video Products.

The DIPLOMATE (DL) DIP and SIP socket family meets the requirements of EIA RS415, MIL-S-83734 and the most stringent specifications of main-frame computer manufacturers.

Dual Leaf DIP

Accepts .008-.015 thick x .030 wide rectangular leads.

PERFORMANCE CHARACTERISTICS. Rating: 250 VAC. Contact Resistance: 20 milliohms max. (initial), 30 milliohms max. (after test). Dielectric Withstanding Voltage: 1000 VRMS min. Insulation Resistance: 5000 megohms min. Capacitance: 0.5 picofarad max. Operating Temperature: -55°C to +105°C (tin), -55°C to +125°C (gold). Vibration: 10-2000-10 Hz in 20 minutes at .06 (1.52) or 15 Gs for 3 sweeps in each of 3 axes. Shock: 100 Gs sawtooth, 6 shocks. Engaging Force: 340 grams (3.33 N) max. (.013 (0.33) pin). Separating Force: 25 grams (.24 N) (.008 (0.2) pin).

PLCC Sockets

High Pressure Tin (HPT) Sockets with Solder Tails

Sockets accept JEDEC PLCC packages in square and 32-position rectangular EPROM configurations with tin plated leads on .050 centers. AMP (HPT) chip carriers are designed to make effective and economical use of a PC board area for PLCCs with high pin counts. Housing Materials: Polyphenylene Sulfide, 40% glass filled, UL 94V-0 rated, 220° C. Contacts: Tin plate over phosphor bronze.

LIF PGA Socket for Motorola's 68360 QUICC™ Controller

— NEW —

The AMP Socket, an 18 x 18, 241 position version with standard cavity, is a true low force product. Preloaded, long, dual beam contacts with staggered-rows heights provide both sufficient normal force and low insertion/extraction forces.

The DIPLOMATE Low Force (LF) family of DIP sockets provide a means of reducing DIP leg damage while maintaining high quality at low cost with superior handling characteristics. Low insertion and extraction forces, in fact, zero force for the side brazed ceramic DIPs are combined with high normal forces by way of a unique camming arrangement. It is available in 24, 28, 40 and 48 positions on .600 (15.24) centerlines with tool-less actuation and 64 position on .900 (22.86) centerline with screwdriver actuation.

Low Insertion Force, Low Profile Surface Mount PLCC Sockets

New to the Amp family of Low Profile Plastic Leaded Chip Carrier (PLCC) sockets for surface mounting is this line of Low Insertion Force Sockets. A unique contact design allows the PLCC device to be easily inserted into the socket. Sockets will accommodate plastic "J"-leaded devices made to JEDEC Specifications MO-047AA-AH (square packages) and MO-052-AE (rectangular packages).

Rectangular Sockets

Low Profile SOJ-Style Surface Mount PLCC Socket

AMP has expanded its family of PLCC sockets to include this SOJ-style version. The socket was developed to accommodate "J"-leaded drams/vrams with tin-plated leads.

PIDG® (Pre-insulated Diamond Grip) Terminals. These terminals feature color-coded nylon sleeves, funnel ramp entry, serrated inner barrel, a copper sleeve over the barrel, and tin-plated terminals for corrosion resistance. Terminals meet or exceed the requirements of MIL-T-7928, Type II, Class 1 and 2. 300 V Max., 150°C Max.

Ring Tongue Terminals (Fig. A)

Nylon insulation, tin-plated copper terminals.

Terminal Kits

Contain 20 different terminals and splices; 25 of each, for a 500 piece kit. The PLASTI-GRIP® kit includes a SUPER CHAMP® hand tool. The PIDG® kit includes a SUPER CHAMP HAND TOOL IV®. Enclosed in a compartmented steel carrying case.

512-9230. 608029-1. PLASTI-GRIP® Kit.....PER KIT 90.95
512-9235. 608028-1. PIDG® Kit.....PER KIT 102.85

PRO CRIMPER™ II, PIDG® and PLASTI-GRIP® Terminal Kit

Includes hand tool, 225 ring and spade terminals in 12-10, 16-14 and 22-16 AWG wire sizes.

512-9236. 55823-1.....PER KIT 91.80

SOLISTRAND® Uninsulated Terminals and Splices

Fig. O

Fig. P

Fig. Q

Fig. R

Fig. S

Fig. T

Constructed of fine grade high conductivity copper (spring spade terminals are constructed of phosphor bronze) and tin-plated. These feature a brazed seam, dimples or serrations inside the barrel and a bell-shaped barrel entrance. Meets or exceeds the requirements of MIL-T-7928, type 1, class 1 and 2. UL listed and CSA certified.

MTA-100 Post Headers—.100" Centers

Discrete wire to board - 2-piece interconnection. Insulation displacement wire termination. **MTA Post Headers:** .100" Centers. **Insulation:** Polyester, UL94V-0 rated. **Natural color.** **Posts:** Tin-plated copper alloy. Meets the material requirements to Table 23.1 of UL 1410 Standards for Television Receiver and Video Products*. **UL Recognized File No. E 28476.** **CSA Certified File No. LR17189.** *Wire-to-post connectors only.

Tools for MTA-100 and MTA-156

The pistol grip tool can terminate up to 600 wires per hour. The T-handle tool is useful for prototype, maintenance, and repair.

Type 58074-1. Pistol grip handle only.

512-9089 EACH 62.90

Type 58246-1. Head for MTA-100.

512-9084 EACH 132.60

Type 58247-1. Head for MTA-156.

512-9086 EACH 132.60

Type 59803-1. Maintenance T-handle tool, MTA-100.

512-9088 EACH 18.70

Type 59804-1. Maintenance T-handle tool, MTA-156.

512-9089 EACH 20.40

Double Row MT Receptacle Connectors

Housings are preloaded with standard pressure contacts on .100" x .100" centers. The contacts are insulation displacement for termination of discrete wires or ribbon cable with conductors separated. Crimp, snap-in contacts can be used interchangeably with the insulation displacement contacts. Connector covers are sold separately. **Specifications.** **Housing:** Black thermoplastic, flame retardant. **Contacts:** Copper alloy; duplex plated .000030µ" gold on the contact area, .000050µ" min. tin-lead on termination area, with entire contact underplated .000050µ" nickel. **Rating:** 3 amperes for single contact in free air. UL recognized, CSA certified. **Operating Temperature:** -65°C to +105°C. Mate with posts .222"-.273" in length.

system is ideal for parallel stacking applications for computers, computer peripheral equipment, communication systems, medical instrumentation and environmental control systems as well as other high density applications.

Polarized and Non-Polarized Loading Tools for Receptacles

P

Mod. IV Wire-Applied Housings

For termination of discrete wires. Receptacles mate with .025" square or round posts. Contacts are sold separately — order from the contacts listed below. Single and double row housings listed below are on .100" centerlines. **Contact Current Rating:** 3 amperes. **Housing Material:** Black thermoplastic — flame retardant, UL recognized, CSA certified.

Single Row — .100" Centers

Sold without contacts — See Mod. IV contacts below.

Non-Polarized — Stamped — Fig. A

AMP-LATCH Uni-Beam Receptacle Connectors

- The AMP-LATCH Uni-Beam Receptacle Will Mate with: AMP-LATCH Universal and Low-Profile Pin Headers
- All Industry Standard Pin Headers with a .150 (3.81) End Dimension, .025 (0.64) Square or Round Mating Post, and .125 (3.18) to .323 (8.20) Maximum Post Length
- .100 × .100 (2.54 × 2.54) Mating Grid for .050 (1.27) Pitch Ribbon Cable
- Duplex Gold Plated Contacts
- Contact Design Provides Uniform Latching of Contacts and Housing with Connector Cover
- Housing, Cover, and Strain Relief Made of UL 94V-0 Rated Thermoplastic Material

AMP-LATCH Uni-Beam receptacles feature insulation displacement contacts (IDC) for fast, labor saving mass termination of .050 (1.27) center line ribbon cable. The mating interface consists of a pre-loaded single mating beam that provides high normal force without high mating forces. The mating beam contains a top/bottom contact orientation.

IBM Style Token Ring Data Connector

Designed for the mechanical interface requirements of IEEE 802.5 specification local area networks. The connector is used to terminate 2 twisted pairs of data conductors. This connector mates with another identical connector. Cable termination is by insulation displacement. Cable-braid is held between a ferrule and the connector's integral grounding shield. Termination of the conductors requires only a pair of slip joint pliers. Remove the appropriate posts for the desired cable exit direction. Completed connectors can be snapped into a panel cut-out or used as free-hanging.

Standard Connector Kits
IBM Cable Type: 1, 2, 6. **Cable Exit:** 45°, 90°, or 180°.

EMC Data Connector

— NEW —

▶ For Type 1A, 2A, 6A Cable

The original specifications for 150 ohm shielded (Type 1) cables and the AMP Four-Position Data Connector supported signals up to 20 MHz. As LAN speeds have increased, these specifications needed to be extended to provide stable performance at higher frequencies. The Telecommunications Industries Association/Electronics Industries Association (TIA/EIA) has proposed extended specifications for 150 ohm shielded cables and connectors up to 300 MHz. These proposals are being incorporated into pending new specifications TIA/EIA TSB 53 and PN-2840. All of the FOUR plus products presented comply with these specifications.

68 Position Pin Headers and Accessories — NEW —

Right-angle pin headers, available in standard, raised and stacked standard profiles, provide attachment to the host equipment and feature three levels of sequencing. Both standard and raised profile pin headers offer thru-hole and surface-mount lead configurations for top or bottom mounting. Stacked standard profile pin headers permit 136 circuit connections with thru-hole lead configurations for top mounting. An organizer on the 68- and 136-position headers and 4-sided post lead-in aids in the placement of the headers on the PC board. The true position of the leads is held to 0.30 (.012). This allows a small hole size, 0.84 (.033), to be used in the PC pattern, which gives the designer flexibility in routing signal paths. Guide rails and card guides facilitate the insertion and removal of the memory cards. Pin headers find wide use in such equipment as: computer, office, photographic, communications, industrial, test and medical, and pay.

Standard Profile, Pin Headers

Stock No.	Mfr.'s Type	No. of Pos.	Board Mount	Lead Type	EACH

SC Type Connector and Coupling Receptacle

Singlemode connectors compatible with all SC type connectors. High performance and simple assembly. Insertion Loss: .3 dB avg. Return Loss: better than 40 dB. Pre-radiused ferrule ensures a PC finish. Panel mountable receptacle mates two SC style connectors. Includes dust caps. Use for both multimode and singlemode. Plastic housing and metal alignment sleeve.

Terminal Block

- Recognized Under The Component Program Of Underwriters Laboratories Inc., File No. E60677
- Certification By Canadian Standards Association, File No. LR 7189A-442
- Product Under A Quality Management System Certified To ISO 9001
- Housings: UL 94V-0
- .200 (5.08) Centers
- Color: Black

The new, modular design TERMI-BLOK connector consists of one-piece right-angle and vertical mount PCB terminal blocks, and cable connectors with mating right-angle or vertical mount PCB headers.

Stackable terminal block connectors feature screw clamp contacts that accept wire size range 24-12 AWG (0.2-3.3 mm²), solid or stranded. Wire entry is parallel to the screws (deviation <30°).

FLEXI-BLOK™ Terminal Block System

AMP FLEXI-BLOK™ terminal block assemblies can be custom-made in seconds. Any number of blocks, assembled on tape can be pulled from a convenient, stackable dispenser carton. Cutting the desired number of blocks and the required length of track can be accomplished with a handy cutting tool or a hacksaw. The track, GE NORLY EN 265, conforms to curved surfaces. Both the track and the blocks are self-extinguishing. To complete a proper assembly, after selecting the size blocks with appropriate electrical capacity, track is cut to the length of the required number of terminal blocks, plus two extra spaces to accommodate end stops. After the strip of terminal blocks is slid onto the track, insertion of an end stop in each end completes the assembly. Pre-drilled holes in the track allow quick mounting on flat or curved surfaces. In addition to direct application of wire ends under screw heads, plates with FASTON tabs or jumper tabs can be installed on size #6 and #8 FLEXI-BLOK™ assemblies.

#6 Blue FLEXI-BLOK™ and Accessories

Introduction

The cost of EMI/RFI control has dropped dramatically with the introduction of Amphenol Canada's new FCC Series of filtered modular jacks, D-subminiature and Micro-Ribbon. At less than half the cost of previous industry levels, the FCC Series products have already solved EMI/RFI problems for a host of electronic equipment designers. These filtered connectors are useful for dealing with the two main EMI/RFI control issues.

FCC Compliance

FCC Docket 20780, Part 15, Subpart J imposes electromagnetic radiation emission limitations upon

manufacturers of both Industrial (Class A) and Commercial (Class B) products. The FCC Series of filtered connectors are instrumental in passing these requirements because the chief cause of noncompliance is traceable to noise radiated from the I/O cables. A filtered connector at the I/O port removes the noise before it exits the system.

Noise Protection

Unwanted EMI/RFI noise or electrostatic discharge can be removed from an I/O cable if a filtered connector is used at the I/O port. This prevents false signals and protects the equipment from damaging voltage spikes thereby greatly enhancing device immunity from external effects.

FCC17 Series — Filtered D-Sub Connectors

Designed to provide EIA RS-232 and RS-449 compatibility. Interchangeable with standard non-filtered Amphenol 17 Series D-Subs and connectors meeting MIL-C-24308. **Materials.** Shell: High strength zinc diecast or stamped steel. **Contacts:** Phosphor bronze. **Inserts:** High strength thermoplastic material (complies with UL flammability requirements of 94V-0 per UL-STD-94). **Finish.** Shell: Bright tin plating per MIL-T-10727. **Contacts:** 20 μ gold plating per MIL-G-45204 on contact area over 100 μ nickel plating. **Operating Temperature:** -40°C to +85°C.

Filtered and Shielded Modular Jacks

The FRJ series of Shielded and Filtered Modular Jacks offers low cost and effective EMC control within standard RJ-45 connector footprints. EMC control is offered by a completely shielded connector and/or with the use of a high resistivity, high impedance ferrite block. No board layout changes are required for its use. Simply replace the standard non-filtered connector for superior EMC performance.

Materials. Shield: Copper Alloy. **Contacts:** Phosphor Bronze, Gold over 20 μ Pd. over Ni. **Insert:** Thermoplastic (Complies with UL 94V-0). **Filter:** High Impedance, High Resistivity, Ferrite Block. **Electrical.** Current Rating: 1.5 Amps. **Voltage Rating:** 125 Volts AC. **UL and CSA File No.:** LR68598-11.

Service Chart above shows Army-Navy ratings for aircraft use. INST service normally for low voltages and currents.

Effective Creepage (nominal)	Inch	1/16	1/8	3/16	1/4	5/16	1
	mm	1.57	3.18	4.75	6.35	7.92	25.40
Mechanical Spacing (nominal)	Inch	1/16	1/8	3/16	1/4	5/16	1
	mm	1.57	3.18	4.75	6.35	7.92	25.40

†† High Voltage Contact. Rating 24,000 volts DC, 17,000 volts R.M.S., 60 CPS at sea level – 41 amps.
Maximum – in mated condition with connector potted.

☒ Inactive for for new military design but available for replacement or non-military purposes.

Connector Size – O.D. of Receptacle Coupling Threads

Ordering Information

1. Select the insert and configuration. The table of insert configuration identifies the size, number of contacts, and contact wire size. The letter "P" identifies pin (male) contacts and the letter "S" identifies socket (female) contacts.
2. Select the receptacle shell. For wall (thick)—Series 3100A; for unmounted—Series 3101A; for box or panel—Series 3102A. Series 3102A isn't threaded on the back and is used when a cable clamp isn't required.
3. Select the plug shell. Straight—Series 3106A; straight, quick disconnect—Series 3107A; straight, split backshell—Series 3106B; right angle—Series 3108A; right angle, split backshell—Series 3108B.
4. Select the shell finish. Drab olive cadmium plate is standard. To order shells with a clear cadmium finish (bright metal) add (639) to the end of the connector part number.

Black zinc (621) and Electroless Nickel (689) finishes are also available.

5. Miscellaneous. Amphenol suggests that the connector on the power source side of the connection contain socket contacts to reduce chance of short circuit or accidental injury.
6. Putting it together. If you have selected socket contacts for the insert in the receptacle, then the insert in the mating plug must contain pin contacts. For ease in ordering, the listings that follow have the mates for the receptacles on the same line.
7. Accessories. All shells except 3102A are threaded for a cable clamp. Cable clamps are available from Allied in either drab olive or clear (bright metal) cadmium plate.
8. **Warning.** (A) You must select a plug shell to mate with a receptacle. (B) Pins mate with sockets. If you select socket contacts for the receptacle, please designate pin contacts for the plug.

Receptacles mate with plugs on the same line in the table on the next page.

Formerly MIL-C-5015 Types A and B

See Page 217 for Dimension Table. MS Receptacles mate with MS mating plugs that are on the same line in the table below. *Standard shells have cadmium plating with drab olive chromate finish. In shell sizes 12S, 14S, 16, 16S, 18, 20, 22, 24, and 28, clear chromate over cadmium plating (639), black zinc over zinc plating (621), or electroless

nickel plating (689) are also available. Add the shell finish identification to the end of part number to specify a shell finish other than drab olive. * notes the shell styles that are available with all four of these finish choices.

Formerly MIL-C-5015 Types A and B

UL Approved - File No. E11 5497

CSA Certified - File No. LR69183

See Page 217 for Dimension Table. MS Receptacles mate with MS mating plugs that are on the same line in the table below. Standard shells have cadmium plating with drab olive chromate finish. In shell sizes 12S, 14S, 16, 16S, 18, 20, 22, 24, and 28, clear chromate over cadmium plating (639), black zinc over zinc plating (621) or electroless

nickel plating (689) are also available. Add the shell finish identification to the end of the part number to specify a shell finish other than drab olive. * notes the shell styles that are available with all four of these finish choices.

Formerly MIL-C-5015 Types A and B

UL Approved - File No. E11 5497

CSA Certified - File No. LR69183

See Page 217 for Dimension Table. MS Receptacles mate with MS mating plugs that are on the same line in the table below. *Standard shells have cadmium plating with drab olive chromate finish. In shell sizes 12S, 14S, 16, 16S, 18, 20, 22, 24, and 28, clear chromate over cadmium plating (639), black zinc over zinc plating (621), or electroless

nickel (689) plating are also available. Add the shell finish identification to the end of the part number to specify a shell finish other than drab olive. * notes the shell styles that are available with all four of these finish choices.

97 Series Rear Release Crimp Type

See Page 217 for Dimension Table.

UL, CSA Recognized. High speed termination, closed entry. Reduces fatigue failure at wire contact junction. Intermateable and intermountable with 97 Series and MIL-C-5015 type shell styles, both plugs and receptacles. Utilizes Standard 97 Series bright cadmium plated shells and insert configurations. Designed for use with stamped and formed type crimp contacts. The size 16 contact design features insulation crimp support. Use with standard hardware for 97 Series connector. Order accessories with (639) plating deviation to match connector plating. **Specifications. Standard Shell Finish:** Clear chromate over cadmium plate. **Inserts:** Molded 94V-0 UL rated material. **Contacts:** Copper Alloy formed, silver plated; gold plating also available. **Wire Sizes:** 12-30 AWG. UL File #E115497. CSA File #LR69183. **Operating Temperature Range:** -55°C to +125°C. **Contacts sold separately. (See Contacts and Tools below.)**

Series 16S MS-Type Miniature Solder Connectors

Pressure-proof and completely weather-proof miniature connectors. Widely used in instrumentation and miniaturized electronic equipment. These highly reliable connectors are available in both small and large shell sizes providing enough variation for a wide range of applications. Contacts are gold over silver plating. Aluminum shells feature quick bayonet coupling. Small receptacles mount in 13/16" hole; secure through four 1/8" holes on 25/32" centers. Large receptacles require 1 1/16" hole with four 1/8" holes on 1 1/16" centers. Plugs are 2 1/16" long. Small plugs are 5/16" dia.; large plugs are 19/64" in dia. Rated 500 volts rms, except *600 volts. All have strain relief clamps. Shells are aluminum with neutral-color chromium finish. Dielectric material is diallyl phthalate. All have 'O' ring seals. **Av. shipping wt.:** 3 oz.

Dimensions (Inches)

	A	B	C	D	E
Small	5/16	3/8	1 1/16	25/32	25/64
Large	1 1/16	2 1/32	1 1/8	3 1/32	3 1/64

On Allied Stock Numbers marked with †, the part is available in the following finishes: Standard — (no code), cadmium plate with drab olive chromate finish; (639) — cadmium plate with clear

chromate finish; (621) — zinc with black zinc finish; (689) — electroless nickel. For finishes other than drab olive, add the finish identification to the end of the part number.

Type 97-60 Dust Caps

For Receptacles

Provides protection against live circuits and keeps out dirt and dust when connector is not in use. Has internal threads especially designed for use with Series 3100A, 3101A and 3102A receptacles. Beaded chain. A soft rubber disc sits on the connector shell forming a watertight joint. **Average shipping weight: 2 oz.**

17 Series D Subminiature

Conforms to NFC 93-425, EIA standard RS-232-C — RS-449. Two-piece black thermoplastic insulator. UL94 V0 rated. Nonremovable contacts. Shell is steel yellow chromated over zinc. Contacts are screw machined (male brass, female bronze). Plating is gold over nickel. Normal voltage is 300V_{eff} 50 Hz at a current rating of 7.5A.

44 Series Environmentally-Sealed Connectors

44 Series high-performance environmentally-sealed connectors feature a resilient, one-piece design incorporating crimp contacts, in six insert configurations. Primary and secondary mating seals and discrete wire seals resist liquids. Ideal for auto/truck, marine, industrial, traffic control, security and mining ventilation systems. 250 VAC RMS at 8 A continuous. Temperature Range: -40° to +125°C. (Order contacts and tooling separately.)

Right Angle — Front Metal Shell D-Subminiature Connector

Amphenol's 617 series right angle connectors are a state of the art design. The front metal shell helps reduce EMI/RFI emissions. Contacts are selectively plated for high performance at a low cost. Specifications. Temperature Range: -55°C to +105°C. Voltage Rating: 1000 VAC at sea level. Current Rating: 5 amp. Dielectric: Glass filled thermoplastic, black, UL 94 V0. Shells: Steel/tin plated. Contacts: Precision formed copper alloy. Contact Plating: Goldflash over nickel. Contact Forces: Engagement — 18 oz. max.; Separation — .75 oz. min. Mounting Feature: #4-40 threadhole with female screwlock. .318 Footprint.

SCSI II "D" and Micro Ribbon Connectors

Amphenol® SPECTRA-STRIP/ITD

SCSI II PCB Mount Half Pitch "D" Connector

Amphenol's 257 series is a high density connector system which meets ANSI requirements for SCSI II (small computer system interface), and is suitable for a variety of input/output applications. The low profile design allows that connector to be used in applications where space is at a premium. **Materials:** Contact: Phosphor Bronze. **Contact Plating:** 30 microinches gold on mating end, 100-200 microinches tin/lead on termination end, all over 50-100 microinches nickel. **Front Shell:** Steel. **Front Shell Plating:** 100 microinches (min.) tin. **Metal Housing:** Zinc alloy. **Metal Housing Plating:** Nickel. **Insulator:** Black thermoplastic, UL 94V0 rated. **Electrical Performance:** Current Rating: 1 amp. Insulation Resistance: 1000 megaohms (min.). Dielectric Withstanding Voltage: 500 VAC (min.) at sea level. Contact Resistance: 25 milliohms (max.). **Mechanical Performance:** Operating Temperature Range: -55°C to +105°C.

57-Series Connectors

Copper alloy contacts, selectively plated gold-over-copper for excellent current carrying characteristics. UL94 V0 rated diallyl phthalate dielectric per MIL-M14F Type MDG, for operation at up to 700 volts DC (sea level) without shorting or flashover. Zinc-plated steel outer shell, with clear chrome finish, for corrosion resistance. Trapezoidal-shape shell assures correct polarity. **Current Capacity:** 5 amps per contact. **Voltage Rating:** 700 volts DC at sea level. **Operating Temperature:** -55°C to +105°C (-67°F to +122°F). **Wire Sizes:** Solid - 22 gauge, max.; stranded - 24 gauge, maximum.

Plugs - Top Cable Entry Zinc plated shells for screw locking.

157 Series I.D.C. Termination

Current Capacity: 5 amps per contact. **Voltage Rating:** 700 VDC at sea level. **Operating Temperature:** -67°F to +221°F (-55°C to +105°C). **Wire Size:** 24 and 26 AWG solid conductor; 26 and 28 AWG stranded conductor. **Contacts:** Selectively plated 20µ" gold over 50µ" nickel on a copper alloy base. **Dielectric:** Fiberglass-filled polyester. **Shells:** Zinc plated steel with clear chrome coating. Trapezoidal shape assures positive polarization.

Amphenol® Microribbon Connectors

These connectors are interchangeable with Amphenol 57 Series and 157 Series connectors. Special contact design allows the use of standard .050" flat ribbon cable for termination. **Contacts:** Copper alloy/gold plating. **Dielectric:** Polycarbonate resin (UL94V-0)/blue. Rated 250 VAC rms, 1 amp. **Test Voltage:** 500 VAC rms at sea level. **Operating Temperature:** -55°C to +105°C.

Spectra-Zip® PVC .025" Center Cable — 191-3003 Series

Spectra-Strip .025" center zip cable is designed to meet industry requirements for interconnect miniaturization. Features include quick and easy IDC termination, UL recognition and inexpensive PVC dielectric. Applications include any system requiring a higher signal density or an inexpensive alternative to transmission cable. The cable is rated for 105°C (+221°F) operating temperature and 150 volts. One edge of the cable is marked for polarity reference. **Physical Characteristics:** Conductors: 30 AWG solid bare copper. Insulation: PVC, .0075" wall. Thickness: 0.025" ± 0.002". Pitch: 0.025" ± 0.002". Color: Gray (one edge black). **UL style:** 2678; rated 105°C (+221°F).

- ▶ Allows Increased Miniaturization
- ▶ Highly Flexible PVC Insulation
- ▶ Fast, Low-Cost Mass Termination

- ▶ UL Recognized Style
- ▶ Precise Spacing for Controlled Electrical Characteristics

Spectra-Strip® Jacketed Shielded Cable

- ▶ Round Cable That Mass Terminates
- ▶ High Flexibility

- ▶ Twisted Pair Electrical Characteristics
- ▶ Helps Meet FCC Regulations UL, CSA and CL2

Cable combines into a single construction, the handling and shielding features of round cable and the mass termination capabilities of flat cable. This product is designed for routing in tight spaces where a round shape is more practical and where a foil/braid shield is necessary to help meet FCC requirements for EMI/RFI suppression. Conductors: 28 AWG-7/36 tinned copper. Jacket: Black PVC, .030" nom. wall. Temperature Rating: -20° to +105°C (-4° to +221°F).

Round Twist 'N' Flat™ Jacketed Shielded Cable — 159-2832 Series

Physical Characteristics: Color Code: Brown, red, orange, yellow, green, blue, violet, gray, white, black and repeat with tan common. Insulation: PVC, .010" wall laminated between .005" clear PVC film. Thickness: .042" ± .003". Pitch: .050" ± .005". Twist Length: 17.5" (consult Allied for other available lengths). Flat Length: 2.5". Shielding: Aluminum/polyester foil, with minimum 90% coverage tinned copper braid. **UL Style:** Inner Cable — 20130; Composite — 20381.

Twist 'N' Flat Planar Cable

- ▶ 28 AWG, 7/36, .050 Center, Tinned Strand Copper
- ▶ Unique Design Allows Mass Termination to IDC Connectors
- ▶ Up to 64 Conductors (32 pr.) with Precise Spacing for Controlled Electrical Characteristics
- ▶ Highly Flexible PVC Insulation is Color Coded with a Tan Common to Allow Ten Repeatable Colors

- ▶ Double Contour at Flat Sections Allows Termination from Either Side of Cable, Easy Conductor Separation for Circuit Routing
- ▶ U.L. and CSA Recognized
- ▶ Voltage Rating: 300 V
- ▶ Current Rating: 1 Amp

Twist 'N' Flat cable combines the time and cost savings of mass termination with the electrical performance of twisted pairs, making it ideal for high speed computers and communications equipment. Labor savings of 95% and more compared to automatic strip and crimp terminations are readily achieved. Twist 'N' Flat cable consists of stranded round conductors insulated with color coded PVC, twisted into pairs and laminated between layers of PVC film to form a planar cable. The twist in adjacent pairs is reversed to reduce crosstalk even further. Standard cables alternate 18-inch long twisted pair sections with 2-inch flat sections in which the conductors are laminated in parallel. This cable is packaged in 100-foot lengths in dispenser boxes with a footage indicator. 28 AWG, 7/36, .050 centers.

SMB Plugs, Angle Plugs, Bulkhead and Printed Circuit Receptacles

Amphenol SMB connectors meet or exceed the requirements of MIL-C-39012 series SMB. These subminiature units feature snap-on mating and broadband performance with low reflection DC-4 GHz (usable to 10 GHz). The connectors shown in this catalog are 50 Ω impedance, with voltage rating of 375 V peak.

75 Ohm BNC Connectors

These connectors can be used in a variety of applications where true 75 ohm performance is needed to insure lower signal distortion. They may be matched with standard 50 ohm BNC without damage or intermittence.

BNC Suretwist® Connectors

Specifications. Electrical Frequency Range: 0-300 MHz typical. Voltage Rating: 500 V peak. Dielectric Withstanding Voltage: 1500 V rms. Material Body: Zinc Die-cast. Coupling Sleeve: Brass. Insulator: Polyethylene. Plating: Contact—Tin Dip; Other Metal Parts—ASTROPLATE®. ENVIRONMENTAL Thermal Limits: -67° to +185°F (-55° to +85°C). Non-weatherproof.

PowerPole® Connectors

Powerpole® connector modules feature a single pole, genderless connector half. This module consists of a color-coded housing and a silver-plated, crimp-type contact. The module is designed to mate with another identical module. The housing is durable, high-impact resistant polycarbonate (UL94V-2 flammability rating). An internal stainless steel leaf

spring forces contacts to maintain constant pressure. The contacts are sold separately and are made from highly conductive silver-plated copper. UL recognized file No. E26226. CSA certified file No. LR25154. Powerpole® is a registered trademark of Anderson Power Products.

- Single Piece Housing — Unitized Construction Provides Industrial Quality Durability
- Individually Replaceable Contacts — Enables Safe Replacement of Contacts
- Spring Loaded Silver Plated Contoured Contacts — Self-Wiping Cleaning Action Assures Greater Conductivity and Longer Life

- Polycarbonate Housing — Non-Conductive Material Can Be Used Safely With Industrial Batteries
- Mechanically Keyed and Color Identified — Prevents Mismatching of Voltage

The SB® Connector was designed by Anderson Power Products® and has 30 years performance on electric vehicles. Other applications include quick disconnect for computer systems, uninterruptible power and power distribution systems.

Safety Grip™ Connectors Straight Blade Devices (2-Pole, 3 Wire Grounding 15 A and 20 A; 125 V)

These devices have cord grips for .250"-.656" diameter cords. Nylon/lexan™ backwired dead front construction. Complies with NEMA WD1-1979 requirements. NEMA 5-15R, 5-15P ANSI C73.11. *Lexan is a registered trademark of General Electric.

Stock No.	Mfr.'s Type	Description	EACH	
			1-9	10-49
813-6266	6266	Male Dead Front Plug (15 A)	11.30	10.10

Little Midget Hart-Lock Devices (2-Pole, 3-Wire Grounding 15 A, 125 V)

While similar to the previous parts, these devices have a hollow brass grounding sleeve. Cord grips are the same size. NEMA ML2-R, ML2-P.

500 Series — SIP Sockets / Socket Terminal Strips

- Non-wicking closed bottom sleeve gives 100% protection against flux and solder contamination
- Breakaway feature for breaking strips into any desired shorter lengths (no special tooling required)
- Withstands most severe environmental conditions including military requirements of high shock and vibration
- Two-piece tapered entry closed entry inner contact and machined outer sleeve
- Accepts any IC lead and component leads .016"-.021" diameter, .105" min. length
- Uses: microprocessor sockets, hybrid IC sockets, Q.I.L. sockets, component sockets, test points

200C Series — Stamped Single Beam Contact, Closed Bottom DIP Sockets

- Contact Spacing: .100 Centers
- Insulator: Thermoplastic Polyester Rated 94V-0
- Contacts: Phosphor Bronze (per QQ-B-750), Beryllium Copper (per QQ-C-533)
- Plating: Tin/Lead (per MIL-P-81728)
- High Normal Force Results in Gas Tight Connections
- Non-Wicking, Closed Bottom Design Gives Protection Against Solder Contamination
- Protected Open Entry for Easy Insertion of ICs by Hand or by Automatic Insertion
- Anti-Overstress Design Protects Contacts, Helps Eliminate Damage From Oversize Leads and Maintains Consistent Normal Force
- Recognized Under the Component Program of Underwriters Laboratories, Inc. File No. E111362

Augat 200C Series single beam face wipe contact provides maximum normal force and consistent mechanical performance in Augat's lowest cost socket.

300C Series — Stamped Dual Wipe Contact DIP Sockets

- Contact Spacing: .100 Centers
- Insulator: Thermoplastic Polyester Rated 94V-0
- Contacts: Phosphor Bronze
- Plating: Tin/Lead
- Available in Open Frame Style Allowing Maximum Utilization of Circuit Board Real Estate
- Standoffs Facilitate Board Cleaning
- Low Profile Design
- Recognized Under the Component Program of Underwriters Laboratories, Inc. File No. E111362

The Augat 300C Series dual wipe contact adds a new family of product to Augat's low cost DIP socket line.

600 Series — AG and CG Plug Adapter Assemblies

- AG Style Machined Round Pin Machined Printed Circuit Terminal
- CG Style Machined Slotted Pin Machined Printed Circuit Terminal
- Precision Machined Pins
- Used for Interposing Discrete Components
- Terminals Are the Same Dimension as IC Board Patterns
- Option of Round or Slotted Pin Styles

The 600 Series is a high quality machine pin molded adapter which is used to assemble hybrid and special network circuits. The .018" diameter precision pin allows the adapter to be plugged into socket or wire wrapable panels repeatedly.

8136-475 Series — Programming Jumper Plug Assemblies

- Low Profile: Only .100" High, X and Y Stackability
- Jumper Pin Assembly Spans 7.62/.300" Centers to Connect Opposing Contacts in I.C. Patterns, or 2.54/.100" Centers to Connect Adjacent Pins

8136-475 Series of programmed jumper plugs offer the unique combination of low cost and flexible signal path selection. Standard configurations are supplied programmed across rows.

Transistor Sockets

8060

8059

8058

► Polarization: Dot, Notch, Bump

► Contact Plating: 30 µ" Gold per MIL-G-45204

The Augat Transistor sockets utilize hi-rel machined outer sleeves and gold plated inner contacts assembled into a low profile insulator. The funnel entry design eliminates distortion or damage to the contact with misalignment or oversized leads. The sockets accept .016" to .020" dia. pins. All have a 3A current rating. This Series features a large tapered entry for easy lead insertion and a closed bottom sleeve providing 100% prevention of solder or flux wicking.

Holtite® Series Zero Profile Solderless Sockets

- Available Qualified to MIL-83505/6
- Zero Socket Profile
- Precision-Machined, Tapered-Entry, Four Finger Contact
- Solderless, Gas-Tight, Press-Fit Insertion
- Contact: Beryllium Copper per QQ-C-530
- Finish: Gold Plated .000030" per MIL-G-45204 Over Nickel per QQ-N-290 or Tin/Lead per MIL-P-81728

The solderless zero profile Holtite® contact is designed to be press fit into the plated-thru hole of a printed wiring board. This unique design allows the plated-thru hole to become the component socket. The precision-machined geometry allows for the controlled displacement of plated material without damaging the hole, or affecting the normal mechanical and electrical contact performance.

PCS Series "Type A" Sockets for PLCC Packages

- ▶ Visual Aids External to Socket Assure Easy Registration to Printed Wiring Board
- ▶ Easy Access for Probing Installed Chip Carrier
- ▶ Accepts JEDEC PLCC's MO-47 AA-AH (20-84), MO-052 AE (32 RECT)
- ▶ Recognized Under the Component Program of Underwriters Laboratories, Inc. File No. E111362
- ▶ Plating: Tin/Lead Over Nickel

The Augat PCS Series Chip Carrier solder tail sockets accept Jedec Type "A" plastic leaded chip carriers on .050" (1.27mm) centers. These dependable sockets combine positive retention of package with high normal force to insure outstanding electrical and mechanical performance. The solder tail design allows through-hole board patterns on .100" (2.54mm) grid.

PCS-SMU Series Ultra Low Profile SMT Sockets for PLCC Packages

- ▶ Visual Aids External to Socket Assure Easy Registration to Printed Wiring Board
- ▶ Easy Access for Probing Installed Chip Carrier
- ▶ Accepts JEDEC PLCC's MO-47 AA-AH (20-84), MO-052 AE (32 RECT)
- ▶ Recognized Under the Component Program of Underwriters Laboratories, Inc. File No. E111362
- ▶ Plating: Tin/Lead Over Nickel

The Augat SMU Series Surface Mount chip carrier sockets are an "Ultra" low profile, .175" (4.45 mm) for JEDEC dimensioned PLCC devices. The lower profile is to accommodate height packaging restrictions in high density disk drive and laptop applications. With a PCB footprint which matches PLCC device and an open insulator design to facilitate placement and inspection, the Augat SMU Series meets your high density packaging needs.

2500 Series Stamped Contact ZIP Sockets

- ▶ High Reliability Gas Tight Contacts
- ▶ Closed Bottom to Eliminate Wicking Damage During Wave Solder
- ▶ Anti-Overstress Protection for the Contact
- ▶ Protected Entry to Ensure Proper Alignment of IC to Socket
- ▶ End to End — Side to Side Stackable to Minimize Valuable PCB Real Estate
- ▶ Tapered Leads for Ease of Inserting the Socket into the PCB

The Augat family of ZIP Sockets uses only half the space of DIP for twice the memory on your board.

Low "Ω" Series (<10mΩ) /0.300" Travel (P2447) /0.100" Travel (P3325) — Max. 10 Amps

Low resistance is achieved by making Pogo® plunger and terminal as a single unit. Construction eliminates the resistance of spring and body.

EURO and PC Terminal Blocks and Block Headers

5LE Series — EURO Terminal Blocks

- Connection on 5mm (.197") Centers
 - Standoffs for Flux Cleaning
 - Captive M2.5 Screws
 - Superior Elevator Wire-Clamp with Wire Guard
 - Modular Housing: End to End Stackability with Snap Together/Stay Together Design
 - Dead Front Design Protects Against Shock
 - Housing Withstands Wave Line Temperatures
- In Accordance with VDE0110
2 Thru 4 Positions Molded to Length (Snap Together Larger Sizes)

Housing Material: Thermoplastic, UL recognized flammability classification 94V-0, 105°C max. operating temperature. Terminals: Bright acid-tin plated copper alloy. Solderability: MIL-STD-202, Method 208. Rating: 10 amps/300 volts, 15 amps/150 volts (limited rating). Wire Range: 14-28 AWG (solid or stranded). Recommended PC Hole Size: .062" diameter. UL File Number: E54800. CSA File Number: LR30811.

2M Series — Terminal Blocks

- Maintains Center to Center Spacing When Installed End to End
 - High Density: Connections on 5.1mm Centers (0.2")
 - Dead Front Design Protects Against Shock
 - Standoffs for Flux Cleaning
 - Captive 3-48 UNC Screws
 - Spring-Loaded Wire Protector
 - Extra Large Entry for Stranded Wire, Multiple Wires or Up to #12 AWG Single Wire
- Barrier Material: Thermoplastic polyester, UL recognized flammability classification 94V-0, black, 120°C max. operating temperature. Terminals: Bright acid-tin over copper plated brass. Rating: 20 amps/300 volts (limited rating). Wire Range: 12-22 AWG. UL File Number: E54800. CSA File Number: LR30811.

25EV Series — EURO Block

- Superior Elevator Wire-Clamp with Wire Guard
- Connections on .250" (6.35mm) Centers
- Modular Housing: End to End Stackability with Snap Together/Stay Together Design
- Dead Front Design Protects Against Shock
- Standoffs for Flux Cleaning
- Captive M3 Screws
- High Temperature Housing Withstands Wave Line Temperatures
- In Accordance with VDE0110

Housing Material: Thermoplastic, UL recognized flammability classification 94V-0, 120°C max. operating temperature. Color: Black. Terminals: Bright acid-tin plated copper alloy. Solderability: MIL-STD-202, Method 208. Elevator Box: Zinc plated steel with yellow chromate coating. Screws: Zinc plated steel with yellow chromate coating, M3. Rating: 10 amps/300 volts, 15 amps/150 volts (limited rating). Wire Range: 10-22 AWG. Max. Tightening Torque: 5.0 lb. inch. UL File Number: E54800. CSA File Number: LR30811.

5EHD, 2EHD Series — EURO Block Headers

- Pluggable Euro Block Header
 - Connections on 5mm (.197") and 5.08mm (.200") Centers
 - Shrouded Header Design Protects Header Pins and Enables Latching to Plug Side
 - Closed End Style Prevents Misalignment of Plug and Header
 - Housing Withstands Wave Line Temperatures
 - In Accordance with VDE0110
- Housing Material: Thermoplastic, UL recognized flammability classification 94V-0, 105°C max. operating temperature. Color: Green. Terminals: Bright acid-tin plated copper alloy. Solderability: MIL-STD-202, Method 208. Recommended PC Hole Size: .062" diameter. Rating: 10 amps/300 volts, 15 amps/150 volts (limited rating). UL File Number: E54800. CSA File Number: LR30811.

Pluggable Terminal Blocks (5.0 mm Spacing) Series 87 With Rising Cage Pressure Clamps

- Holds Wires For Secure, Reliable Contact
- Industry Standard Interface
- End-To-End Stackable
- High Flammability Rating (94V-0)
- Wire Range: 12-30 AWG

Plug, Right-Angle

Series 3300 Connectors

Series 3300 connectors are interchangeable with Series 300 types and are designed for panel and cable mounting. **Specifications.** Current Rating (individual contacts): 10 amps. **Voltage Rating, rms:** 750 volts, 250 volts (UL). **Plug Contact Material:** brass, cadmium plated. **Socket Contact:** phosphor bronze, cadmium plated. **Pre-grounding Contact Material:** heavy duty plated brass. **Base Insulating Material:** high-grade

phenolic, black. **Backshell:** thermoplastic. **Finishes:** Cable clamp, screws, latch and keeper, angle bracket — steel, bright nickel electroplate. Deep Bracket — steel, baked black wrinkle enamel finish over zinc chromate plating. *Polarized.

Series 5400 15 AMP

Cable clamp top connectors are designed for use in panel and cable mounting applications. They are interchangeable with Series 2400 or 400 type connectors. **Current Rating (individual contacts):** 15 amps. **Voltage Rating:** 1750 volts; 250 volts (UL rated at 250V, AC or DC max. between adjacent contacts). **Plug Contact Material:** brass, cadmium plated. **Socket Contact:** phosphor bronze, cadmium plated. **Pre-grounding Contact Rating:** up to 30 amps at rated voltages. **Pre-grounding Contact Material:** heavy-duty plated brass. **Base Insulating Material:** high-grade phenolic, black. Thermoplastic backshell. Includes steel, bright nickel electroplated cable clamp and screws. UL recognized, File No. E34763. CSA certified, File No. 22156.

Series 72000 Single Row Terminal Strips

Single row types have the terminals imbedded into the walls of the insulator on both sides. This provides a pull-out strength over twice as great as competitive designs. High barrier construction offer lower overall height. **Specifications.** **Terminal Centers:** 3/8". **Current Rating (UL):** 20 amps. **Voltage Rating (rms):** UL recognized, Class B: 250; Class C: 150. **CSA Certified:** 300 @ 20 amps. **Withstand Volts, rms:** 10500. **Insulator Mat.:** thermoplastic, glass-filled. UL temp. index, 95°C. UL flame retardant rating 94V-0. **Black. W x H:** 5/8 x 21/32". **Max. AWG:** 14. **Terminal Screws:** No. 6-32 x 1/4" binding head screws. Steel, cadmium plated. PC bottom terminals are brass, bright electro-tinned.

Daisy Chain Jumpers

- MAXI-PV contacts provide constant high electrical and mechanical reliability after repeated cycles
- Board As Shown Not Included With Jumpers

Eliminate wire measuring, stripping, soldering or hand-tool terminating. Maxi-PV contacts provide constant high electrical and mechanical reliability after repeated cycles. Contact has brass body and beryllium copper spring. **Contact area:** 1µm (40 µ inch) gold over nickel. **Reminder:** Gold flash. **Current rating:** 2.5 A. **Resistance:** 4 mΩ maximum. **Insertion Force (max.):** 4.30 N (430 gf) with withdrawal force (min.) 0.75N(75gf). **Temperature range:** -65°C to +105°C. AWG 28 stranded copper wire conductor with PVC insulation. PVC shrinkable tubing. **Packaging:** 250 contacts per reel. **518-0001.** 47254-000PER REEL 232.87

Bergcon® System Mini Jump™ Jumpers

65474 Series. Jumpers feature high density packaging, stackable on 0.100 inch spacing. Offer single row, two positions per row. For bussing, programming and switch replacement. Replace conventional printed circuit board switches. Virtually eliminates accidental de-programming. Mate to 0.025 inch square and round pins. Dual metal PV contact design provide excellent retention after repeated cycling. Available in glass-filled thermoplastic polyester housing, color blue. Gold flash over nickel finish. **Insulation resistance:** 1x10⁵ MΩ minimum. **Temperature range:** -65°C to +125°C. Contact has a brass or cupro nickel body and a beryllium copper spring. Rated at 3A maximum, with initial resistance of 11 mΩ maximum, 15 mΩ maximum after tests. UL recognized, CSA

Low Profile Jumper System

- Pins shown are not included with jumper

68786 Series. Economy jumper system applicable for bussing, programming, and switch replacement. Low profile permits high-density packaging. Dual beam contact. Offer 0.100 inch spacing and two positions standard. Housed in thermoplastic polyester rated UL94V-0, color black. **Insulation resistance:** 50,000 MΩ minimum. **Temperature range:** -55°C to +120°C. **Withstanding voltage:** 750 Vrms. **Contact current rating:** 2.5 A maximum. **Resistance:** 15 mΩ maximum. Mates with 0.025 inch square pin. Contact made of phosphor-bronze. **Type 68786-202** is plated 30µ inch gold; **68786-302**, 100µ inch tin/lead.

Bergcon® Crimp-To-Wire MiniPV™ Receptacles

- Mini-PV Receptacle shown with Latch Housing

Mate to 0.019 inch and 0.025 inch round or square pins. Dual-metal contact design provides constant retention force after repeated cycles. These female receptacles have beryllium-copper spring and brass body. Offer superior electrical and mechanical characteristics. Standard spring force is recommended for use in Mini-Latch housings 40-72 positions. High spring force for Mini-Latch housings

65039/65043 Series Mini-Latch PV™ Housing

For use with dual metal Mini-PV contacts and crimp-to-wire pins. Allows simultaneous connections of Mini-PV terminated conductors on 0.100" x 0.100" or 0.100" x 0.200" double row, to accommodate Mini-PV receptacles or crimp-to-wire male pins. Accepts crimp-to-wire Mini-PV range AWG 22-36, and crimp-to-wire pin AWG 22-32. Made of modified polyphenylene oxide rated UL 94V-1, color Black. **Insulation resistance:** 1 x 10⁵ MΩ minimum. **Temperature range:** -40°C to +105°C. **Withstanding voltage:** 1000 Vrms at sea level. **Latching force:** 6.5 lbs. minimum per position. Optional polarization plug.

Bergstik® II Headers

"Retentive sticks" headers have optional retention tail that provides 0.5 lb. minimum retention prior to soldering on 0.062 inch thick p.c. boards. Can be manually broken to the desired length. Drawn 0.025 inch square wire presents four surfaces suitable for the wrapping. Pins positioned on 0.100" centers. Stand-offs allow cleaning to eliminate soldering contaminants. Header body made of glass-filled nylon rated UL 94V-0, color black. **Insulation Resistance:** 500 MΩ minimum. **Temperature Range:** -65°C to +105°C. **Withstanding Voltage:** 1500 Vrms at sea level. Phosphor bronze pin, current rating, 3 A maximum. Retention force to body, 2 lbs. in either direction. UL recognized, CSA certified.

PLCC Sockets

The plastic leaded chip carrier sockets (PLCC) are designed to carry JEDEC type A chips on 1.27 mm (.050") centerlines. They are available in surface mount and through mount configurations of 20, 28, 32, 44, 52, 68, 84, and 100 position. The socket's low profile design minimizes overall height. Contacts are tin-lead plated phosphor-bronze.

CONAN™ 1.0 mm Pitch Connector System

Receptacle
Header
► Product Users: Manufacturers of Pagers, Cellular Phones, Notebook Computers, and Add-In Memory Boards

Low-profile, surface-mount connectors for close stacking of parallel circuit boards. Options available for 4.15 mm, 4.5 mm, 5.0 mm, 6.0 mm, or 7.0 mm mated connector height. Connectors feature reliable selectively-plated, blade-on-beam contacts on 1.0 mm pitch. **Current Rating:** 1 amp per contact. UL recognized, CSA certified.

RIB-CAGE™ II 0.050" (1.27 mm) Surface-Mount Connectors

Shrouded Header
Receptacle Assembly

High-density, double-row Rib-Cage™ II surface-mount, vertical shrouded headers mate with surface-mount vertical receptacle assemblies. Both are 0.050 × 0.050" (1.27 × 1.27 mm) centerline systems. Black LCP housing, rated UL 94V-0. Hold-downs maintain proper alignment to PC board. Standoffs prevent entrapment of cleaning solutions. Compatible with vapor-phase and infrared reflow soldering processes. Contacts selectively 30 μ" minimum gold plated in contact area and 100 μ" tin/lead on solder tails. **Current Rating:** 1 amp DC. **Withstanding Voltage:** 800 VAC. **Temperature Rating:** -55° to +130°C. UL recognized, CSA certified.

SIMM Sockets

Designed for SIMM (single in-line memory module) applications, the Berg SIMM socket system offering includes 2.54 mm (0.100") and 1.27 mm (0.050") centerlines in vertical and low profile product configurations. Berg SIMM sockets are designed to accept standard JEDEC P.C. board thicknesses ranging from 1.19 mm (0.047") to 1.37 mm (0.054").

The Berg SIMM socket is available with either a standard plastic latch or a rugged metal latching system which better protects the socket from breaking if a SIMM is inserted or removed incorrectly. An overstress protection feature is included in both latching systems. This helps minimize latch damage during module insertion and prolongs the life of the latch.

Berg SIMM socket contacts are housed in a high temperature, glass-filled liquid crystal polymer (LCP) which is compatible with all manufacturing soldering processes.

ReliCon™ System 2.00 mm (0.079") Centerline

- ▶ A New Way of Interconnection in Consumer, Automotive and Other, Cost Sensitive, Electronic Applications
- ▶ Pre-Loaded/One-Piece Socket Type Connector Designed for Use with Our ReliCon Cable
- ▶ A Low-Profile Design (0.118" Horizontal Version) Makes Reliflex a Useful Connector in Dense Packaging Operations
- ▶ Easy Insertion and Termination Eliminates the Need for Application Equipment Which Reduces Total Assembly Cost and Associated Defects
- ▶ Double-Faced Contact Which Touches Both Sides of the Mating Cable Conductors Increasing the Electrical Reliability of the Connection
- ▶ Retentive Leg Contacts Secure Connector to PC Board During Soldering

The ReliCon System is a practical and cost effective packaging approach for board-to-board/cable-to-board applications allowing maximum flexibility with minimum number of connectors and without cable/wire harness assemblies. **Materials.** Housing: GF PBT (UL-94-V0). **Color:** black. **Terminal:** Pre-tinned phosphor bronze. **Plating:** 40 microinches tin/lead. **Operating Environment.** Temperature Range: -40°C to 85°C.

ReliCon™ Cable

- ▶ 18-Conductor
- ▶ Cable Tear Feature Allows for Maximum Design Flexibility

Material. Conductors: single strand 26 AWG tinned copper. **Insulation:** 0.010/0.25 PVC, gray. **Temperature Rating:** -20°C to +105°C. UL AWM 2651 (105°C, 300 volts). **Electrical Properties (measured in ground-signal mode).** Impedance: 130 ohms. Capacitance: 9.7 pF/ft. Inductance: .21 pH/ft. Prop. Delay: 1.35 ns/ft. **Voltage:** 300 volts. **Current:** 1.5 amps. **DC Resistance:** 41 ohms/1000 ft. **Insulation Resistance:** 100 megohms/1000 ft. Recommended plated thru-hole size is .030/0.76 for direct solder to board applications.

DURAMATE™ System — Crimp-To-Wire Receptacle, Housings and Headers; 2.00 mm (0.079") Centerline

- ▶ Mated Height of 9.3 mm
- ▶ Choices of Vertical or Right Angle Headers
- ▶ Polarization Prevents Mating Errors
- ▶ Range of Wire Gauges — 26 AWG to 30 AWG
- ▶ "Kinking" Feature on Board Side of Header Pin Eliminates "Floating" During Wave Soldering
- ▶ Retention Feature on Header Body Enables Connector to Withstand High Shock and Vibration without Unmating

Duramate is a highly reliable interconnect system on 2.00 mm centers. It features a dual beam crimp-to-wire receptacle terminal mated with 0.5 mm (0.020") square header pin which offers an excellent electrical and mechanical performance for wire to board applications. **Material.** Housing: polyphenylene oxide (UL94V-0); color — beige. Header: nylon 6,6 (UL94V-0); color — beige. **Temperature Rating:** -40°C to 105°C. **Contact:** Receptacle — phosphor bronze; finish — tin/lead; Pin — brass; finish — tin/lead.

Quickie™ IDC System Connectors

Quickie™ III provides "world class" quality at a globally competitive price. This product line is ideally suited for high-volume applications such as small computers, video equipment, instrumentation, office products, and automotive related packaging schemes.

The Quickie™ III female connector features a single-beam, long-wipe contact that provides a highly reliable electrical connection. The contact is made of a phosphor-bronze base material and is available

with gold over nickel, tin/lead, or Berg's exclusive "better than gold" GXT™ plating system.

Quickie™ III headers feature duplex-plated pins with either gold or GXT™ plating in the contact area. The solder-tail portion of the pin is fully plated with tin/lead.

Headers have dual polarization and are compatible with virtually all IDC specifications.

Quickie™ III Edge Card Connectors

Single-beam configuration provides high contact pressure for reliable electrical performance. Preloaded cover ensures cable positioning and protects contacts. Bridge-type cover enhances connector-to-cable production rates. Molded-in polarization. Housed in glass-filled thermoplastic polyester rated UL94-V-0. **Insulation resistance:** 1×10^5 M Ω minimum. **Temperature range:** -65°C to +125°C. **Withstanding voltage:** 500 Vrms. Contact made of phosphor-bronze. **Current rating:** 1A. **Resistance:** 15m Ω maximum.

Quickie™ III Edge Card Connectors Without Mounting Ears
30 μ GXT™ finish.

Quickie™ III Female Connectors

Pre-loaded adjustable bridge-type cover suits a wide range of cable. Reduces assembly time, protects contacts and offers precise cover-to-base alignment ensuring reliable termination. Cover's feed-through design allows cable to be inserted into either side of the connector for cable-end terminations. Also allows connector to pass smoothly over cable for daisy chain applications. Serrated slots in the cover assure accurate positioning of the cable over the contacts during assembly. Long wiping action ensures good contact. Polarization by means of polarization plug. Glass-filled thermoplastic polyester body rated UL94-V-0. **Insulation resistance:** 1×10^5 M Ω minimum. **Temperature range:** -65°C to +125°C. **Withstanding voltage:** 1000 Vrms. Phosphor bronze contact has finish of 30 μ GXT over pre-plated nickel. **Current rating:** 1A. **Resistance:** 15 m Ω maximum.

Quickie™ III Right-Angle Headers

Four-walled shielding protects pins in unmated condition and prevents misalignment. Dual polarization by use of polarization keys. Lock and eject system minimizes PC space required and allows dense packaging design. Feature duplex-plated pins made of phosphor-bronze. **Current rating:** 1A. **Finish:** 30 μ GXT™ over nickel on the two contact sides of the pin and gold flash on the other two non-contact sides. Body is glass-filled thermoplastic polyester rated UL94-V-0. **Insulation resistance:** 1×10^5 M Ω minimum. **Temperature range:** -65°C to +125°C. **Withstanding voltage:** 1000 Vrms. Polarization achieved by cutting off pin and adding polarization plug to mating female connector.

Quickie III Edge Card Connectors Incorporate optional mounting hardware. To obtain the equivalent of the Quickie II Edge Card Connectors with molded mounting ears and slots, order the corresponding Quickie II Edge Card Connectors and one modular hardware unit (two pieces must be bought to make one unit).

Right Angle D-Sub Headers and Quickie™ IDC D-Sub Connectors

Right Angle D-Subminiature Headers

- Industry standard connector designs allow mating with both military and commercial D-Subminiature connectors.
- Metal shells ensure EMI protection.
- Right angle plugs and receptacles are available in 9, 15, 25, and 37 positions. Duplex plating is available in the contact areas with 30 μ in. (0.76 μ m) of gold over 50 μ in. (1.27 μ m) of nickel underplate, or gold flash over 50 μ in. (1.27 μ m) of nickel underplate.
- High density versions use 67% less space than standard connectors.
- All connectors are offered with PWB grounding and retentive feature. All are available with or without hex standoff.

Product offering includes the most popular versions used in today's market and state-of-the-art high density versions for new designs. These include the popular right angle short (.318) footprint and the traditional long footprint (.590) in 9, 15, 25, and 37 position versions and a high density version, offering 67% greater packaging density, in 15, 44, 62, and 104 position versions.

The housing is glass-filled thermoplastic polyester (UL 94V-0) with insulation resistance of 2 G Ω min. and a temperature range of -40°C to +105°C. Product can withstand voltage of 1000 Vrms min. The shell is a steel strip with a finish of 150 μ in. tin-lead plating. Contact base material-male is brass MIL C50 and the base material-female is phosphor-bronze CDA-510 with a finish of gold flash over 50 μ in. (1.27 μ m) nickel underplate at engagement area, 150 μ in. (3.81 μ m) tin-lead plate at termination area, or 30 μ in. (0.76 μ m) gold over 50 μ in. (1.27 μ m) nickel underplate at engagement area, 150 μ in. (3.81 μ m) tin-lead plate termination area. The current rating as 2 amps fully loaded with resistance of 30m Ω max.

Quickie™ IDC D-Subminiature Connectors

Industry standard connector configurations that allow mating with military and commercial D-subminiature connectors. **Body:** Black glass-filled thermoplastic polyester, rated UL94V-0. **Contacts:** Copper alloy with gold plating over nickel. **Ratings:** 1 Amp DC, -65°C to +105°C temperature range. **Termination:** 28 AWG stranded or 30 AWG solid flat, flexible, round conductor cable.

GPIO Shielded Cable Assemblies
Quickie™ IDC System Flat Cable

Compatible with Quickie™ connectors, flat cable is PVC insulated and features conductors made of soft annealed copper with tin finish and pitch of 0.050". **Type 76177** come with sequentially colored conductors and are UL listed-style 2884. All others have identification stripe to indicate the first position and are UL listed-style 2651. **Resistance:** >104 megohms/3m. **Temperature:** 105°C maximum. **Dielectric strength:** 1500 Vrms. **Impedance:** 105Ω stranded; 125Ω solid. **Capacitance:** 46 pF/m stranded; 43 pF/m solid. **Voltage rating:** UL 300 VAC. UL recognized, CSA certified.

General Purpose Interface Bus assemblies feature double shielded cable, metal cast connector housing and shield termination. Pre-loaded cantilever beam ensures low connector insertion force and minimum contact wear. Interface meets IEEE-488 specifications. **Spacing:** 0.85 inch. Connector has insulation resistance of 10 GΩ minimum, 1A maximum current rating, and 1,000 cycles durability. Contact force of 101, 5N per contact, with 24 contacts per connector side. Housed in black glass-filled thermoplastic polyester rated UL94V-0. Contact is of beryllium copper with 30μ inch gold over nickel finish. Shielded cover is of zinc alloy with nickel finish. Black oxidized steel captive locking screw and metric thread. Double shielded cable made of aluminum/mylar polyester film tape with braid and drain wire. Gray PVC insulation. **Material conductors:** AWG 26-7/34. Signal line resistance is 0.14 μm maximum, bulk resistance braid is 0.0085 Ω/m maximum. **Capacitance:** 150 pF/m maximum at 1kHz. Impedance of 70-75Ω. **Operating temperature:** 80°C maximum.

GPIO Headers

General Purpose Interface Bus Headers have 0.85 inch spacing. Connector has insulation resistance of 10 GΩ minimum, contact resistance of 10 mΩ maximum, withstanding voltage of 1000 VAC RMS, and current rating of 1.5A maximum. Contact force is 1-1, 5N per contact and durability is 1000 cycles, 24 contacts. Housed in glass-filled thermoplastic polyester UL listed 94V-0, color black. Contact material is beryllium copper, and finish is 30 μ inch gold over nickel in contact area and 100 μ inch tin-lead over nickel on the solder tail. Shield and R/A bracket are low carbon steel with nickel finish. Threaded clinching nuts are low carbon steel with cadmium and clear chromate. **Temperature range:** -55°C to +105°C.

Stock No.	Mfr.'s Type	Description	EACH

These high quality RF connectors are approved for use by the major manufacturers of computer networks and are used extensively for all interconnecting and accessory cables and panels.

BNC 3 Piece Crimp Plugs For Cable Mount

These 3 piece, dual crimp connectors feature Posi-Click contacts that "click" into place when installed insuring a perfect assembly. All crimp pins are gold plated and have a vent hole for optional soldering.

BNC Twist-On

BNC Twist-On connectors are field installable and require no tooling other than a stripping tool for the cable preparation. The center conductor is inserted into the unique Posi-Con contact, as the conductor is twisted onto the cable's outer jacket. Heavy nickel plated brass construction. Solid brass/gold pin.

Color Coded BNC Bulkhead Jacks

— NEW —

In addition to Bomar's white Valox isolated bulkhead jack, three new versions are available with a red, green, and blue insulated panel bushing and the matching color internal insulator. These are excellent for RGB interconnect applications — instantly color codes your panel ports. For panel thicknesses up to .125 inch. Special colors available with minimum order requirements.

BNC Clamp Type Plugs, Standard and Taper Grip

Regular clamp types use a five piece construction while taper grip styles are of three piece design and require little cable preparation. Both types tightly clamp the shield to the connector body. Soldering on the contact pin is required. All materials are machined brass with gold contacts.

Connectors For Twinax Cables

Standard Twinax connectors are impedance matched for 100 ohm cables and are used extensively with IBM computer systems. BNC *Saltconn* Twin is a crimp (or solder) plug with a patented design that simplifies assembly and uses a comparatively inexpensive Bomar hand tool. For .242" diameter twinaxial cables.

Cable Boots For Crimp Connectors

These boots fit snugly over the crimp ferrule and offer additional strain relief when cable is pulled straight back and superior strain relief to the side. Used also for color coding of cables to patch panels.

Printed Circuit Board BNC Jacks

These popular BNC board jacks meet or exceed the highest industry standards. They are available in many standard configurations as shown. Additional versions are available upon request. All isolated jacks are constructed with molded Valox, in White or Black, over nickel plated zinc bodies. Contacts are Phosphor Bronze and plated with tin or gold. All metal versions are fully shielded. They are nickel plated zinc and utilize the same phosphor bronze contacts in either tin or gold plating.

"The Goalie" comes with a patented clip device that locks the mating cable plugs to the female ends. This unique feature protects an on-line network from accidental disconnect and possible loss of data. Rated at 3 GHz with a VSWR of 1.12:1.

Between Series Adapters

Between Series Adapters solve a variety of connection problems where connectors of different types could ordinarily not be mated together. Each adapter has a different type coupling at each end allowing for a wide variety of interconnections

to fit almost all interconnection situations. All adapters are constructed of machined brass and are nickel plated.

RJ45 Category 5 Plugs and Boots

Category 5 Liner Plugs are supplied with an insertable liner for the conductors. The separated conductors are inserted into the liner, cut off squarely at bottom, inserted into RJ45 plug, then perfectly crimped. CXB300 series boots finish the installation with a color-coded strain relief assuring optimum performance.

Super-Low™ Profile and Filtered BNC Jacks

Super-Low™

This right angle BNC jack is the lowest profile available anywhere. It is fully shielded because it is constructed of a zinc alloy and then plated with nickel. The phosphor bronze contact is plated with 15 micro inches of gold.

Filtered

These BNC right angle BNC printed circuit board jacks are capacitively decoupled by using two 4700 pF chip capacitors. This is the most cost effective way to efficiently filter out noise and eliminate ground loops on coaxial interconnections. Valox bodies are standard in black, but are available in white.

Barrier Terminal Blocks, and Accessories

Barrier Terminal Blocks

Barrier

Interposing barriers between each terminal position yields substantially higher electrical ratings and provides an additional safeguard against shorting from frayed wires. The wide size range of "Jones" barrier terminal blocks, plus the several termination options and the available accessories permit flexibility of end use

The 500 Series Jones barrier terminal blocks have high barriers and are designed for applications where electrical and mechanical performance requirements are especially critical. Bottoms are closed so insulating strips are not required. UL Recognized.

Marker Strips

Marker strips identify terminal positions on barrier terminal blocks and insulate exposed portions of terminals from a conductive mounting surface. Marker strips for Series 140 are 1/32" thick, flame-retardant material and mount under the terminal strip. Shipping wt.: 2 oz. 1/8" white numerals standard.

PC Board Connectors

Cardcon® Edge Connectors

For .062" thickness single and double-sided PC boards. Blue glass-filled polyester 94 V-0 insulator. Meets requirements of MIL-C-21097. **Contact Style:** Semi-bellows bifurcated. **Contact Material:** Spring brass alloy 260. **Contact Plating:** Gold on contact area and gold flash on tail with copper underplate. **Termination:** Solder eyelet; dip solder with either .200" (5.08 mm) or .140" (3.56 mm) between row spacing. Available with or without mounting ears and 128" holes. **Test Voltage:** 1800 VAC rms at sea level. **Current:** 5 Amps.

.156" Contact-to-Contact Spacing, Dip Solder Tails. Double Readout, w/mounting ears .200" Row Spacing, Tails .156" long.

Double Readout Card Extender Edge Connector

For inter-connecting two or more .156" (3.962 mm) contact center 1/16" (.1558 mm) PC Boards. Glass fiber-filled diallyl phthalate per MIL-M-14, type SDG-F insulator. **Contact Style:** Bifurcated bellows of beryllium copper and gold contact plating. Solder eyelet termination. **Rated:** 830 VAC; 5 Amps rms at sea level.

Hand Tools and Stay Bands

UNI Clinch D Single Wire Hand Insertion Tool (Fig. A) Type SD-UC. Designed to insert one 24-26 AWG wire at a time. Uni Clinch D is used as a field repair tool by field service engineers.

750-6778.....EACH 88.35

Super D Manual Stay Band Tool (Fig B) Type SD-MSBT. Designed for applying the steel stay band/strain relief to the cable before termination of wires to the Super D Connector, the manual Stay Band tool applies both Stay Band sizes to the full range of cable sizes.

Series 3 Commercial and Military Connectors

High-reliability connectors with improved heat resistance. An outstanding feature of these connectors is the crimp, snap-in, rear release contacts. They are ideal for field repair and replacement. **Insulation Material:** Monoblock glass fiber-filled diallyl per MIL-M-14, type GDI-30-F. **Contact Material:** Copper alloy with gold over copper plating. **Current Rating:** 5 Amps. **Operating Temperature:** -65°F to +300°F. Military connectors have all the same features and meet the requirements of MIL-C-24308.

Basic D II Connectors

The low cost version with all the performance characteristics of the Basic D Series. (They cost less because they have stamped instead of machined contacts.) Ideal for commercial applications where cost is a factor. **Insulation Material:** Two-piece nylon. **Contact Material:** Copper alloy (stamped) with gold over nickel plating. **Voltage Rating:** 1250 VAC rms at sea level. **Current Rating:** 5 Amps. **Temperature Range:** -65°F to +250°F.

CINCH CONNECTORS

Econo D Connectors

MACHINED CONTACTS

STAMPED CONTACTS

The D°C series has a two-piece insulator as well as crimp, snap-in-rear contacts that can be inserted by hand. An economical connector ideal for commercial applications where field replacement of contacts is required at a lower cost than high-reliability connectors. **Insulator Material:** Two-piece thermoplastic polyester UL-94-VO rated. **Voltage Rating:** 1000 VAC rms at sea level. **Current Rating:** 5 Amps. **Operating Temperature:** -65°F to +125°F. The D°U version is UL recognized with the same specs as D°C series. **Contact Material:** Copper alloy (machined), cadmium copper (stamped) with gold over nickel plating.

All contacts in this column sold each in multiples of 50.

Lyte-Series "The Low Cost Interconnect Alternative"

Metal Front Shell Right Angle PCB Connector .318 Mount

- Contact Tails Are Formed at 90° Angle to Front Face of Connector for PCB Mounting
- Boardlocks Allow for Grounding of Front Shell to PC Board and Are Tin Plated for Solderability
- Boardlocks Provide Mechanical Fastening to Board for Stability during Wave Soldering Processes
- 4-40 Threaded Hole Facilitates Secure Mounting to Panels
- Insulation Material: Black UL94V-0 Rated Glass-Filled Polyester
- Mates with Industry Compatible Connectors
- Contact Material: Plug — Brass; Socket — Phosphorus Bronze
- Contact Plating: Gold Over Nickel in Mating Area; Tin Over Nickel on Tails
- Shell/Boardlock Material: Steel
- Shell/Boardlock Plating: Tin Plated
- Screwlock Material: Brass
- Screwlock Plating: Tin Plated
- Operating Temperature: -55°C to +105°C

Metal Shell Straight PCB Connector .109" (2.77 mm) Density

- Tin Lead Plating on Contact Tails to Meet Solderability Per MIL-STD-202, Method 205
- Mates with Industry Compatible Connectors
- Insulation Material: Black, UL94V-0 Rated, Glass-Filled PBT
- Contact Material: Plug — Brass; Socket — Phosphorus Bronze
- Contact Plating: Gold Over Nickel in Mating Area; Tin/Lead Over Nickel on Tails
- .125" PC Board Thickness
- Shell Material: Steel
- Shell Plating: Tin Plated
- Operating Temperature: -55°C to +105°C

Super D Plastic Connectors

Exclusive new plastic D-Subminiature connector. Available in 9, 15, 25 and 37 contact sizes. **Contact Material:** Copper base alloy. **Contact Plating:** Gold on contact mating area and gold on contact terminating area, with copper underplate. **Termination:** Insulation displacement with one of three Cinch terminating tools. Stranded wire 24-26 AWG with .045" diameter max. PVC insulation is displaced and wire is driven into termination to form four positive contacts on each conductor. **Metal Stay Band/Strain Relief:** .036" (9.14 mm) steel. **Polarization:** D or keystone shape insures one way mating. **Wire Strain Relief:** One required for 9 contact size. Two required for other sizes. **Withstanding Voltage Rating:** 1000 volts rms AC — sea level, 1400 volts DC. **Current Rating:** 3 amps. **EIA Standard:** Surpasses EIA STD. RS449 for 9 and 37 contacts interface for DTE and DCE equipment. Also meets RS232 for 25 contact size. **MIL-C-24308:** Super D is designed to meet applicable performance requirements of MIL-C-24308. UL Recognized.

Econo D* A Subminiature Connectors

These subminiature connectors feature crimp-type insulation-grip contact providing increased holding power. Evenly distributed crimp pressure provides consistent termination integrity making them more reliable than conventional rear-release crimp, snap-in contacts. **Insulator Material:** Two-piece glass-filled thermoplastic. **Contact Material:** Stamped copper alloy with gold over nickel contact plating. **Voltage Rating:** 1000 VAC, 5 Amps rms at sea level. **Operating Temperature:** -65°F to +125°F. For ordering accessories, the second letter in Mfr.'s Type is SHELL SIZE.

Back Shells

These backshells fit both standard and high-density D-Subminiature Connectors. All listed items include a set of PVC compression inserts that enable them to fit a range of cable sizes. All items have zinc-plated steel hardware. Series DPH has a cover of black ABS polymer. Series DCH (metallized plastic) has the same and is plated with nickel over copper. Series DMH is die-cast zinc.

Shielded I/O Connector Circular Mini-DIN Socket

— NEW —

- Right Angle PCB Mounted Super-Shielded Socket
- Improved Design Maximizes Shielding and Saves Space
 - Tail Aligner Positions Contacts for Reliable Insertion into PCB
 - "Super-Shielding" on Front Face of Sockets Helps Reduce EMI/RFI/ESD
 - Boardlocks Provide Mechanical Holddown During Wave Soldering Processes
 - Compatible with Defacto Industry Standard Mini-DIN Plugs
 - Suitable for Robotic Assembly
 - Durability: Withstands Minimum 500 Mating/Unmating Cycles
- Solderability: Meets MIL-STD-202, Method 208
- Insulation Material: UL94V-0 Rated Glass-Filled Polyester, Black on Front Face, Platinum Color on Base
- Contact Material: Phosphor Bronze
- Contact Plating: 30 μ in. (0.76 Micron) Min. Gold Over Nickel in Mating Area; Tin/Lead Over Nickel on Tails
- Shield: Material — Phosphor Bronze; Plating — Bright Electro-Tin Lead Over Nickel, Tin Over Nickel on Econo Version
- Contact Rating: 2 Amps at 12 VDC; 1 Amp at 100 VAC

Commercial Datacomm Adapters

Pre-Wired Modular Assemblies

Consists of five modular jack sockets bridged to predetermined contacts of an in-line pair of 50-position miniature ribbon connectors wired back-to-back. Provides one, two, and three-pair modular access to a connectorized 25-pair cable.

For Bridge (Half Tap) Applications

750-7420	SMK-20†	Gray	6						50.17

*SM-19 has an LED associated with each jack to indicate line status. †Kit requires plier-type termination tool.

Housing: UL94V-0 rated gray thermoplastic. Modular Jacks: UL94V-0 rated gray thermoplastic. Miniature Ribbon: UL94V-0 rated glass-filled polyester. Modular Jack: Meets Telephone USOC current rating requirements. Miniature Ribbon: 5 amps. Operating Temperature: -40°C to +85°C.

SM-116. 16 Modular Jack Sockets. Provide six-wire modular access to 25-pair cable. Each miniature ribbon socket is wired to eight, six-wire modular jacks. Can be used as a modular cross-connect system.

750-7430 SM-116 EACH 106.83

SM-124. 24 Modular Jack Sockets. Provides four-wire modular access to 25-pair cable. Each miniature ribbon socket is wired to twelve, four-wire modular jacks. Provides external wire leads if required.

750-7432 SM-124 EACH 101.73

SM-125. 25 Modular Jack Sockets. Provides input/output connection for 25-pair cable. Provides two-wire modular access to 25-pair cable. Consists of 25, two-wire modular jack sockets bridged to predetermined contacts in an in-line pair of 50-position miniature ribbon connectors.

750-7434 SM-125 EACH 85.72

SM-51. Converts Keyset to Single Line. Converts keyset telephone station to single line station. Designed for use with 66E-type mounting blocks. Consists of a modular jack which will accept a two-, four-, six-, or eight-wire modular plug, pre-wired to metal spring contacts.

750-7436 SM-51 EACH 8.43

SM-55. Modular Four-Pair Line Access to Cross-Connect Blocks. Designed to provide four-, six-, and eight-wire modular access to cross-connect blocks. Designed for use with 66M-type mounting blocks. Consists of an eight-position modular jack pre-wired to metal spring contacts.

750-7438 SM-55 EACH 8.43

RS232 to Modular Jack Adapters

One-piece, slim-line housing with two captive 4-40 mounting screws, eight-wire modular access to RS232 input/output connector. Pre-wired versions 100% inspected and tested. UL recognized-file E19071. CSA-LR 31996-3.

†D-Subminiature positions are jumpered together.

Series PA256/5.08 and PA257/5.08 Terminal Blocks (5.08 mm Spacing)

- Versatility — Housings Include Vertical and Horizontal Options for Insertion of Wires
- Easy Wire Insertion and Reduced Connection Time — Terminals are Provided In The Open Position and Wire Entry Is Tapered for Easy Entry and Faster Assembly
- Secure Wire Connections — Bar and Collar Design Insures Secure Connections Repeatedly and Eliminates Terminal Degradation
- No Lost or Missing Screws — Screws are Captive Within Housing
- Break Resistant and Flame Retardant — Block molded in 94V0 Thermoplastic Material
- Safety Recognitions — UL Recognized Under File No. E62557, CSA Certified Under Report No. LR39186-1, Meets VDE 0110
- Wire Range: 22-12 AWG

Series PA266/5, 7.5, 10 mm Terminal Blocks (5, 7.5, 10 mm Spacing)

- Easy Wire Insertion and Reduced Connection Time — Terminals Are Provided In The Open Position and Wire Entry Is Tapered for Easy Entry and Faster Assembly
- Eliminates Broken Solder Connections — Terminals Design Eliminates Transmission of Tightening Torque to P.C. Board While Installing Wires
- No Lost or Missing Screws — Screws are Captive Within Housing
- Break Resistant and Flame Retardant — Block Molded in 94V0 Thermoplastic Material
- Safety Recognitions — UL Recognized Under File No. E62557, CSA Certified Under Report No. LR39186-1, Meets VDE 0110
- Wire Range: 14-22 AWG

38000 and 38010 Series Terminal Blocks

3/8" centerline terminal blocks. Available in two surface mount styles — no bottom termination (Type 38000) or printed circuit pin (Type 38010). For wire range of 22-12 AWG. Excellent chemical resistance, 3000 (typical) breakdown voltage; .03% water absorption; 94 V-0 flammability rating. 300 V, 20 A. Terminals are brass, tin plated. Polypropylene housing.

Ribbon Or Flat Cable Interface Sockets

Features convenient mating, track mounting, and wire clamp on terminal blocks. Rated at 1 A, 125 V. **Terminal Blocks:** Break-resistant thermoplastic. **Terminals:** No. 2-56 screws with clamp, 1/8" center to center spacing. **Wire:** Up to No. 16 AWG. **Headers:** 2 rows of .025" square tin-plated pins on .100" centers with hook retainers. Designed to mate with all standard connectors.

Feed-Through Terminal Blocks

GFT

GBP

Rated 20 A, 300 V, with a 150°C (302°F) continuous use temperature rating. **Max. Width:** .718" ±.030". Terminals on 7/16" center to center spacing. The blocks are made from black thermo-set phenolic. The screw terminals have a No. 6-32 plated steel screw which accepts wire from 22 AWG to 12 AWG (per UL).

Type GFTXW

Similar to type GFT but the blocks are made from thermoplastic (UL rated for 105° continuous use) and also have wire clamps included. The two items listed are offered at special pricing. 2-26 terminal types are available by special order with a 10 piece minimum required per item.

764-0525	GFTXW-5	5	3.83	3.11	2.85	2.76

Type H Sectional, High-Power Terminal Blocks

These blocks have a maximum diameter of 2.0" and .652" center to center spacing. The housing is thermoplastic-polyester with a white fiber circuit marking strip. Rated 75 A, 600 V and 130°C (266°F) continuous use temperature. Unique bar and traveling collar design eliminates the lugging of wire. UL recognized for wire sizes 16 AWG to 4 AWG. Copper terminals with high-pressure solderless connectors. Items with 11-30 terminals are available by special order. Special order minimum is 10 pieces for each item.

Type T High Current Terminal Blocks

UL Standard 1059, CSA Guide No. 184-N-90. These blocks have a maximum diameter of 2.5" and 1.169" ±.030" center to center spacing. The housing is black phenolic rated for 125 A, 600 V, and for 150°C (302°F) continuous use. Tubular, high-pressure solderless connections of electrolytically pure copper accommodate wire without lugging and provide 100% conductivity. The thermo-set phenolic molding has a white fiber marking strip. Thru-bolt construction. UL recognized for wire 6 AWG to 10 AWG. Available in 1-6 terminals. Items not listed are available by special order. A minimum of 10 pieces per item is required on unlisted items.

Insulated Hex Body Banana Plugs

For standard banana jacks of 0.175" across flats. Wire can be soldered to threaded-stud or flared and held by stud for solderless connection. Accept up to 16-gauge wire. Nylon insulated handle is UL approved for self extinguishing. Plug is nickel-plated brass with a current rating of 15 amps, breakdown voltage of 3500 Vrms, minimum, and contact resistance of 0.010 ohms maximum.

Heavy Duty Han® Series Industrial Power Connectors

Listed below are the most popular configurations in Harting's versatile Han® series of power connectors. Application possibilities are extensive — both electronic and electrical. All series have UL and CSA approvals. The HAN D®, HAN E®, HAN A®, and HAN® HsB series have several international approvals.

Inserts feature leading protective ground, polarization, interchangeability of male and female inserts in hoods and housings, and the ability to use the inserts without hoods for rack and panel applications.

Hoods and housings are in accordance with International Standard IEC529 (DIN40050) degree of protection IP65 which complies in full with NEMA Type 4. They feature electrical connection with protective ground and high mechanical strength and vibration resistance.

Founded in 1945 HARTING ELEKTRONIK has become one of the World's leading manufacturers and suppliers of Industrial Power Connectors designed to meet demanding industrial applications and environments.

HARTING Heavy Duty Han® Connectors are applicable in a wide variety of electronic and electrical applications including for example:

Power Utilities
Chemical Plants
Machine Tool Controls
Industrial Instrumentation
Conveyor Equipment

and many more.

All hoods and housings are in accordance with International Standard IEC 529 (DIN 40050) degree of protection IP 65 which specifies that enclosures are protected against windblown dust and rain, splashing water and hose directed water.

This degree of protection complies in full with NEMA Type 4 (Publication No. 250-1979) requirements.

All HARTING Han® series connectors are:

Recognized under file # E 80178 and

Approved under certified file # 18753.

A complete connector consists of the following components:

Hoods with
— top or side entry
— low or high profile
— single or double locking lever

Male/Female inserts with
— screw clamp or
— crimp contact or
— cage-clamp spring termination

Housings (panel or surface mount)
— one or two side entry
— low or high profile
— single or double locking lever
— with or without plastic spring cover
— protective covers available
— labels according to CSA-approval

A comprehensive range of miniature connectors designed to meet the requirements of internal and external connections of the future.

Pin and Socket I/O Connectors

Series 60.01/02/03

- ▶ Reduced Size: Contact Pitch of 1.27 mm (.050 inches)
- ▶ High Contact Density: Double Standard D-Sub
- ▶ E.M.I./R.F.I. Protected: Metal Shells and Hoods for Optimum Screening
- ▶ Polarized by "D" Shape

S.C.S.I.
I.P.I.
H.I.P.P.I.
RS 232 E

- ▶ Locking Device: Quick Latch and Jackscrew
- ▶ Male and Female IDC Versions for Discrete Wire 28 to 30 AWG
- ▶ Male and Female Connector with Straight and Angled Solder Pins
- ▶ Many Connector Sizes: From 20 to 100 Ways

High Voltage Connectors

These connectors use bayonet-type coupling, do not intermate with other high voltage series or with BNC Connectors.

SHV-Series

Manufactured to National Bureau of Standards specification ND 545. These connectors feature an improved interface over MHV connectors. Center contacts are recessed to prevent shock hazards when the connectors are unmated. **Material Bodies and Fittings:** brass, QQ-B-626 — Alloy 360/2H. **Insulators:** Teflon, MIL-P-19468. **Bodies, Fittings and Outer Contacts Finish:** TR-5* except where noted. **atings at Sea Level:** Operating — 3500 VAC or 5000 VDC; Test — 5,000 VAC; 10,000 VDC.

MHV Connector

This forerunner of the SHV-series was designed for high voltage applications of BNC connectors. They aren't intermateable with BNC Connectors. **atings:** 3500 VAC, 5000 VDC Operating; 5000 VAC, 6500 VDC test.

BNC — Miniature Coaxial Connectors

These connectors are rated at 500 Volt RMS. **Frequency Range:** 0-4 GHz. **Impedance:** 50 Ohm except for the 75 Ohm impedance listings. Silver-plated bodies are finished with TR-4* chromate treatment to resist tarnish and salt spray. The rest are finished with TR-5* electro-deposited plating that has superior resistance to tarnish and corrosion.

PC Board Terminal Blocks

KRES, KS and KRM Series Terminal Blocks feature a high-density modular screw-clamp wire connection system designed for PCB applications. Each contact is wire-protected for clean, safe connections. KRES Series available in straight, 90°, and 45° angle mount. The 2-piece KCS Series is available in straight and 90° versions. KRM Series offers a low profile package in a "dove-tail" design. Spacing includes 3.5 mm, 5 mm, and 5.08 mm. **Material:** PA 6/6, Light grey (5 mm), Dark grey (5.08 mm).

Female Socket, 5 mm (.197") Pitch, Upright Version

Macromodul Connectors 5.0 mm

Rast 5 System

Indirect Insulation Displacement Connector

Wire section 0.20-0.34 mm², stackable without loss pitch. Nominal Current: 5 A/60°C. Nominal Voltage: 250 VAC.

Stock No.	Mfr.'s Type	No. of Poles	Dimension (mm)		EACH	
			A	B	1-99	100-249
742-7048	3621 02 K00	2	5	10	.64	.53
742-7050	3621 03 K00	3	10	15	.92	.77

Waterproof Connectors For Quick-Disconnect Sensors

Threaded circular connectors are resistant to water and oil. Designed for proximity sensors and limit switches. "Mini" style 16 AWG and "Pico" style 8 mm. "Mini" is rated 12 A (3 pole) and 9 A (4 and 5 pole) 16 AWG STO cable. IP68 NEMA 68 rated. "Pico" style is rated at 4 A. 75 mm PVC cable. IP67 NEMA 68 rated. Crosses to Brad Harrison Connectors.

Circular DIN-Locking, Mini-DIN and Snap-In DIN Connectors

Designed for a wide variety of applications — ideal for new designs and replacements. Modern streamlined appearance. Precision-built to exacting standards; outside metal housing and locking ring. All contacts soldered for insured quality. Available in 3 to 12 contacts; black chrome finish available upon request. **Contact your nearest Allied facility for items not shown.**

SMA Series Coaxial Plug and Jack Connectors

All SMA miniature connectors meet or exceed requirements of MIL-C-39012. Part number suffix-02 indicates passivated stainless steel finish, while part number suffix-00 indicates gold plated finish.

Semi-Rigid Cable, Direct Solder Attachment: RG 402/U (.141 in.), RG 405/U (.085 in.)
